# Meet the Author

When I began knitting my first Doctor Who scarf (at the tender age of 6 and a half), I little imagined that one day I'd be publishing my own designs, let alone writing books and helping other people learn to knit. I'm not even sure I knew such books existed!

By the time I sold my first designs at 14, it was my dream to be a knitwear designer but I had to wait until I'd been through school, college, and a regular day job for my opportunity. A chance meeting with the editor of a major knitting magazine who'd seen one of my designs (a knitted golf club cover no less!), led to many more commissions, tutorial features, and—eventually—two books.

Working on this latest title has been a real adventure. In the course of my research I have learned much about knitting traditions around the globe and have, I hope, included something for everyone. There are the essential stitches for newer knitters, as well as more challenging stitches for experienced knitters, historical traditional stitches from around the world, and exciting new stitches from my design portfolio.

I hope my book will interest and inspire you, and that it will accompany you on your own knitting and designing adventures.

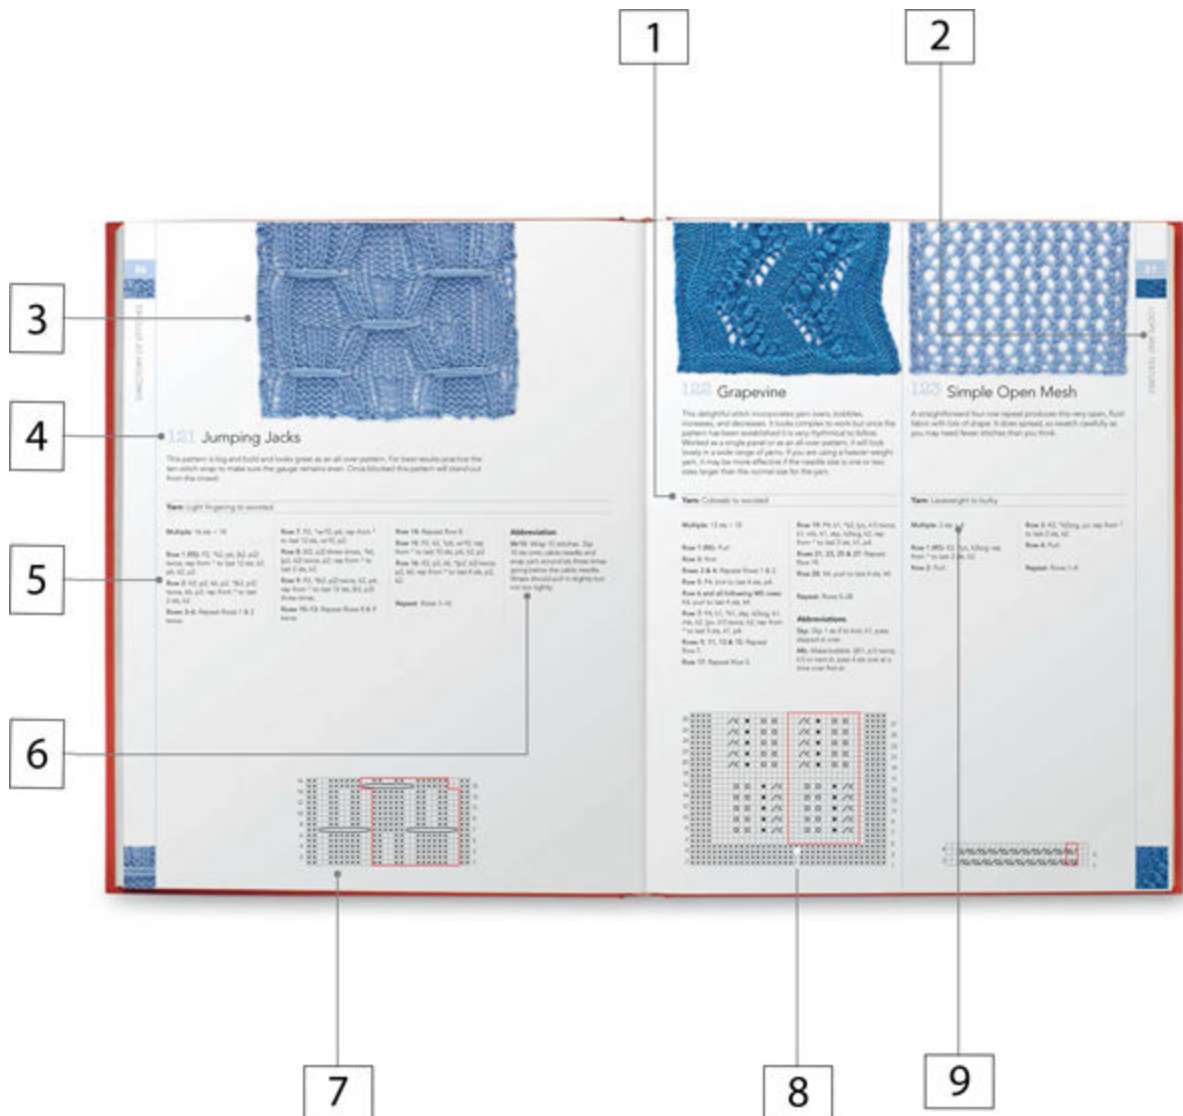

A handwritten signature in cursive script, reading "Lillian Tomlin". The signature is written in a dark ink on a white background. The first name "Lillian" is written with a large, flowing 'L' and the last name "Tomlin" is written in a more compact, cursive style.

## About This Book

The heart of this book is the [Directory of Stitches](#) in which you will learn to work a huge variety of knit stitches (see right for details). The [Glossary of Techniques](#) is packed full of useful information on knitting basics, from choosing the right yarn and needles, and mastering those essential stitches, to measuring gauge and reading charts. With written instructions and clear illustrations, this is a perfect resource for learning new skills and for refreshing your memory on the basics.

## **Directory of Stitches**

Two hundred and fifty knitting stitches make up the comprehensive stitch directory, with written instructions and charts to help you to master a wide range of knitting skills. Organized into 11 families of stitches and clearly numbered, you can dip in and out of the directory or work your way through a particular section to develop your skills in that area.

1. Recommended yarn weights help you to plan how you will use the stitches in real-life knitting projects.
2. Stitches are divided into 11 stitch families to aid navigation. These are indicated here.
3. Swatches provide a great visual reference for how the finished stitch will look.
4. Stitches are clearly named and numbered. Use the visual glossary on pages 4–9 to easily pick out the stitches that excite you.

5. Clear, written patterns guide you through the creation of the stitch. At the end of the pattern you will see the rows that you should repeat to continue building the pattern to the desired size.
6. Abbreviations or specialist stitches are explained with clear instructions when they are needed. A full list of symbols and abbreviations can be found on [pages 186–189](#).
7. Symbol charts provide a visual map for working the stitch. Symbols indicate the different stitches. Charts show the right-side of the work. Right-side (RS) rows are numbered on the right and read from right to left. Wrong-side (WS) rows are numbered on the left and read from left to right.
8. Each chart shows the same number of pattern repeats as the corresponding swatch and only 1 set of repeated rows. The pattern repeat is indicated with a red box.
9. Guidelines for the number of stitches you should cast on to begin this stitch are indicated here.

## Directory of Stitches

Dive straight into the Directory of Stitches where you'll find 250 knitting stitches. The directory is divided into 11 stitch families, so whether you're looking for classic knit and purl stitches or intricate, delicate lace stitches; twists or textures; ripples or ridges; cables or colorwork—you'll find it here.

# **1**

## **Knit and Purl Stitches**

# 1

## Garter Stitch

The mainstay of knitting, this stitch produces a simple but interesting fabric that has a plump texture and lays nice and flat.

**Yarn:** Cobweb to super bulky

**Multiple:** 1 st

**Row 1 (RS):** Knit.

**Repeat:** Row 1

A base ten block model showing 2 tens rods and 1 unit cube. The tens rods are arranged in a 2x10 grid, and the unit cube is placed to the right of the grid.

## 2

# Stockinette Stitch

Alternating rows of knit and purl stitches produce this extremely versatile fabric. It is often used in colorwork and wherever a smooth, even surface is required. The knit side faces you on the right side of the work.

**Yarn:** Cobweb to bulky

**Multiple:** 1 st

**Row 1 (RS):** Knit.

**Row 2:** Purl.

**Repeat:** Rows 1–2

### 3

## Reverse Stockinette Stitch

This stitch also uses alternating rows of knit stitches and purl stitches, but the right side of the work is the purl side, which gives a bumpier look. It is smoother and less springy than garter stitch, with less pronounced ridges.

**Yarn:** Cobweb to bulky

**Multiple:** 1 st

**Row 1 (RS):** Purl.

**Row 2:** Knit.

**Repeat:** Rows 1–2

4

## 1 x 1 Rib

This simple two-stitch pattern produces a stretchy, elastic fabric, ideally suited to trims on garments for welts, cuffs, and necklines.

**Yarn:** Cobweb to bulky

**Multiple:** 2 sts

**Row 1 (RS):** \*K1, p1; rep from \* to end.

**Repeat:** Row 1

A 2x10 grid of dots. The top row has 9 dots and the bottom row has 10 dots. The last dot in the bottom row is highlighted with a red box.

## 5

# Double Rib

This wider rib is worked by alternating two knit and two purl stitches. This stitch is elastic, making it suitable for cuffs, edgings, and necklines. It looks particularly effective in bulkier yarns and patterns where you want a bolder look.

**Yarn:** Cobweb to bulky

**Multiple:** 4 sts

**Row 1 (RS):** \*K2, p2; rep from \* to end.

**Repeat:** Row 1

2	<td>•</td> <td>•</td> <td></td> <td></td> <td>•</td> <td>•</td> <td></td> <td></td> <td>•</td> <td>•</td> <td></td> <td></td> <td>•</td> <td>•</td> <td></td> <td></td> <td></td> <td></td> <td>1</td>	•	•			•	•			•	•			•	•					1
	<td>•</td> <td>•</td> <td></td> <td></td> <td>•</td> <td>•</td> <td></td> <td></td> <td>•</td> <td>•</td> <td></td> <td></td> <td>•</td> <td>•</td> <td></td> <td></td> <td></td> <td></td> <td></td>	•	•			•	•			•	•			•	•					

## 6

### 2 x 1 Rib

Two purl stitches flank a single knit stitch in this variation on a standard rib. The purl stitches recede and make an elegant stripe of knit stitches. This stitch can be worked in a wide range of yarns and is a good rib for sock cuffs.

**Yarn:** Cobweb to bulky

**Multiple:** 3 sts

**Row 1 (RS):** \*K1, p2; rep from \* to end.

**Row 2:** \*K2, p1; rep from \* to end.

**Repeat:** Rows 1–2

# 7

## Mistake Rib

So called because, unlike standard ribs, the knit and purl stitches do not align above each other. A single vertical line of knit stitches with mismatched stitches either side creates an interesting texture. This has a little less elasticity than more standard rib stitches.

**Yarn:** Cobweb to bulky

**Multiple:** 4 sts + 1

**Row 1 (RS):** K1, \*[k1, p1, k2]; rep from \* to end.

**Row 2:** \*[P1, k3]; rep from \* to last st, p1.

**Repeat:** Rows 1–2

## 8

# Fisherman's Rib

This two-stitch pattern produces a lovely elastic fabric, ideal for using on trims on garments, cuffs, and necklines.

**Yarn:** Cobweb to bulky

**Multiple:** 2 sts + 3

**Row 1 (RS):** Knit.

**Row 2:** \*[K1, k1b]; rep from \* to last st, k1.

**Row 3:** K1, \*[k1, k1b]; rep from \* to last 2 sts, k2.

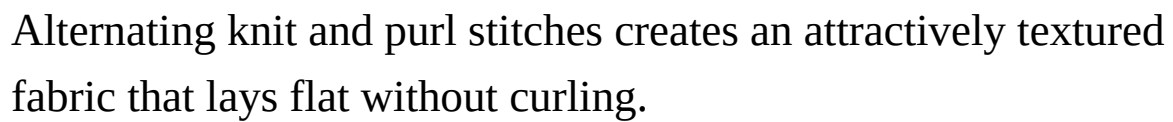

**Repeat:** Rows 2–3

## Abbreviation

**K1b:** Knit 1 below. Insert RH needle from front to back into the st one row directly below the one on the LH needle. Knit this new st together with the st directly above it (the next st you would have been knitting) on LH needle.

# Seed Stitch

## Yarn: Cobweb to super bulky

**Multiple:** 2 sts

**Row 1 (RS):** \*K1, p1; rep from \* to end.

**Row 2:** \*P1, k1; rep from \* to end.

**Repeat:** Rows 1–2

# 10

## Double Seed Stitch

A straightforward pattern of small knit and purl blocks, worked in pairs to give a checkerboard effect.

**Yarn:** Cobweb to super bulky

**Multiple:** 4 sts

**Row 1 (RS):** \*K2, p2; rep from \* to end.

**Row 2:** \*K2, p2; rep from \* to end.

**Row 3:** \*P2, k2; rep from \* to end.

**Row 4:** \*P2, k2; rep from \* to end.

**Repeat:** Rows 1–4

# 11

## Basketweave

This stitch exploits the difference in gauge between rib and garter stitch. Rib contracts the fabric and garter spreads it out, creating the illusion of curved lines. It makes an excellent, springy all-over fabric, and looks much more difficult than it is.

**Yarn:** Light fingering to bulky

**Multiple:** 14 sts + 7

**Row 1 (RS):** \*K7, [p1, k1] three times, p1; rep from \* to last 7 sts, k7.

**Row 2:** P7, \*[k1, p1] three times, k1, p7; rep from \* to end.

**Row 3:** \*P7, [p1, k1] three times, p1; rep from \* to last 7 sts, p7.

**Row 4:** Repeat Row 2.

**Row 5:** Repeat Row 1.

**Row 6:** K7, \*[k1, p1] three times, k8; rep from \* to end.

**Row 7:** Repeat Row 1.

**Row 8:** Repeat Row 2.

**Row 9:** Repeat Row 3.

**Row 10:** Repeat Row 2.

**Row 11:** Repeat Row 1.

**Row 12:** [K1, p1] three times, k1, \*p7, k1, [p1, k1] three times; rep from \* to end.

**Row 13:** \*[P1, k1] three times, p1, k7; rep from \* to last 7 sts, [p1, k1] three times, p1.

**Row 14:** [K1, p1] three times, k1, \*k8, [p1, k1] three times; rep from \* to end.

**Row 15:** Repeat Row 13.

**Row 16:** Repeat Row 12.

**Row 17:** \*[P1, k1] three times, p8; rep from \* to last 7 sts, [p1, k1] three times, p1.

**Row 18:** Repeat Row 12.

**Row 19:** Repeat Row 13.

**Row 20:** Repeat Row 14.

**Row 21:** Repeat Row 13.

**Row 22:** Repeat Row 12.

**Repeat:** Rows 1–22

# 12

## Checkerboard

Blocks of stockinette and seed stitch create a textured stitch that makes an excellent all-over pattern. The stitch will work in a wide range of yarns, but choose a smooth yarn with good stitch definition to show off the block structure to its best.

**Yarn:** Light fingering to bulky

**Multiple:** 10 sts

**Row 1 (RS):** \*K6, [p1, k1] twice; rep from \* to end.

**Row 2:** \*[K1, p1] three times, p4; rep from \* to end.

**Rows 3–8:** Repeat Rows 1 & 2 three times.

**Row 9:** \*[K1, p1] twice, k6; rep from \* to end.

**Row 10:** \*P4, [p1, k1] three times; rep from \* to end.

**Rows 11–16:** Repeat Rows 9 & 10 three times.

**Repeat:** Rows 1–16

# 13

## Brick

An illusion of 3D light and shade is created in this stitch by combining stockinette and reverse stockinette lozenges with seed stitch diamonds. A smooth yarn will maximize the effect.

**Yarn:** Light fingering to bulky

**Multiple:** 10 sts

**Row 1 (RS):** \*P1, k1; rep from \* to end.

**Row 2:** \*P2, [k1, p1] three times, k2; rep from \* to end.

**Row 3:** \*P3, [k1, p1] twice, k3; rep from \* to end.

**Row 4:** \*P4, k1, p1, k4; rep from \* to end.

**Row 5:** \*P5, k5; rep from \* to end.

**Row 6:** \*P5, k5; rep from \* to end.

**Row 7:** \*K1, p4, k4, p1; rep from \* to end.

**Row 8:** \*P1, k1, p3, k3, p1, k1; rep from \* to end.

**Row 9:** \*K1, p1, k1, p2, k2, p1, k1, p1; rep from \* to end.

**Row 10:** \*[P1, k1] five times; rep from \* to end.

**Row 11:** \*[K1, p1] five times; rep from \* to end.

**Row 12:** \*P1, k1, p1, k2, p2, k1, p1, k1; rep from \* to end.

**Row 13:** \*K1, p1, k3, p3, k1, p1; rep from \* to end.

**Row 14:** \*P1, k4, p4, k1; rep from \* to end.

**Row 15:** \*K5, p5; rep from \* to end.

**Row 16:** \*K5, p5; rep from \* to end.

**Row 17:** \*K4, p1, k1, p4; rep from \* to end.

**Row 18:** \*K3, [p1, k1] twice, p3; rep from \* to end.

**Row 19:** \*K2, [p1, k1] three times, p2; rep from \* to end.

**Row 20:** \*[K1, p1] five times; rep from \* to end.

**Repeat:** Rows 1–20

# 14

## Blocks

This stitch uses the gauge difference between the stockinette stitch blocks and garter stitch rows and blocks to create an illusion of a rippling fabric. It could be an all-over pattern or an interesting edging or trim.

**Yarn:** Light fingering to bulky

**Multiple:** 6 sts + 3

**Rows 1 (RS) and all RS rows:** Knit.

**Row 2:** Knit.

**Rows 4 & 6:** P3, \*k3, p3; rep from \* to end.

**Rows 8 & 10:** Knit.

**Rows 12 & 14:** P3, \*k3, p3; rep from \* to end.

**Row 16:** Knit.

**Repeat:** Rows 1–16

# 15

## Lozenges and Triangles

This dramatic pattern only uses knit and purl stitches. The large repeat will work best as an all-over pattern, on a garment or a soft furnishing. To show off the strong pattern lines to their best advantage choose a yarn with good stitch definition.

**Yarn:** Laceweight to bulky

**Multiple:** 18 sts

**Row 1 (RS):** \*K2, p1, k5, p7, k3; rep from \* to end.

**Row 2:** \*P3, k7, p5, k1, p2; rep from \* to end.

**Row 3:** \*[K1, p1] twice, k5, p5, k4; rep from \* to end.

**Row 4:** \*P4, k5, p5, [k1, p1] twice; rep from \* to end.

## Moss Stitch Zigzags

Zigzags of stockinette and reverse stockinette combine to create this richly textured fabric. It works well as an all-over fabric, ideally in a smooth yarn so that the zigzags are clearly defined. The zigzags also offer some elasticity so it could be used as a large-scale rib or edging.

Using stockinette with reverse stockinette gives an interesting texture and a striking pattern, but with a consistent gauge across the fabric. This makes it a great choice for an all-over fabric that is stable and even.

## Garter Diagonals

This works well as an all-over pattern and could be mirrored to produce an interesting chevron, perhaps down the back of a jacket. It is suited to a wide range of yarn weights—to get the most from the pattern, choose a yarn with good stitch definition.

## Steps

Offset blocks of stockinette and reverse stockinette create this fascinating step stitch. It could be reversed to create a zigzag pattern or chevron. It has a nice, balanced gauge and has texture without added bulk, so it would suit a variety of yarns.

# Asymmetric Cable

Paired twisted stitches are used to create this cable-like pattern. However, there is an added twist. Rather than the more usual knit-facing twists, this cable alternates a knit twist with a purl twist for an offbeat look. A smooth yarn will show off this pattern at its best.

## 24

# Chained Cable

This stitch uses a pair of four-stitch cables to create a large cable that looks like a giant knit stitch. It is straightforward to work and is set on a reverse stockinette stitch background to emphasize the structure of the cables. It can be worked in a wide range of yarn weights—a smooth yarn will work best.

## Checkerboard Twist

This is a combination of twisted stitches and seed stitch blocks worked to form a firm, richly textured fabric. If you are working this stitch in a thicker yarn, it may be preferable to use a larger needle than normal for the yarn to reduce the thickness of the fabric. It would make a lovely, warm throw or, if worked on a finer needle than normal in a sturdy yarn, it would make a terrific rug.

# Ascending Squares

This pattern appears complex but uses just knit and purl stitches. It is quite a lengthy pattern repeat so requires a little concentration when working.

# Ripple Twist

This fabric of criss-crossed twists takes a little patience as it is quite slow-growing. It uses twisted stitches rather than cables and this does make it easier to work. It also creates a lovely textured fabric that is surprisingly soft and pliable.

**Multiple:** 4 sts + 4

## Waffle Stitch

Waffle stitch is a lovely, springy pattern that is open enough to be light but is still warm because the air is trapped in the layers. It works particularly well in a medium-weight yarn but can be used in a range of weights.

**Yarn:** Fingering to bulky

**Multiple:** 2 sts + 3

30

## Beehive Waffle

A deep, soft texture with strong diagonal lines characterizes this pattern stitch. With only four rows and a simple three-stitch pattern, it is relatively quick to knit and, unusually, the diagonals do not create a particular bias in the fabric.

**Yarn:** Laceweight to bulky

**Multiple:** 2 sts + 3

## Diamond and Leaf

This complex combination of traveling stitches and lace creates a beautiful, dramatic pattern that shows its true beauty when blocked. A single-height pattern repeat would look fantastic as an edging. A series of vertical repeats could be used to great effect as a panel or part of a larger panel.

The image displays a 48x47 grid of symbols. The symbols are arranged in a pattern that is symmetric about a central vertical axis. The symbols used are circles (○), triangles (▲), and slashes (/). The grid is numbered 48 down to 2 on the left and 47 down to 1 on the right. A red rectangular box highlights a central portion of the grid, spanning from row 13 to row 44 and from column 10 to column 38.

Slipped stitches over a background of stockinette stitch create a firm fabric with a bold zigzag pattern. With only six stitches in the pattern repeat, once the pattern is established it is really straightforward to follow.

# Diagonal Brioche

This pattern is unusual in that the yarn overs do not create a lacy fabric. Rather, by combining the yarn over closely with a slipped stitch and a decrease, an interesting, quite dense texture is created, well-suited to an all-over pattern. Note that the stitch count is variable between the rows.

**Yarn:** Laceweight to bulky

**Multiple:** 3 sts + 3

**Row 1 (WS):** P2, \*sl1 wyib, yo, p1; rep from \* to last st, p1.

# Rick-Rack Rib

Offset yarn overs and decreases are used to create this ribeffect stitch. It would make a nice all-over fabric. It could also be used as a traditional rib on the border of a garment, although it does not have the same elasticity if a snug fit is required.

**Yarn:** Sport to bulky

**Multiple:** 5 sts + 3

## Zigzag Rib

An understated zigzag stitch, created using straightforward twisted stitches on a background of reverse stockinette stitch. Worked in a smooth yarn, this stitch could be used as an interesting all-over pattern or as a single repeat.

## Trellis

This large-repeat pattern is striking and bold. When placing this pattern on a garment, consider whether to locate the small motifs or the larger motifs at the center, and try out where the pattern repeats end to get a balanced effect. For maximum impact, choose a smooth yarn.

## Threaded Cable

Three separate cables interlock to create an open, soft braid that meanders across the fabric. The reverse stockinette stitch background could be replaced with garter stitch for a different effect. Placing two braids together and adding a simple cable either side would create an interesting panel.

**Yarn:** Sport to bulky

**Multiple:** 15 sts + 9

**Row 1 (WS):** K7, \*k10, p2, k1, p2; rep from \* to last 2 sts, k2.

## **Abbreviation**

**5/5 RPRC:** 10-stitch right purl ribbed cable. Slip 5 sts to cable needle and hold in back, p5 from LH needle, k2, p1, k2 from cable needle.

40

## Traveling Rib

These four-stitch cables are worked so as to put the knit stitches firmly at the front, which creates a ribbed structure. Offsetting the cables gives a textured network of ribbed ridges and gives the impression of movement. The fabric looks great as an allover pattern and is springy but soft enough for garments as well as soft furnishings.

**Yarn:** Fingering to worsted

**Multiple:** 6 sts + 6

**Row 1 (WS):** P5, \*k2, p4; rep from \* to last st, p1.

41

## Daisy Stitch

Once the basic daisy stitch has been mastered, this lovely fabric can be turned into a wide range of projects. It produces quite a firm fabric so, for more drape, try needles a couple of sizes larger than those recommended for the yarn.

**Yarn:** Laceweight to bulky

**Multiple:** 4 sts + 3

**Row 1 (RS):** Knit.

**Row 2:** K3, \*Dst, k1; rep from \* to end.

**Repeat:** Rows 1–4

## Abbreviation

**Dst:** Daisy stitch. P3tog but keep the sts on LH needle. Yo, then purl the same 3 sts together again to complete the st.

42

## Lacy Daisy Stitch

This lacy daisy pattern is a more open and soft version of the daisy stitch. It has a super texture but is nicely balanced without any biasing. It works well in almost any smooth yarn with good stitch definition.

**Yarn:** Light fingering to bulky

**Multiple:** 8 sts + 10

**Row 1 (RS) and all RS rows:** Knit.

**Row 2:** \*K1, Dst, p1, p2tog, yo, p1; rep from \* to last 2 sts, k1, p1.

43

## Little Crown Stitch

Cluster stitches create a lovely open but stable fabric, well suited to an all-over pattern. Individual crowns could also be worked and separated by bands of garter or stockinette to form an interesting rib, or used as a decorative edging.

**Yarn:** Laceweight to bulky

**Multiple:** 1 st + 2

**Row 1 (RS):** Knit.

**Row 2:** Knit.

**3CL:** 3-stitch cluster. Slip 3 sts letting extra wraps drop. Place slipped sts back onto LH needle, [k1, p1, k1] into all 3 sts.

44

## Lacy Sails

Small stockinette sails surrounded by lacy eyelets make an attractive fabric. This pattern would work well in a range of yarns. A smoother yarn will give more visible eyelets while a textured yarn may benefit from larger than normal needles for the yarn.

**Yarn:** Laceweight to worsted

## Simple Lacy Rib

## Vine Lace

Lines of eyelets are flanked by bold ribbed stripes in this dramatic stitch. It would look equally striking as a single panel or worked as an all-over pattern. This stitch is punchy enough to work in a wide range of yarns without losing its impact.

## Garter Fan

This delicate lacy fan would make an interesting panel, an allover fabric, or perhaps an interesting edging or hem. It would be straightforward to isolate the central lace panel and add a different border, or even place the panels together to create a more lacy fabric. For lighter yarns, a mohair or angora blend would be very attractive without distracting from the pattern.

## Lace Diamonds

This lace pattern produces an attractive, stable fabric suitable as an all-over pattern or as an interesting edging band or trim. The rows of knit stitches that arch to a point are a nice counter for the Estonian gathered stitches in the center and give the pattern balance.

## Traveling Leaves

Delicately swooping pairs of lacy eyelets make this a very attractive all-over pattern. Unlike some other traveling stitch patterns, this one has straight sides and flat lower and upper edges which makes it handy when you want a stitch with movement but don't want a scalloped edge.

## Scallop Lace Puff

The scallops in this pattern can be worked as single units, in a panel, or as an all-over pattern. The pattern is quite bulky so will work better in slightly lighter yarns but could be used on heavier yarns by going a couple of needle sizes larger than recommended for the yarn to open out the texture.

## Undulating Waves

Carefully placed combinations of eyelets, increases, and decreases make this delightful pattern that has so much movement, yet is very stable and balanced. Work as a panel or combine a series of repeats for a beautiful all-over fabric.

## **Bobbles, Puffs, and Clusters**

70

## Petite Bobbles

Strictly not a traditional bobble technique, this stitch produces an effect like delicate little bobbles contained in an open, symmetrical mesh. It is open and soft, so is suitable for projects where drape is required, when worked in the standard range of needle sizes for the yarn.

**Yarn:** Cobweb to bulky

**Multiple:** 2 sts + 2

**Row 1 (RS):** K1, \*k2tog; rep from \* to last st, k1.

**Row 2:** K1, \*[k1, m1]; rep from \* to last st, k1.

**Row 4:** Purl.

**Repeat:** Rows 1–4

## Abbreviation

**M1:** Make 1. Increase by 1 st by knitting into the front of the strand between the st just worked and the next st.

71

## Bobbles

A classic bobble arranged in a symmetrical format for a balanced fabric that isn't distorted by the additional bulk of the bobbles. A single-height repeat would make a lovely border, and the structure of the fabric can be varied by changing the spacing between the bobbles.

**Yarn:** Fingering to bulky

**Multiple:** 8 sts + 5

**Row 1 (RS):** Knit.

**Row 2:** Purl.

**Rows 3 & 4:** Repeat Rows 1 & 2.

72

## Harebell

Clustered trios of bobbles in an offset pattern make this a surprisingly open and delicate fabric, uncharacteristic of many bobble stitches. This stitch has body and texture but is not stiff, making it suitable for a wide range of yarns.

**Yarn:** Cobweb to worsted

**Multiple:** 6 sts + 7

**Row 1 (RS):** K2, \*yo, p3tog, yo, k1, mb, k1; rep from \* to last 5 sts, yo, p3tog, yo, k2.

73

## Buds

Sprigs of flower buds spring from their stockinette stitch stems on a background of reverse stockinette stitch. This stitch could be worked as an attractive border or as an all-over pattern. It would also make a nice edging down either side of a jacket front or down a sleeve.

**1/1 RPC:** 2-stitch right purl cable. Slip 1 st to cable needle and hold in back, k1, p1 from cable needle.

74

## Trinity Stitch

A pretty, open mesh stitch with an interesting texture. Highly textured stitches are not always suitable for very fine yarns and lightweight fabrics, but this stitch is delicate enough for an allover fabric even in fine yarns. For an even softer fabric, work on larger needles than normal for the yarn.

**Yarn:** Cobweb to worsted

**Multiple:** 4 sts

**Row 1 (RS):** Purl.

**Row 2:** \*Inc1to3, p3tog; rep from \* to end.

**Repeat:** Rows 1–4

## Abbreviation

**Inc1to3:** Make 3 sts from 1. [K1, p1, k1] in next st.

75

## Ridged Trinity Stitch

This variant of trinity stitch creates interesting pattern blocks, divided by a purled stripe. Using knit and purl increases and decreases creates a firm fabric with lots of texture. For a softer fabric, this stitch can be worked on larger needles, and can be worked in a wide range of yarn weights.

**Yarn:** Cobweb to worsted

**Multiple:** 4 sts + 2

**Row 1 (RS):** Purl.

76

## Twining Bobbles

This dramatic combination of interlocking cables studded with bold bobbles would make a stunning edging. It would also make an impression as part of a larger panel. To make the most of the strong cable lines, a smooth yarn with good stitch definition would be ideal.

**Yarn:** Fingering to bulky

## Diamond Bobble

Bold bobbles are set into a trellis of fine cables. This stitch would make an excellent all-over pattern and could be worked in a wide range of yarns. Smooth yarns will give maximum impact, but a softer yarn with a halo (angora or mohair, for example) would produce a more subtle effect.

## Honeycomb

Unlike a classic honeycomb, this pattern has a squared structure and the reverse side of the stockinette stitch is the right side, for added texture. Slipped stitches are worked on the knit (wrong) side. Try to keep these evenly tensioned for a nicely balanced fabric. The pattern works well as an all-over pattern in a wide range of yarns.

**Yarn:** Fingering to bulky

## Bobble Rib

This classic  $2 \times 3$  rib is given extra interest with carefully placed bobbles. It would make an exciting alternative to a standard rib for a cuff or trim, and can be worked in a wide range of yarns. Smooth yarns with good stitch definition will show off the stitch to its best.

**Yarn:** Fingering to bulky

**Multiple:** 10 sts + 7

## Nupp and Twist Bobble

Bold and sassy, bobbles always make a statement and are a fun way to “draw” on a knitted fabric. The added bands of nupps balance the pattern, making it more stylish and less kitsch. There is lots of scope to play with this pattern, taking elements as a motif or varying the bands.

81

## Oyster Stitch

A fascinating stitch created by taking long, wrapped stitches and combining them with a series of increases and decreases. Once the basic oyster has been mastered, it can be readily dropped into other patterns in single units, randomly placed over a fabric, or perhaps vertically aligned for a striking panel. For a flatter lower edge, work several rows of garter or stockinette stitch before the first oyster.

82

## Clustered Star

The wrapped clusters in this lacy fabric give it additional texture but also stability, reducing biasing and providing structure. It is well-suited to an all-over fabric and could be worked in a wide range of yarns.

## Puff Stitch

It may look like there are lots of complex stitches in this pattern but in fact they are straightforward repeats. To make it easier to visualize the puff motifs (and so you can put single motifs into other projects), they are shown in a separate chart. Simply insert the relevant row of the motif chart where the number appears in the main chart. There's lots of fun to be had with these motifs!

## Lace Puffs

Set against a smooth stockinette stitch background, lacy chevrons are topped with delicate little bobbles. A smooth yarn would be a good choice for this stitch, but a halo yarn such as angora or mohair could also be used for a more delicate effect.

## Hazelnut Stripes

Although the chart for this pattern may look complex, there are several “rest” rows (plain rows with no special techniques). Note that the stitch count varies throughout the repeat. The effort is worthwhile, as this is a very pretty pattern.

86

## Lace Bobble Mesh

This very densely textured fabric would make a great edging or trim. If you have a lot of patience, it would be great as an all-over pattern for a floor cushion or soft furnishings, as it is springy and resilient. If worked in a bulky yarn, you may need to go a couple of needle sizes larger than normal to accommodate the bobbles. For a softer fabric, work the bobbles with more stitches in between or dot them across a fabric.

**Yarn:** Fingering to bulky

## Ringlet Stitch

Ringlet stitches make lovely, delicate textures and can be arranged in any number of shapes. Here, offset ringlet shapes create an interesting all-over pattern that would work in a wide range of yarns.

## Spring Flowers

Dainty bobbles emerge from a reverse stockinette stitch background on delicate stockinette stitch stems like spring buds emerging from the frosty ground ready to burst into flower. This stitch will look particularly striking worked in a smooth yarn with good stitch definition.

89

## Teardrop Stitch

Teardrop motifs are formed by working several times into the same stitch, creating a small pouch in the fabric. The extra stitches are decreased on subsequent rows, making the pretty little droplet shapes. These motifs could be worked into many designs as single motifs or in a wide variety of patterns.

## Cocoon

Short cast-on “tails” create a fascinating, funky texture against a simple stockinette stitch background. This stitch could be worked in a wide range of yarns and there is lots of scope to play around with the placement of the tails to give a more or less densely textured fabric.

## Twin Leaf

This is an advanced pattern with a nifty Estonian gathered stitch to create the center of the leaves (or maybe they look like alighting butterflies). A fun challenge and a lovely pattern for a panel or a single motif. As the stitch count varies, aim to end the pattern with Rows 1 and 2 for a neat finish.

**Ssk:** Slip, slip, knit. Slip 2 sts one at a time as if to knit, knit 2 slipped sts together.

## Cluster Flowers

This is a challenging pattern to knit but it makes a lovely, deeply textured fabric. The cluster stitches take a little practice, but the finished effect is well worth the effort. For a more open fabric, consider working with needles a couple of sizes larger than normal for the yarn being used.

## Fluted Pleats

This interesting pattern uses extra stitches that are cast on and bound off throughout the fabric to create small pleats. It could be varied by altering the background, spacing the pleats further apart or closer together. Note that the stitch count varies throughout the repeat.

## Tucked Rib

There are many interesting patterns to be achieved with the simplest of stitches. This tucked rib offsets sections of  $2 \times 2$  (double) rib divided by two rows of stockinette. It would be an interesting all-over fabric and could be worked in a wide range of yarns.

**Yarn:** Light fingering to bulky

## Ridged Eyelet

Alternating bands of smooth stockinette stitch and delicate lace create an interesting fabric with a lovely texture. A smooth yarn will emphasize the stitch structure. Using a halo yarn such as angora or mohair will soften the texture while retaining an interesting stitch pattern.

**Yarn:** Cobweb to bulky

**Multiple:** 2 sts + 2

**Row 1 (RS):** Knit.

**Row 2:** Purl.

**Rows 3 & 4:** Repeat Rows 1 & 2.

## Garter Ridges

This pattern exploits the differences in texture and gauge between garter and stockinette stitch to create lovely, springy ridges. It can be used on a wide range of yarns and will look great in both textured and smooth yarns.

**Yarn:** Light fingering to bulky

**Multiple:** Any number of sts

**Row 1 (RS):** Knit.

**Row 2:** Purl.

**Rows 3–6:** Knit.

**Repeat:** Rows 1–6

## Double Garter Stitch

Double garter stitch makes a great pattern where a firm fabric is required. It is an interesting combination of elongated stitches and knit together that takes a little practice but gives a great texture.

**Yarn:** Fingering to bulky

**Multiple:** 2 sts

**Row 1 (WS):** P1 elongated to end.

**Row 2:** Dgs to last loop, knit wrapping yarn twice.

**Repeat:** Row 2.

## Abbreviations

**P1 elongated:** Purl a st wrapping yarn around needle twice. On next row drop the extra wraps from needle.

**Dgs:** Double garter stitch. Knit first loop of first st only, leaving second loop on needle; \*knit second loop together with first loop of next st, wrapping yarn twice and leaving second loop on needle; rep from \*.

## Wavy Tucks

Tucks are an interesting way to add texture and shape to an otherwise plain stockinette fabric. Experiment with different depths of tuck, widths, and spacing for some exciting effects, keeping in mind that tucks do shorten a fabric. A series of tucks in vertical lines would make an interesting ruched fabric.

**Yarn:** Laceweight to bulky

**Row 1 (RS):** Knit.

**Row 2 and all WS rows:** Purl.

101

## Little Ridged Knots

A delicate, textured pattern that is suitable for use as a band, trim, or an all-over fabric. A smooth yarn with good stitch definition will best emphasize the texture, and the pattern will work well on a wide range of yarns.

103

## Tucked Garter Tubes

Tucked stitches create great textures in a knitted fabric. Try this pattern for a funky hat or interesting border. If using for a border, swatch with the main fabric as the stitch count may need to be adjusted to accommodate the slightly wider garter stitch.

**Yarn:** Light fingering to bulky

**Multiple:** Any number of sts

**Row 1 (RS):** Knit.

**Row 2:** Purl.

**Row 3:** Knit.

104

## Ridged Openwork Reversed

A nicely textured stitch with scope for use as an all-over pattern. Or you could try using a couple of pattern repeats as a band to add interest to an otherwise plain garment. It would also make a nice alternative to a rib.

**Yarn:** Laceweight to bulky

**Multiple:** 2 sts + 1

**Row 1 (WS):** Purl.

**Row 2:** K1, \*k2tog; rep from \* to end.

**M1:** Make 1. Increase by 1 st by knitting into the front of the strand between the st just worked and the next st.

105

## Striped Stepped Tucks

The chart for this pattern looks challenging but the main stitch is a simple stockinette. Once the pattern of brioche stitches is established, it quickly becomes a rhythm that is quite easy to follow. When worked in two-row stripes as here, the interesting stepped shape is emphasized and it looks great as an all-over fabric.

## Interwoven Blocks

Offset four-stitch cables push the knit stitches forward in this richly textured woven basket pattern. A smooth yarn with good stitch definition will give this pattern maximum impact.

## Sandwich Stitch

Blocks of slipped stitches draw up the fabric to create this lovely, textured pattern that is much simpler to work than it first appears. By offsetting the slipped sections, it balances out the pattern and prevents biasing or pulling up.

## Tucked Slipped Honeycomb

This delicate honeycomb looks particularly lovely worked in a fine yarn, but is equally at home with a thicker yarn. By slipping long strands on three rows and then lifting these strands by drawing them up after a further three rows, gentle tucks are created. A background of reverse stockinette gives added textural interest.

## Fur Stitch

Fur stitch is nothing if not fun! It would be quite painstaking to make an entire garment in this stitch but when worked in a fuzzy, textured yarn you can create great cuffs or trims. It's also very useful for soft toys and decorations.

**Yarn:** Laceweight to bulky

**Multiple:** 1 st + 2

**Row 1 (RS):** Knit.

**Row 2:** Purl.

**Row 3:** K1, \*Lsf; rep from \* to last st, k1.

**Row 4:** Ktbl.

**Repeat:** Rows 1–4

## Abbreviation

**Lsf:** Loop stitch front (loops to front of work). Knit in front of st but don't complete st. Bring yarn between needles (yf) and wrap clockwise around left thumb at front of work. Take yarn to back between needles. Knit loop on LH needle and drop off LH needle, completing the st. Yo taking yarn from back, around RH needle, and hold to back. Lift 2 sts just worked over yo.

110

## Cut Fur Stitch

It can be unnerving to cut loops once they've been so carefully knitted, but provided the yarn has a little grip and has been knitted to a firm gauge (go down a needle size or two if necessary), it should be possible to produce this lovely fluffy "pile" fabric. It can be particularly fun to work this stitch in a variegated yarn for a really funky look.

**Yarn:** Fingering to bulky

**Multiple:** 1 st + 2

**Row 1 (RS):** Knit.

**Row 2:** P1, \*Lsb; rep from \* to last st, p1.

**Row 3:** Ktbl.

**Repeat:** Rows 2–3. When finished, hold loops and cut carefully. Trim to required length.

## Abbreviation

**Lsb:** Loop stitch back (loops to back of work). Insert LH needle in st and wind yarn around needle as if to knit (below). Wind yarn around LH index finger. For a short loop wind once; to lengthen the loop, wind twice. Take yarn back around RH needle as if to knit (again) and form the st. It will be two or three strands wide, depending on how many times you have wound the yarn around your finger. To secure the loop, bring the working yarn between the needles to the front of the work and then over the needles, like a yo. Hold yo securely in place and bind off st over yo. This will secure the loop.

111

## Double Faced Loop Stitch

This unusual pattern produces loops on both sides of the fabric. It would make a funky trim for a jacket edge or collar, or on a bag or tote. It's also a great pattern for a reversible scarf or cowl, and would look wonderful in a textured yarn.

**Yarn:** Light fingering to bulky

**Multiple:** 2 sts + 1

**Row 1 (RS):** Knit.

**Row 2:** Knit.

**Row 3:** \*K1, Lsb; rep from \* to last st, k1.

**Repeat:** Rows 1–5

## Abbreviation

**Lsb:** Loop stitch back (loops to back of work). Insert LH needle in st and wind yarn around needle as if to knit (below). Wind yarn around LH index finger. For a short loop wind once; to lengthen the loop, wind twice. Take yarn back around RH needle as if to knit (again) and form the st. It will be two or three strands wide, depending on how many times you have wound the yarn around your finger. To secure the loop, bring the working yarn between the needles to the front of the work and then over the needles, like a yo. Hold yo securely in place and bind off st over yo. This will secure the loop.

## Pillar Stitch

A simple but attractive fabric that makes an interesting alternative to a standard rib. This pattern does have a degree of bias so make and block a good-sized swatch before beginning.

**Yarn:** Laceweight to bulky

**Multiple:** 3 sts + 4

**Row 1 (WS):** Purl.

**Row 2:** K2, \*yo, sl1 purlwise, k2, pssso; rep from \* to last 2 sts, k2.

**Repeat:** Rows 1–2. End with Row 1.

113

## Cellular Stitch

This soft, open fabric has a good drape, making it suitable for a wide range of fabrics and yarns. Smooth yarns will allow the eyelets to be more visible; textured yarns may give a less open look but will still produce a soft fabric.

**Yarn:** Laceweight to bulky

**Multiple:** 3 sts + 3

**Row 1 (WS):** Purl.

**Row 2:** K2, \*k2tog, yo, k1; rep from \* to last st, k1.

**Repeat:** Rows 1–4. End with Row 1.

114

## Ridged Openwork

This decorative pattern, although including yarn overs, produces a firm fabric that can tend to pull in so swatch carefully and check gauge.

**Yarn:** Laceweight to bulky

**Row 1 (RS):** Purl.

**Row 2:** P2tog to last st, p1.

**Row 3:** P1, \*m1p, p1; rep from \* to end.

115

## Open Basketweave

Two rows of eyelets inserted into this otherwise simple garter and stockinette pattern add interest and make it a good first lace project. It is suitable for use as an all-over pattern in a wide range of yarns.

**Yarn:** Laceweight to bulky

**Multiple:** 10 sts + 2

**Row 1 (RS):** P1, \*p2, yo, k2tog, k2, ssk, yo, p2; rep from \* to last st, p1.

116

## Granite Stitch

Softer than the name suggests, granite stitch forms a nubby, interesting, textured fabric. It makes a good all-over pattern and is simple to work. The stitch count varies with Row 2 halving the stitch count, and the original count being restored on Row 3.

**Yarn:** Laceweight to bulky

**Multiple:** 2 sts

A series of seed stitches in a 3-3-2-2-1-1 formation gives an interesting, rhythmical pattern. A little concentration is required to maintain the progression of the stitches.

**Yarn:** Cobweb to super bulky

**Multiple:** 2 sts

**Row 1 (RS):** \*P1, k1; rep from \* to end.

**Rows 2 & 3:** Repeat Row 1.

**Row 12:** Repeat Row 4.

**Repeat:** Rows 1–12

118

## Slipped Diagonal Basketweave

This pattern forms a firm, dense fabric that would make great outerwear or soft furnishings. The extensive use of twisted stitches makes it draw in and it is also quite slow to work. For a softer, more draping fabric, choose needles a couple of sizes larger than the recommended size for the yarn.

**Yarn:** Fingering to bulky

**Multiple:** 2 sts + 3

**Row 1 (RS):** Sl1 wyib, sl1 wyif, \*1/1 LT; rep from \* to last st, k1.

119

## Broken Seed Stitch

A variant on the standard seed stitch, this pattern has an interesting, nubby texture, particularly attractive on chunkier knits. This stitch produces a flat, firm fabric with little or no curl at the edges.

**Yarn:** Cobweb to super bulky

**Multiple:** 2 sts

**Row 1 (RS):** \*K1, p1; rep from \* to end.

**Row 2:** \*K1, p1; rep from \* to end.

**Row 5:** \*K1, p1; rep from \* to end.

**Row 6:** \*P1, k1; rep from \* to end.

**Repeat:** Rows 1–6

120

## Bee Stitch

This two-color slip stitch looks complex, but it's actually very easy to work. Surprisingly it only involves knit and knit in the row below stitches, and it is the knit in the row below that lifts the color from one row into another, to create the fascinating effect that requires no color changing within the row. At color changes, carry the yarn up the side of the work.

**Yarn:** Fingering to bulky

**Multiple:** 2 sts + 3

Cast on in color A.

**Row 1 (RS):** In color A, knit.

**Row 2:** Knit.

121

## Jumping Jacks

This pattern is big and bold and looks great as an all-over pattern. For best results practice the ten-stitch wrap to make sure the gauge remains even. Once blocked this pattern will stand out from the crowd.

**Yarn:** Light fingering to worsted

**Multiple:** 16 sts + 14

122

## Grapevine

This delightful stitch incorporates yarn overs, bobbles, increases, and decreases. It looks complex to work but once the pattern has been established it is very rhythmical to follow. Worked as a single panel or as an all-over pattern, it will look lovely in a wide range of yarns. If you are using a heavier weight yarn, it may be more effective if the needle size is one or two sizes larger than the normal size for the yarn.

**Yarn:** Cobweb to worsted

**Multiple:** 13 sts + 10

**Row 1 (RS):** Purl.

**Row 2:** Knit.

## Simple Open Mesh

A straightforward four-row repeat produces this very open, fluid fabric with lots of drape. It does spread, so swatch carefully as you may need fewer stitches than you think.

**Yarn:** Laceweight to bulky

## Little Tent Stitch

A lovely neat pattern that could be used as an unusual rib or as part of a panel. The lifted strand stitch is easy to work provided the slipped stitches aren't pulled too tight.

**Yarn:** Laceweight to bulky

**Multiple:** 8 sts + 1

**Row 1 (WS):** K1, \*k1, p5, k2; rep from \* to end.

125

## Knot Mesh

A softly springy stitch pattern with lots of stretch and texture. This pattern does spread so swatch carefully for finished size. Working into the yarn overs can take a little practice; however, the pattern only has two rows and a short repeat so is quick to master.

**Yarn:** Fingering to bulky

**Multiple:** 1 st

**Row 1 (RS):** \*[Yo] twice, k1; rep from \* to end.

**Row 2:** [K1, (k1, p1) in yo, pass 2 knit sts over: to end.

**over:** Knit first stitch as normal. Knit first stitch as normal.

Then, knit into the first yo and purl into the second (the yo from the previous row) to give 2 sts. Pass both the first knit st, and the st knitted in the yo, over the purled st.

**Note:** This pattern has a multiple of 1 st but the repeat shows 2 sts, as the yarn overs form part of the repeat but are not cast on.

126

## Nupps and Dimples

A richly textured pattern combining slipped stitch dimples interspersed with gathered nupps. Note that the strands from the slipped stitches should be taken across the right side of the work before being lifted. This is a lovely pattern for an all-over fabric. With heavier yarns it may be necessary to go up a needle size or two larger than normal for the yarn.

**Yarn:** Fingering to bulky

**Multiple:** 6 sts + 5

**Row 1 (RS):** Knit.

**Lst:** Lift strand/s. Insert needle under loose strand and knit next st, lifting st in front of strand. As the stitch is completed lift the strands over the st.

127

## Garter Lace Cubes

This striking stitch makes a lovely all-over pattern. Simple stockinette stitch and garter stitch blocks are bounded by lace, opening the fabric and highlighting the strong shapes. Careful blocking will bring out the best in this fabric, and working with a smooth yarn will show it to its best advantage.

**Yarn:** Cobweb to worsted

## Cartridge Belt Rib

This is a strongly textured, deep rib. Slipped stitches give added fluidity and drape, making it suitable for the body of a fabric as well as for a standard ribbed edging.

**Yarn:** Laceweight to bulky

**Multiple:** 4 sts + 3

**Row 1 (RS):** K3, \*sl1 wyif, k3; rep from \* to end.

## Lacy Twist Blocks

Simple but effective, the clever combination of yarn overs and decreases in this pattern give the appearance of a cable without twists or cable needles. It is soft enough for an all-over pattern and suitable for a wide range of yarns.

**Yarn:** Laceweight to bulky

**Multiple:** 6 sts + 2

**Row 1 (RS):** P1, \*k3, p3; rep from \* to last st, p1.

130

## Stockinette Lacy Smocking

Stockinette blocks are linked together with cluster stitches to create a lacy, smocked effect. The lacy eyelets make the fabric lighter and softer, and it would be possible to use this as an all-over pattern in a lacy top or vest. It could also be used as an interesting large rib.

**Yarn:** Laceweight to worsted

**Multiple:** 6 sts + 2

**Row 1 (RS):** K1, \*k1, p1, k4; rep from \* to last st, k1.

**Row 2:** P1, \*p2togtbl, yo, p2, k1, p1; rep from \* to last st, p1.

131

## Stockinette Smocking

This is a delicate pattern that makes a lovely addition to a simple stockinette fabric. The clusters can be pulled in just a little, as here, or more firmly for a textured look. This pattern will work well in a wide range of yarn types and weights.

**Yarn:** Light fingering to bulky

**Multiple:** 6 sts + 2

**Row 1 (RS):** Knit.

**Row 2 and all WS rows:** Purl.

**Row 3:** K1, \*k3, CL3; rep from \* to last, k1.

132

## Open Star Stitch

Deep, soft texture with strong diagonal lines characterize this pattern stitch. With only four rows and a simple three-stitch pattern, it is relatively quick to knit and unusually the diagonals do not create a particular bias in the fabric.

**Yarn:** Laceweight to bulky

**Multiple:** 3 sts + 3

**Row 1 (WS):** K2, \*yo, k3p; rep from \* to last st, k1.

**Row 2:** Knit.

**Row 3:** K1, \*k3p, yo; rep from \* to last 2 sts, k2.

**Row 4:** Knit.

**Repeat:** Rows 1–4

## Abbreviation

**K3p:** K3, pass first st over second and third sts and drop off needle.

133

## Dimple Stitch

This pattern with its deep, soft texture will work best with a smooth yarn. Keep the strands from the slipped stitches as even as possible for a neat result. Note that the slipped stitches are stranded across the front of the work. This pattern would make a lovely jacket as it has plenty of texture without being heavy. In a bulky yarn it would also make interesting soft furnishings.

**Yarn:** Laceweight to bulky

**Multiple:** 6 sts + 7

**Row 1 (WS):** Purl.

**Row 2:** K2, \*[sl1 wyif] three times, k3; rep from \* to last 5 sts, [sl1 wyif] three times, k2.

**Row 11:** Purl.

**Row 12:** K2, \*k4, Lst, k1; rep from \* to last 5 sts, k5.

**Repeat:** Rows 1–12

## Abbreviation

**Lst:** Lift strand/s. Insert needle under loose strand and knit next st, lifting st in front of strand. As the stitch is completed lift the strands over the st.

134

## Shower Stitch

A combination of rich textures and eyelets make this a very dramatic pattern when blocked. The lacy eyelets reduce the density of the fabric, making it less heavy and adding some fluidity, while still retaining the depth of texturing. If you are working in a heavier yarn, a larger than normal needle may be used to give the fabric a softer feel.

**Yarn:** Laceweight to worsted

**Multiple:** 12 sts + 4

**Row 1 (RS):** K2, \*k2tog, yo, k2, k2tog, [yo] twice, ssk, k2, yo, ssk; rep from \* to last 2 sts, k2.

**Row 2:** P2, \*p3, p2togtbl, yo, kpyo, yo, p2tog, p3; rep from \* to last 2 sts, p2.

**Row 8:** P2, \*p2, yo, p1, yo, p3tog, p3togtbl, yo, p1, yo, p2; rep from \* to last 2 sts, p2.

**Repeat:** Rows 1–8

## Abbreviations

**Ssk:** Slip, slip, knit. Slip 2 sts one at a time as if to knit, knit 2 slipped sts together.

**Kpyo:** Knit into first yo, then purl into second yo.

**Notes:** To work p3tog in this stitch, first purl next 2 sts together, slip st back onto LH needle. Lift second st on LH needle over first, and slip remaining st onto RH needle.

The yos between repeats in Row 5 effectively form a double yo (as in Row 1). When working Row 6, the p1 at start of repeat and k1 at end of repeat are worked into the double yo (as in Row 1).

## Rippled Pillar Stitch

A very open, fluid fabric that can bias, so it needs careful blocking. This pattern would look interesting with bands of stockinette or garter stitch between the repeats, or even as part of a cable panel.

**Yarn:** Light fingering to bulky

**Multiple:** 3 sts + 4

**Row 1 (RS):** Purl.

**Row 2:** P2, \*yo, [sl1 purlwise, k2, pss0]; rep from \* to last st, p2.

**Repeat:** Rows 1–2. End with Row 1.

136

## Lifted Ladder Rib

Dropping any stitch always feels a little scary but it's worth it for this interestingly textured fabric. It is soft but lofty, and so nice and warm. It could be worked as an all-over fabric, or one or two repeats could be used as a band or trim.

**Yarn:** Laceweight to bulky

**Multiple:** 3 sts + 2

**Row 1 (WS):** K2, \*p1, k2; rep from \* to end.

**Row 2:** \*P2, k1; rep from \* to last 2 sts, p2.

**Rows 3 & 4:** Repeat Rows 1 & 2.

**Row 5:** Repeat Row 1.

**Row 6:** \*P2, d4; rep from \* to last 2 sts, p2.

**Repeat:** Rows 1–6

## Abbreviation

**D4:** Drop down 4 rows. Allow next st (a knit) to drop off the LH needle, and unravel it for 4 rows, so that there are 4 "ladder rungs" above it. Put LH needle into that st from front to back, and knit through that st. After you complete the st, you'll see that all of the "ladder rungs" are also caught up in the st, creating the lifted appearance.

137

## Lacy Diagonal Brioche

Diagonal brioche creates a delightful, open yet neatly structured and stable fabric. It is soft and fluid but retains its shape well. It can be worked in a wide range of yarn weights—smooth yarns will bring out the lacy texture best, but it could also be used with a textured yarn for a more subtly lacy effect.

**Yarn:** Light fingering to worsted

**Multiple:** 3 sts + 3

**Row 1 (WS):** P2, \*sl1 wyib, yo, p1; rep from \* to last st, p1.

**Row 2:** Sl1 wyib, p1, \*sl1 wyib, p2; rep from \* to last st, p1.

**Row 3:** P1, sl1 wyib, yo, \*p2tog, sl1 wyib, yo; rep from \* to last st, p1.

**Row 5:** Sl1 wyib, p2tog, \*sl1 wyib, yo, p2tog; rep from \* to last st, p1.

**Repeat:** Rows 2–5

138

## Pyramid Clusters

Groupings of cluster stitches make this a lovely, stylish motif, set on a background of stockinette stitch. The pattern could be readily adapted and single motifs combined or rearranged to create many interesting variations.

**Yarn:** Laceweight to bulky

**Multiple:** 28 sts + 2

**Row 1 (RS):** K1, \*k1, [CL2] six times, k7, CL2, k6; rep from \* to last st, k1.

**Row 2 and all WS rows:** Purl.

**Row 12: Purl.**

**Repeat:** Rows 1–12

## Abbreviation

**CL2:** Cluster 2 stitches, twice wrapped. Slip 2 sts wyib, bring yarn to front between needles, slip same 2 sts back to LH needle, pass yarn to back between needles, slip same 2 sts wyib again, bring yarn to front between needles, slip same 2 sts back to LH needle, k2 slipped sts.

139

## Vertical Drop Stitch

This pattern is big and bold, but the dropped stitches give it a light, open texture, making it look great as an all-over pattern. For best results, practice the dropped stitch technique to make sure you are happy with controlling the stitches. Once blocked this pattern reveals its true beauty.

**Yarn:** Light fingering to bulky

**Multiple:** 9 sts + 2

**Note:** Cast on a multiple of 8 sts + 2 to allow for increased sts in Row 1.

**Row 1 (RS):** P1, \*p1, k1, yo, k1, p2, k2, p1; rep from \* to last st, p1.

**Row 2:** K1, \*k1, p2, k2, p3, k1; rep from \* to last st, k1.

**Row 13:** P1, \*p1, k1, yo, k1, p2, k1, d6, k1, p1; rep from \* to last st, p1.

**Repeat:** Rows 2–13

## Abbreviation

**D6:** Drop down 6 rows. Allow next st (a knit) to drop off the LH needle, and unravel it for 6 rows, so that there are 6 "ladder rungs" above it. Put LH needle into that st from front to back, and knit through that st. After you complete the st, you'll see that all of the "ladder rungs" are also caught up in the st, creating the lifted appearance.

140

## Bamboo Stitch

A fun variation on a basic 4 x 4 rib, created by wrapping the yarn around the purled sections of the rib. The wraps are worked quite loosely here, but for a different effect, experiment with tighter wraps to accentuate the texture and create a more pleated fabric.

**Yarn:** Fingering to bulky

**Multiple:** 8 sts + 4

**Row 1 (RS):** \*K4, w4; rep from \* to last 4 sts, k4.

**Row 2:** P4, \*k4, p4; rep from \* to end.

**Row 3:** \*K4, p4; rep from \* to last 4 sts, k4.

**Row 4:** Repeat Row 2.

**Repeat:** Rows 1–4

## Abbreviation

**W4:** Wrap 4 stitches. Slip 4 sts to cable needle, wind yarn clockwise around these sts four times, slip sts to RH needle.

141

## Short Drop Stitch

Elongated stitches are an interesting way to add bold, open textures. They create light fabrics and look particularly interesting worked in textured yarns. It is also fun to experiment with combinations of plain yarn for the garter stitch sections and textured yarn for the elongated stitches. Block elongated stitch patterns carefully to ensure an even finish.

**Yarn:** Light fingering to worsted

**Multiple:** 1 st + 2

**Row 1 (RS):** Knit.

**Rows 2–4:** Knit.

**Row 5:** K1, \*k1 elongated twice; rep from \* to last st, k1.

**Row 6:** Knit.

**Repeat:** Rows 1–6

## Abbreviation

**K1 elongated twice:** Knit a st wrapping yarn around needle three times. On next row drop the extra wraps from needle.

142

## Long Drop Stitch

Elongated stitches do have limits but in a thicker yarn it is possible to wrap the needle as many as six times and still retain the stitch structure and a useable fabric—as demonstrated in this pattern. Elongated stitch patterns look lovely in lightweight summer wear or decorative scarves.

**Yarn:** Fingering to bulky

**Multiple:** 1 st + 2

**Row 1 (RS):** Knit.

**Rows 2–4:** Knit.

**Row 5:** K1, \*k1 elongated five times; rep from \* to last st, k1.

**Row 6:** Knit.

**Repeat:** Rows 1–6

## Abbreviation

**K1 elongated five times:** Knit a st wrapping yarn around needle six times.

On next row drop the extra wraps from needle.

143

## Rungs of the Ladder

Slipped stitches create the "rungs" bound by blocks of reverse stockinette stitch. Separating these with bands of stockinette creates a fabric that is both interesting and stylish. If you are not familiar with slipped stitches, it is worth practicing first as the strands need to be evenly tensioned for the best results.

**Yarn:** Fingering to bulky

**Multiple:** 10 sts + 2

**Row 1 (RS):** Knit.

**Row 2:** Purl.

**Rows 3 & 4:** Repeat Rows 1 & 2.

**Rows 18 & 19:** Repeat Rows 16 & 17.

**Row 20:** Repeat Row 16.

**Repeat:** Rows 1–20

144

## Ladder Rib

It's always nice to have a selection of interesting ribs to play with when designing as they add a touch of something different even on an otherwise simple garment. This ladder rib uses slipped stitches to create the "rungs." If you are new to slipped stitches, practice a little first, as the strands need to be evenly tensioned for best results.

**Yarn:** Light fingering to bulky

**Multiple:** 4 sts + 2

**Row 1 (WS):** K2, \*p2, k2; rep from \* to end.

**Row 2:** \*P2, [sl1 wyif] twice; rep from \* to last 2 sts, p2.

**Repeat:** Rows 1–2

145

## Zigzag Swag Stitch

Slipped stitches give this zigzag pattern real impact, while keeping it simple. Keeping the slipped strands even is important, but otherwise it is a quick, fun pattern that makes a great all-over fabric. To emphasize the strands, a smooth yarn will work best, but try it in different weight yarns for interesting effects.

**Yarn:** Light fingering to bulky

**Multiple:** 5 sts + 2

**Row 1 (WS) and all WS rows:** K1, purl to last st, k1.

**Row 12:** Repeat Row 8.

**Row 14:** Repeat Row 6.

**Row 16:** Repeat Row 4.

**Repeat:** Rows 1–16

146

## Dropped Garter Diamonds

This densely textured pattern would make an interesting border or, for the more ambitious knitter, a stunning all-over pattern. The garter ridges emphasize the gathers and increases. Worked in a light yarn it will produce a delicate fabric; if worked in a heavier yarn it may be necessary to go up a couple of needle sizes to achieve the desired softness in the fabric.

**Yarn:** Fingering to bulky

**Multiple:** 6 sts + 9

**Row 1 (RS):** Knit.

**Row 2:** Knit.

**Row 3:** K1, m3, [k1 elongated] twice, \*[k1 elongated] three times, inc1to 5, [k1 elongated] twice; rep from \* to last 5 sts, [k1 elongated] three times, m3, k1.

**Yarn:** Laceweight to bulky

**Multiple:** 4 sts + 6

**Row 1 (WS):** P1, [p1 elongated twice] to last st, p1.

154

## Offset Clusters

This stylish clustered panel is called offset because on the reverse are two-stitch clusters that sit between the larger four-stitch clusters on the front. These draw out the stockinette sections gently while the four-stitch clusters draw in the top and bottom of each section. This creates the hourglass shapes without significantly distorting the fabric.

**Yarn:** Light fingering to bulky

**Multiple:** 6 sts + 8

## **Slip Stitches**

155

## Heel Stitch

This simple two-row pattern produces a deep rib. The use of slipped stitches gives it a particularly springy texture, which is why it is often used for sock heels.

**Row 1 (WS):** Purl.

**Row 2:** K1, \*sl1 wyib, k1; rep from \* to end.

## Flickering Flames

This richly textured pattern uses wraps to create elongated "flames" around lacy eyelets. The chart appears lengthy as it is worked with larger panels of offset flame clusters, but each cluster can be worked individually over nine stitches and five rows.

## Reverse Wrapped Rib Stitch

This very simple four-row pattern repeat is a series of three syncopated rib rows interspersed with just one wrap row. It creates an interesting pattern that is quite different but equally attractive on both sides. As it has good stretch, it could be used as an alternative welt, cuff, or neckline.

## Garter Brick Stitch

Short blocks of garter stitch are offset and broken up with slip stitch uprights and stockinette "mortar," to create a balanced, springy fabric that is ideal for an all-over pattern and great for soft furnishings when worked in a bulky yarn on smaller needles.

## Mountain Peaks

By working a simple lifted strand slip stitch and offsetting the pattern repeat, you can create this interesting mountain landscape. Note that the pattern begins with four set-up rows that are worked only at the beginning and end of the piece. This balances the pattern.

## Wicker Fence

A plump, textured fabric, created by combining slipped stitches. The slipped stitches shorten and pull the fabric up vertically to give the impression of a woven basket. With thicker yarns or for a different effect, add extra rows between the repeats.

## Woven Stitch

This simple wrapped stitch pattern can be used to great effect as an all-over fabric. Alternatively, it makes a good filling stitch for a cable or panel where something a little different to the more usual stockinette or reverse stockinette is required. The reverse of this stitch pattern is equally attractive.

## Reverse Stockinette and Seed Stitch Slipped Blocks

Blocks of reverse stockinette and seed stitch are divided with slip stitch chains to produce a richly textured pattern that retains good suppleness. Three blocks worked as a centerpiece for a sweater, or down a sleeve, would give a dramatic impact.

## Wicker Basket Lattice

A delicate but distinctive lattice, this stitch is created by overlaying slipped stitches on a stockinette background, slipping the strands behind a vertical row of slipped stitches. A little care is required when gauging the slipped strands to make sure the fabric doesn't pucker.

**Yarn:** Fingering to bulky

## Small Quilted Lattice

Delicate lattices meander across the fabric with this delightful pattern. The design offers enough drape and elasticity to be used as an all-over pattern, or it could be readily incorporated as a panel or combined with other stitches in a cable or similar pattern.

## Right Cross Stitch

A versatile stitch that can be worked in a wide range of yarns. For an open texture, use larger needles than normal; for a more dense texture, use smaller than normal needles. This stitch is also attractive on the reverse so it is useful for scarves and similar projects where both sides will be visible.

**Yarn:** Fingering to bulky

**Multiple:** 4 sts + 2

**Row 1 (WS):** P1, \*w2p; rep from \* to last st, p1.

**Row 2:** K1, \*R4C; rep from \* to last st, k1.

**Repeat:** Rows 1–2

## Abbreviations

**R4C:** Right 4 cross. Slip 4 sts purlwise, allowing loops to drop. Return sts to LH needle. Lift sts 3 and 4 over sts 1 and 2, bringing to front of LH needle. K4 (knitting sts 3 and 4 first).

172

## Offset Left Cross Stitch

A variant on the standard cross stitch, this stitch creates a mesh rather than a ribbed-looking fabric. For an open texture, use larger needles than normal; for a more dense texture, use smaller than normal needles. The reverse of this stitch is equally attractive so it is great for projects where both sides will be visible.

**Yarn:** Fingering to bulky

**Multiple:** 4 sts + 6

**Row 1 (WS):** P1, \*w2p; rep from \* to last st, p1.

173

## Alternating Cross Stitch

It can take a little practice to perfect the cross stitches for this pattern. Once mastered, however, it creates a lovely honeycomb with alternating left and right crosses worked over just four rows in a simple diamond formation. Consider using the reverse, too, which has great texture.

**Yarn:** Fingering to bulky

**Multiple:** 8 sts + 4

**L4C:** Left 4 cross. Slip 4 sts wyib, dropping extra wraps. Insert LH needle into sts 1 and 2 and pass over sts 3 and 4 onto LH needle. Slip sts 3 and 4 onto LH needle. K4 (knitting sts 3 and 4 first).

174

## Crossed Seed Slip Stitch

Slip stitch "X"s are filled with seed stitch for an interesting variation on a more familiar slip stitch cross stitch. Swap the seed stitch for plain stockinette to give a completely different look. This is an interesting motif worked as a single, long panel or as an all-over pattern.

## Stockinette Chevron

## Feather and Fan

No one will believe that this richly detailed pattern is just a two-row pattern repeat with simple yarn overs and decreases. The interesting points make a great edging or hem and, as the repeat is short, it can be readily worked at the bottom of a sweater or sleeve or as a decorative trim.

**Yarn:** Laceweight to bulky

## Ridged Feather and Fan

Feather and fan patterns have many variations, and this one is based on garter stitch interspersed with shaping rows. As with many feather and fan stitches, it has a lovely scalloped lower edge that makes it very pretty as a trim or edging.

**Yarn:** Laceweight to worsted

**Multiple:** 14 sts

## Waves at Sea

A more advanced stitch to work initially, once mastered the pattern is quite straightforward to follow. Yarn overs create ripples similar to those in a rippled chevron. Using elongated stitches creates interesting textured wave shapes. A smooth, medium-weight yarn would be ideal for this pattern.

## Garter Old Shale

Rich texturing is achieved on this pattern by inserting rows of simple garter stitch at regular intervals. The paired increases and decreases create a softly rippled edge, ideal for trims, hems, and decorative edges. With a four-row repeat and just one pattern row, this is a design that is simple to master.

**Yarn:** Fingering to bulky

**Multiple:** 18 sts

**Row 1 (RS):** Knit.

**Row 2:** Knit.

## Lacy Garter Ripple

Dainty little garter stitch fans are formed by creating yarn overs and central decreases in a chevron pattern. The gentle curves occur due to the supple nature of garter stitch spreading to accommodate the shaping. This stitch looks super in a wide range of yarns and a smooth yarn is particularly effective in bringing out the curving shapes and textures.

## Waves and Pebbles

A subtly textured pattern that looks great as an all-over design. Alternatively, a pair of repeats on either side of a panel or along a sleeve would look very striking. To get the most out of the textural qualities, choose a smooth yarn.

## Ripple Chevron

Blocks of stockinette and garter stitch add an interesting twist to this classic chevron pattern, without adding to the difficulty. This stitch benefits from a yarn with good stitch definition to make the most of the textures in the design.

## Vertical Ripple

The yarn over row in this pattern creates a ripple in the fabric that is then reduced with decreases in later rows (meaning that not all rows have the same number of stitches). It creates a lovely, richly textured fabric that can be used as an accent feature or an all-over pattern.

**Yarn:** Laceweight to bulky

## Seed Stitch Zigzag

A straightforward yet striking pattern using just knit and purl stitches, this is ideal as an all-over fabric in a yarn with good stitch definition. Alternatively, it would work well as a panel in a larger design or even as a single panel down a sleeve.

## Traveling Garter Blocks

This pattern has a long repeat but is actually simple to follow and, once you've established the set of the rows, it progresses quickly. As the repeat is quite large it looks best as an all-over pattern, and is particularly striking in a bulky yarn with good stitch definition.

**Yarn:** Light fingering to bulky

**Multiple:** 16 sts

**Row 1 (RS):** \*K5, p11; rep from \* to end.

## Crashing Waves

Seaspray eyelets and small bobble splashes make a dramatic stitch with lots of activity and movement. Worked across a wide repeat, particularly good for a long border, this stitch is lively and vibrant. A yarn such as angora or mohair blend, particularly a tonal yarn, will soften the effect but give a lovely feeling of the misty haze of crashing waves.

193

## Seafoam

This pattern is like magic—when it comes off the needles it looks like a wrinkled mass of threads; after a bit of blocking, see the amazing foaming waves emerge. It does take a little while to get used to the extra wraps but they follow a rhythmical pattern so once you’ve done a couple you’ll find them straightforward. Blocking significantly increases the size so block carefully when swatching before measuring.

194

## Teepees

This simple pattern packs in plenty of texture using just simple knit and purl stitches. It could be readily worked as a band, all-over pattern, or as a motif set in a background of reverse stockinette stitch for downward “V”s. A background of stockinette stitch will highlight the upward “V”s.

## Herringbone Leaf

This stitch is more complex, with lots going on in each row. The result, however, is worth the effort. A strong central line of stockinette stitch is flanked by leaf “veins” to create detailed texture and a striking pattern. A smooth yarn with good stitch definition will show off this stitch to best effect.

## Two-Color Half Brioche Rib

Half brioche, like its counterpart brioche stitch, takes a little practice but once mastered makes a bouncy, springy fabric that is warm but light and a delight to wear. As the fabric is quite dense, it is best worked in a medium-weight yarn. Working in pairs of colors but with just one color per row, half brioche rib creates this very attractive checkerboard rib.

## Yin Yang

A simple mosaic slip stitch pattern that would work as a band or as a single motif. Slip stitch patterns are worked with just one color per row but they are stranded, so if you are new to this technique then practice first, as the strands need to be even to get the best results. If the swatch looks untidy, block and dry it first as you will be surprised how much the work evens out.

**Mosaic/slip stitch colorwork** Mosaic (also referred to as slip stitch) colorwork is a fascinating technique that produces intricate patterns without having to use more than one color per row. The colorwork patterns are achieved by working in pairs of colors: two rows of A, two rows of B, and so on. The second color is incorporated into the row by slipping a stitch worked in the opposite color from the row below.

Mosaic pattern charts are easy to follow with a little practice. The color to be worked is indicated by the first square on the chart. The entire row is then worked in that color, slipping the stitches where the second color is shown. On the right side, the working yarn is slipped in back; on the wrong

side, the working yarn is slipped in front. Once the first row of the pair has been worked, the second row simply follows the first, purling the worked stitches and slipping the slipped stitches with yarn in front.

## Greek Key Fretwork

This design is based on the Greek key pattern, so called because the design looks a little like a key. This sample uses just stockinette and slip stitches to create a stepped effect. As only one color is used per row, this technique is a simple way to create a really impressive two-color pattern.

## Two-Color Garter Steps

## Two-Color Diagonal Dropped Stitch

The interesting shapes in this straightforward pattern are created by lifting up a strand in the opposite color from the row below. It gives a firm fabric that would make an attractive all-over pattern.

Additional colors could also be added, or perhaps a plain yarn could be used with a variegated contrast yarn.

## Woven Band

A striking mosaic pattern that could be worked as a band or as an all-over design. For best results, mosaic patterns benefit from a medium-weight yarn that plumps up when blocked. This nicely evens out the stitches and gives a smooth finish. Mosaic patterns are particularly effective when worked in a plain and contrasting variegated yarn.

## Cloisters

This attractive slip stitch colorwork pattern is produced by working pairs of rows in alternating colors. As only one color is used per row it is possible to produce intricate, detailed patterns without the complexity of Fair Isle techniques. A medium-weight yarn is best for this technique, ideally one that plumps up when blocked and finished, as this evens out the stitches.

## Drop Stitch Quilting

Shown here worked in two colors, this pattern works equally well worked in a single color. Clustered stitches emphasize the intersections of the quilting pattern and elongated stitches are stretched up the work to create the surface diamonds. Take care with the pattern repeats as the final two rows must be worked differently to ensure that the final elongated stitches are properly anchored in place.

## Block Check

Mosaic colorwork produces beautiful patterns but only requires the knitter to work with one color per row. The second color is brought into the row by slipping the stitch from the previous row. As with illusion knitting, the colors are worked in paired stripes and the two yarns can be carried easily up the side of the work, reducing the number of ends to weave in later. This pattern produces an interesting check, ideally suited to an all-over pattern.

## Striped Half Brioche

This variation on a traditional ribbed brioche offsets the rib every six rows and coincides this with a color change to give deep stripes with a slightly stepped effect. As with all brioche stitches, the fabric is plump and bouncy, and lovely as an all-over fabric or for a particularly stretchy, thick rib. As this is a half brioche it is worked on straight needles (not backward and forward on double-pointed needles as a full brioche). Choose a medium-weight yarn for best effect.

## Illusion Knit Heart Motif

Illusion knitting relies on a clever (but deceptively simple) interplay between knit and purl stitches, and stripes knitted in two-row pairs (sometimes with the first row worked as a single color). There are no color changes within rows so it's an easy way to achieve a great colorwork pattern. If you can't see the effect immediately, tilt the work and wait for the magic to appear.

This fascinating illusion knitting pattern has a surprise in store. Tilt the fabric and view it from different angles and it will reveal its secret. It can be worked in a wide range of yarns and would make a great tote, or perhaps work in a bulky yarn for a rug or throw. Watch people's faces when they see the pattern magically appear.

## Jacob's Ladder

A garter stitch base with offset slip stitches creates a richly textured, striking stitch. Choose two plain colors, as here, or combine a plain color with a variegated one for a very different look. Smooth yarns in a light to medium weight are ideal for this springy, plump fabric.

## Houndstooth Check

The beauty of slip stitch colorwork is that it allows you to create fabrics that look like complex Fair Isle but using only one color per row. This makes for a quick knit and stunning effects—an ideal combination! Slip stitch worked on stockinette stitch, as here, needs to be carefully blocked to achieve a smooth surface.

## Llamas

Mosaic knitting is a fun technique for motif knitting that avoids intarsia or the complexities of Fair Isle stranding. This cute pair of llamas is easy to work and would make a great pattern on a garment as a motif, as a band, or around a neckline. It would also make a great tote or pillow.

This large mosaic colorwork pattern is worked entirely in stockinette with slipped stitches, which lift the stitches in one color up into the row of stitches in the opposite color. ## Mini Chevrons

This pattern combines mosaic knitting with garter stitch to give an interesting blend of color, shape, and texture. It's a simple pattern with just one color per row (worked in pairs: two rows of color A, two rows of color B, and so on), making it easy to carry the color that is not in use up the side of the work, and reducing weaving in ends.

**Yarn:** Fingering to worsted

**Multiple:** 33 sts + 2

Cast on in color A.

**Row 1 (RS):** In color A, knit.

**Row 2:** Knit.

## Persian Rug

This is a more challenging pattern, but not because of the complexity of the stitches—there are just a lot of rows and it takes a little concentration to follow! Why not use a sticky note to underline the row you are working on. Like all mosaic colorwork, the pattern is worked in one color per row and the color changes are achieved by slipping stitches to lift up the second color from the row below.

**Yarn:** Fingering to worsted

**Multiple:** 24 sts + 13

## **Cable Stitches**

225

## Single 4-Stitch Cable

Work this easy single cable as a striking panel down a sleeve or the front of a garment. By using the left and right twist it can be mirrored to create a balanced panel. Try placing additional plain rows between the cable rows to produce a more elongated, soft cable. Here the cable is demonstrated on a background of reverse stockinette stitch.

226

## Single 6-Stitch Cable

Here shown on a background of reverse stockinette stitch, this simple, mid-width cable is strong enough to be a statement piece but could also be incorporated with other stitches to create a larger panel. This cable looks great in a wide range of yarns from fingering to bulky.

227

## Single 8-Stitch Cable

This broad, bold cable is simple to work but looks great. Worked here with nine rows between each cable row, it has a relaxed, flowing feel that retains the softness of the fabric. For a more dense look, reduce the number of plain rows but keep in mind that this will affect drape.

**Yarn:** Fingering to bulky

228

## Braided 9-Stitch Cable

Offsetting the cable rows creates the attractive braided effect seen in this swatch. Setting the cable panel on a background of reverse stockinette stitch gives it impact, but it is still delicate enough to be worked in a wide range of yarns from sport to bulky.

**Yarn:** Sport to bulky

229

## Double and Inverted Double Cable

This rich cable is worked over twelve stitches but uses just two simple cable stitches. A reverse stockinette background enhances the textural qualities. Reversing the stitches inverts the cable to give a completely different look. Reduce the plain rows between the cable rows for a much denser fabric.

**Yarn:** Sport to bulky

**Double Cable**

230

## 10-Stitch Corded Cable

Based around a simple four-stitch cable, with wraps above and below the cable rows and two offset sets of cables, this panel is soft enough to use as an all-over pattern or as a smaller insertion panel in a larger design. For a different, much denser fabric, draw up the wraps more tightly.

**Yarn:** Fingering to bulky

231

## Honeycomb Cable

This richly textured fabric is not as complex as it appears. It is essentially a series of narrow cable panels repeated across the row without background stitches between the repeats. This fabric can be heavy when worked over a large area.

**Yarn:** Sport to bulky

**Multiple:** 8 sts + 8

**Row 1 (RS):** P4, knit to last 4 sts, p4.

**Row 2 and all WS rows:** K4, purl to last 4 sts, k4.

232

## 6-Stitch Wiggle Cable

Two versions of this easy cable pattern are produced by varying the number of plain rows between the cable rows. By working the twist in alternating directions one cable appears to snake over the top of the other, creating a deep texturing.

**Yarn:** Fingering to bulky

## Chevron Rib Cable

This detailed and more complex cable incorporates ribbed “V”-shaped cables with garter stitch ladders running through the center. Dramatic when worked alone as a single panel, it is also a great centerpiece to combine with other cables or stitches for a wider pattern.

**Yarn:** Sport to bulky

**Panel:** 19 sts

234

## Ocean Waves

The deep texturing and intricate shapes in this cable are actually surprisingly easy to make, with just two cable rows and one cable type per pattern repeat. Ideally suited to a bold, all-over pattern, it is also great for bulkier yarns.

**Yarn:** Fingering to worsted

**Panel:** 15 sts

**Row 1 (RS):** K15.

**Row 2:** P15.

**Rows 3 & 4:** Repeat Rows 1 & 2.

235

## Ridged Cable

With only two cable rows and a nine-row pattern repeat, this is an interesting but quite straightforward cable. For a less dense fabric, additional stockinette stitch rows could be introduced between Rows 4 and 7.

**Yarn:** Fingering to worsted

**Multiple:** 8 sts + 6

**Row 1 (RS):** P3, knit to last 3 sts, p3.

**Row 2:** Knit.

236

## Seed Stitch Cable

A great statement cable, worked as a single panel or as part of a larger piece. Lots of texture and interest make it seem more complex than it is, but there are actually only two straightforward cable rows per repeat.

**Yarn:** Fingering to worsted

**Panel:** 8 sts

**Row 1 (RS):** [P1, k1] twice, k4.

**Row 2:** P4, [k1, p1] twice.

**4/4 RC Seed over St st cable:** Slip 4 sts to cable needle and hold in back, [p1, k1] twice, then k4 from cable needle.

## Chutes and Ladders

Two-stitch cable “chutes” surround garter stitch ladders to create a dense, detailed cable pattern. This pattern requires a little additional attention as there are several different cables being worked at once, but is quite manageable.

**Yarn:** Fingering to worsted

**Multiple:** 12 sts + 2

**Row 1 (RS):** Knit.

**Row 2:** P2, \*p4, k2, p6; rep from \* to end.

## Filled Chain Cable

This pattern looks complex, but it is simply two identical panels with one worked offset. To work as a single panel, splitting at stitch 17 produces a filled cable with a single cable band at either side. Work just stitches 5–13 for a single filled cable.

## Rib-Eye Cable

This deeply textured cable with bold lines is in fact a simple construction with just two basic six-stitch cables. Setting it against a background of reverse stockinette stitch, as in this swatch, makes the rich texturing all the more dramatic.

## Chain and Rope Cable

Chains of medallions are linked by a simple three-stitch rope cable. For a different, more open look, the rope element can be extended between the medallions. Placing repeats adjacent to each other will produce a dense, honeycomb effect.

## Knotted Cable

Shown here on a background of reverse stockinette stitch, the knot in this extended cable is worked as a six-stitch twist, with three pairs of two stitches. With nine intervening plain rows, the cable is lean and straight, making it a good choice for an edging or border. Vary the shape by adjusting the number of plain rows that divide the twists.

## Acrobats Cable

There are lots of possibilities for fun combinations with these easy cable and bobble motifs. Stacking the “X”s and “O”s produces a pattern rather like a pyramid of acrobats. An entirely different look can be achieved with rows of “X”s, rows of “O”s, or alternating bands of “X”s and “O”s. Omit the bobbles for even more variations.

## Lantern Cable

Work this bold cable as a statement panel, either alone or as part of a larger pattern. A series of single traveling cables sit around a ribbed center with a small medallion to create the “lamp” in the center. Replace the central medallion and continue the plain rib for an alternative effect or shorten the design by omitting the “handle” (Rows 25–29 of panel repeat).

## Basketweave Cable

A simple four-stitch cable worked over four rows creates this very dense, firm fabric. For a softer drape and more open weave effect, work three plain rows between the cables. If you are using a thicker yarn, swatch carefully as the fabric quickly becomes very rigid with bulkier yarns.

## Rope and Diamond Cable

A detailed cable panel, formed by pairing two ropes around a central diamond filled with garter stitch. There's plenty to challenge the more experienced knitter here, but the pattern could be simplified by omitting the rope bands or removing the garter stitch center of the diamonds.

# Glossary of Techniques

Here's where you can refresh your knowledge of the essentials of knitting. Learn about choosing your yarn and needles, reading charts, measuring gauge, and more. Remind yourself of basic stitches, master new techniques, and expand your knitting skill set through written step-by-step instructions and illustrations.

# The Language of Yarn

Knitters around the globe may share a love of knitting, but they have many and varied ways of describing the yarns they work with.

It is really more correct to use the term “yarn” to describe all the different types of “string” we knit with. Of course “wool” is a term many knitters associate with any type of knitting yarn, regardless of the fiber from which it is made. Strictly speaking, however, the term “wool” only applies when the actual fiber content of the yarn is processed sheep’s fleece. It is therefore more correct to use the term “yarn” to separate it from the idea of fiber content, which describes the raw material, or materials, from which a yarn is made.

A further aspect of any yarn description is its quality. This may be described in different ways depending on the country of origin of the yarn (or indeed of the pattern or the designer). In this context quality doesn’t usually refer to how good the yarn is—that would generate a lengthy debate among any group of knitters!

# **YARN GLOSSARY**

There are a myriad technical words in the world of yarn. Here's a rundown of some of the key terms and their meaning in the context of knitting.

## **Yarn**

The basic material used to create a knitted fabric. This includes the many commercially produced yarns available from yarn stores and other shops, but also includes handspun or handmade yarns, yarns made from wire, plastic, strips of fabric, or other materials.

## **Fiber content**

Yarn fiber could come from an animal (for example, sheep, alpaca, camel, goat), from a plant (for example, cotton, hemp, linen, nettle, bamboo, soy), or from a manmade source (for example, acrylic, polyamide, wire, plastic). Regenerated fibers such as viscose, tencel, and rayon are made from wood pulp. Recycled fibers may include fabric or even plastic bottles. The choice of fiber content will influence the use, handle, appearance, and suitability of a yarn for particular projects.

## **Yarn quality**

A broad term used to describe the nature of the yarn. This will often incorporate, among other things, yarn weight, yardage, how

many plies the yarn has, and yarn count.

- **Weight** In the context of yarn quality, weight refers to the thickness of the yarn, not the actual weight of the ball/skein. Terms to describe yarn weight vary and there is (rather confusingly) some overlap with plies and yarn count. US terminology, for example, includes fingering, sport, worsted, and bulky. Equivalent UK terms refer to the thickness of a yarn by ply—2-ply, 4-ply, and so on.

- **Plies** This refers to the way a yarn is made. Yarn starts out life as one strand, referred to as a singles thread or singles. It is then plied (either by twisting or by folding) with one or more other threads to create a thicker yarn. A 2-ply yarn is made from two strands, a 4-ply from four strands, and so on. Depending on the thickness of the original strand, this determines the thickness of the finished yarn and therefore its quality.

Traditionally, in the UK, a 2-ply would describe a fine (laceweight) yarn but, of course, if the yarn begins life as a single, thick strand, a 2-ply of this yarn could be much thicker, so arguably using plies to describe yarn thickness can be misleading.

- **Yardage/meterage** This is a useful guide when deciding the amount of yarn needed for a project. Some fibers are heavier

than others so there are fewer yards per ounce with, for example, a silk than a cashmere yarn. However, 100 yards (92m) of fingering quality silk should knit the same number of stitches as 100 yards (92m) of fingering quality cashmere, making this a useful measure when substituting yarns.

- **Yarn count** This term is closely linked to yarn thickness and plies. The yarn count is the number of yards of yarn in a given weight (actual weight) of finished yarn. Rather unhelpfully there are many systems for arriving at a yarn count, including worsted count, linen count, cotton count, Yorkshire count, and tex.

# **Know Your Needles**

The right tools are an important part of any project, and knitting is no exception. Fortunately, getting started with good-quality materials need not be expensive and, with a few basic tools, you will be creating wonderful projects in no time.

To begin your knitting journey all you will need to get started is a pair of knitting needles, some yarn, a tape measure, and a pair of scissors. A suitable pair of knitting needles is your first requirement.

## **NEEDLE TYPES**

Knitting needles are available in a wide range of materials, shapes, and sizes, from practical plastic or metal to wood, bamboo, and even glass. When it comes to choosing your first needles, try as many different types as you can. Ask friends who knit or visit a local yarn store. Try needles of different lengths, shapes, and materials if you can. Remember that you may need at least two pairs for your first project, so consider your budget when making your first purchases. If your budget limits you to buying inexpensive plastic or metal needles, that's fine; you will still be able to complete any knitting project. You can often pick up needles from thrift stores, on upcycling websites such as Craig's List, Freecycle, or Freecycle, or from yard sales.

### **Single-pointed pairs of needles**

Widely available and commonly used, single-pointed needles are sold in pairs and have a point at one end and a knurl, knob, or other stopper at the other end to prevent the stitches from sliding off. Use these needles for knitting flat fabrics.

### **Double-pointed needles**

These needles have points at both ends and are sold in sets of four or five needles. Often referred to as DPNs, they are used for knitting tubular fabrics, for example, socks, sweater sleeves, and

seamless sweaters (also called knitting in the round). Extra-long DPNs can be used with a knitting belt or sheath for traditional Fair Isle knitting.

### **Circular needles**

A circular needle comprises two short, single-pointed needles, joined to each other by a flexible cord. The cord may be permanently attached but sets are also available with interchangeable needles (tips) and cords of different lengths. Circular needles are versatile because they can be used for knitting flat fabrics as an alternative to single-pointed needles, or for knitting tubular fabrics in place of DPNs.

## **NEEDLE LENGTHS**

The most common lengths for standard single-pointed needles are 12in (30cm) and 14in (35cm) and these will suit most knitters. For small projects (toys, accessories, etc.) and for working with children, shorter needles of around 6–8in (15–20cm) are available.

### **5in (12.5cm), 7½in (19cm), and 10in (25cm) DPNs**

Choose the length you find most comfortable to work with, keeping in mind that the more stitches you have and the thicker the yarn, the longer your DPNs will likely need to be.

### **Extra-long, 16in (40cm) DPNs**

Very long needles are used for some traditional Fair Isle techniques, where the needles are stuck into a leather belt or wooden sheath worn around the waist. This isn't a commonly used technique today but was once popular in Europe, and allows for fast knitting.

### **Circular needle tips and cords**

The tip of a circular needle refers to the actual needle; the cord joins the two needles together. Tips are normally short, around 4in (10cm). Cords range from 8in (20cm) to 60in (150cm). The length of the cord should be chosen to give a circumference slightly smaller than that of the tube being knitted.

# NEEDLE SHAPES

## **Round**

This is far and away the most common needle shape on the market, easy to use and available in all formats, sizes, and materials.

## **Square**

Many knitters with dexterity problems report that these needles are a much easier shape to grip and manipulate— worth a try if you find traditional round needles uncomfortable. Square needles are currently not available in all materials and are more expensive than round, but prices will no doubt become more competitive with time.

## **Hexagonal**

A newcomer to the knitting market, these needles are at the upper end of the price scale but are pretty and comfortable to use. The shape also makes them less likely to roll off the table. They are currently only available in wood.

# NEEDLE MATERIALS

## **Plastic needles**

Plastic needles are inexpensive and are readily available in a wide range of sizes. Plastic needles are the first choice for many knitters, beginners and experienced alike. Flexible and light in use, you can buy a pair at a time or choose a pre-packaged set with a range of sizes.

## **Bamboo**

Bamboo needles are flexible, lightweight, and warm to the touch, making them popular with knitters who have arthritis or rheumatism. Budget bamboo needles can split with use, so buy the best pair within your budget. They can be lightly sanded with emery paper if they develop rough spots over time.

## **Wood**

There are many beautiful wooden needles on the market and many knitters find these the most comfortable to work with because they are warm, light, and easy on the hands. Like bamboo they can break but can be sanded with care.

## **Metal**

Many knitters prefer metal needles because they are virtually indestructible. They are the needles of choice for many lace knitters because they have the sharpest points for fine work. The smooth finish also makes them a popular choice for knitting at speed. Prices vary significantly for metal needles.

## **Glass**

Glass needles are a luxury choice: they are lovely to use and very beautiful. They are more durable than you may imagine since most are made from Pyrex, although naturally they are best kept away from the rough and tumble you may subject your normal needles to. They are not available in as wide a range of sizes, particularly small sizes, but they are now available in single-pointed, doublepointed, and circular formats.

### **TIPS**

- Build your needle collection gradually, buying needles only as you need them for each project. It will save you money and you can try different needle types until you find the ones that are most suited to you and work best with the project you are working on.
- Look after your needles by keeping them in a needle roll or case, or store them flat in a sturdy plastic tube. Check wooden and bamboo needles for snags and gently file with emery paper as

required. Clean plastic and metal needles with warm, soapy water and dry thoroughly.

# **Essential Techniques**

If you're a new knitter, you will find here all the information you need to get started and with practice you'll soon be able to master even the more challenging stitches.

# SLIPKNOT

**1** Knitting begins with casting on, and a slipknot makes the first stitch of the caston. Loop the yarn around two fingers of the left hand, the ball end on top. Dip the needle into the loop, catch the ball end of the yarn, and pull it through the loop.

**2** Pull the ends of the yarn to tighten the knot. Tighten the ball end to bring the knot up to the needle. The slipknot should be snug but not tight.

## LONG-TAIL CAST-ON

This versatile, straightforward cast-on uses a single needle and produces a reasonably elastic knitted edge like a row of garter stitch.

**1** Leaving an end about three times the length of the required cast-on, put a slipknot on the needle, and hold the needle in the right hand. Holding the yarn end in the left hand, take the left thumb under the yarn and upward. Insert the needle into the front of the loop just made on the thumb.

**2** Use the ball end of the yarn (also called the working yarn) to make a knit stitch, slipping the loop off the thumb. Pull the yarn

end to close the stitch up to the needle. Continue making stitches in this way until you have cast on the number of stitches stated in the pattern. The slipknot counts as the first stitch.

## CHAIN BIND-OFF

A simple knit stitch (chain) bind-off is used in most of the stitches featured. It is easy to work, neat, and reasonably elastic. Knit two stitches. \*With the left needle, lift the first stitch over the second and off the needle. Knit the next stitch. Repeat from \* until one stitch remains. Break the yarn, take the end through this stitch, and tighten.

To bind off in pattern, simply work knit or purl stitches along the bind-off row as they would occur in the stitch pattern.

### ENDS

The end of yarn left after casting on should be a reasonable length so that it can be used for sewing up. The same applies to the end left after binding off. Ends left when a new color is joined in should be woven in along a seam or row end on the wrong side and can also be very useful for covering up imperfections, such as awkward color

changes. Ends left while working a motif are better woven in behind the motif. Use a blunt-pointed tapestry needle for weaving in.

## KNIT STITCH (k)

Choose to hold the yarn and needles in whichever way you feel most comfortable. For comfort and for neat results, the yarn needs to be tensioned slightly by wrapping it around the fingers of the hand holding the yarn. The yarn should move smoothly through the fingers but not be too loose. Practice wrapping in different ways until you feel comfortable. Continuous rows of knit stitch create garter stitch (see [page 14](#)), which produces a springy, nubby fabric with alternating rows of bumps and troughs. A single row of knit stitches produces a smooth “V” on the front of the work and a bump on the reverse.

- 1** Insert the right needle into the first stitch on the left needle. Make sure it goes from left to right into the front of the stitch.

**2** Taking the yarn behind, bring it up and around the right needle clockwise.

**3** Using the tip of the right needle, draw a loop of the working yarn through the stitch.

**4** Slip the stitch off the left needle. There is now a new stitch on the right needle.

## PURL STITCH (p)

Hold the yarn and needles in the same way as for making a knit stitch. A purl stitch is the opposite of a knit stitch, producing a bumpy stitch on the front and smooth “V”-like knit stitches on the reverse of the work. Alternate rows of knit and purl produce stockinette stitch (see [page 14](#)) when viewed from the smooth (knit) side. When viewed from the bumpy (purl) side, this produces reverse stockinette stitch (see [page 14](#)). Either may be used as the right side of a fabric.

**1** Insert the right needle into the first stitch on the left needle. Make sure it goes into the stitch from right to left up into the front of the stitch.

**2** Bringing the yarn to the front, loop it around the right needle counter clockwise.

**3** Lower the tip of the right needle, taking it away from you to draw a loop of the working yarn through the stitch.

**4** Slip the stitch off the left needle. There is now a new stitch on the right needle.

## DECREASES

Decreases have two basic functions. They can be used to reduce the number of stitches in a row, as in armholes and necklines, and combined with increases, they can create stitch patterns.

### **Right-slanting single decrease (k2tog)**

Knitting two stitches together makes a smooth shaping, with the second stitch lying on top of the first. For k3tog, knit the next three stitches as one, for k4tog, the next four stitches, and so on. A p2tog is worked in the same way, with two (or three for p3tog, four for p4tog, etc.) stitches purled as one.

- 1** Insert the right needle through the front of the first two stitches on the left needle, then take the yarn around the needle.

2 Draw the loop through and drop the two stitches off the left needle. One stitch decreased.

### **Left-slanting single decrease (skp)**

Slipping a stitch, knitting a stitch, then lifting the slipped stitch over the knitted stitch makes a decrease, with the first stitch lying on top of the second.

1 Insert the right needle knitwise (as if to knit the next stitch) through the front of the next stitch on the left needle, and slip it on to the right. Knit the next stitch.

**2** Use the tip of the left needle to lift the slipped stitch over the knitted stitch and off the right needle. One stitch decreased.

### **Left-slanting double decrease (sk2p)**

For a double decrease that slants to the left, worked on a right-side row, you'll need to take the first stitch over a single decrease. For a similar-looking decrease worked on a wrong-side row, purl three together through the back of the loop (p3togtbl).

**1** Insert the right needle knitwise through the front of the next stitch on the left needle, and slip it on to the right needle.

**2** Knit the next two stitches together, then lift the first stitch over as shown. To make a right-slanting double decrease, simply knit three stitches together (k3tog), see left.

### **Balanced double decrease (s2kp)**

Working a decrease that takes one stitch from each side and leaves the center stitch on top has lots of potential for shaping and for working beautiful stitch patterns.

**1** Insert the right needle into the second and then the first stitch, and slip these stitches on to the right needle. The slipped stitches will be out of sequence but this is okay.

**2** Knit the next stitch, then lift the two slipped stitches over.

# CABLES

Knitting groups of stitches out of sequence creates exciting stitch patterns. Cables can be worked with two or more stitches and crossed to the front or the back.

## Front cable (2/2 LC)

The stitches in this example are knitted, and this four-stitch cable crosses at the front. A four-stitch back cable (2/2 RC) is worked in exactly the same way, except that the cable needle is held at the back, so that the cable crosses in the opposite direction. More complex cables may include slipped, purled, or twisted stitches, but once you understand the basics, it is easy to progress to more complex stitches.

**1** Slip the first two stitches on to a cable needle and hold at the front of the work, then knit the next two stitches from the left needle.

**2** Knit the two stitches from the cable needle.

## YARN OVER (yo)

It's essential to take the yarn over the needle so that the strand lies in the same direction as the other stitches. Working into this strand on the next row makes a hole, but if the strand is twisted, the hole will close up.

When the stitch before a yarn over is purl, the yarn will already be at the front, ready to go over the needle.

**1** To make a yarn over between knit stitches, bring the yarn to the front as if to purl, then take it over the needle to knit the next stitch.

**2** To make a yarn over between a knit and a purl, bring the yarn to the front as if to purl, take it over the needle, and bring it to the front again, ready to purl.

## INCREASES

Here are two commonly used methods of increasing a single stitch —bar increase and lifted strand increase.

### **Bar increase on a knit row (k1f&b)**

Knitting into the front and the back of a stitch is the most common increase. It's a neat, firm increase, which makes a little bar on the right side of the work at the base of the new stitch and doesn't leave a hole.

**1** Knit into the front of the stitch and pull the loop through, but leave the stitch on the left needle.

**2** Knit into the back of the stitch on the left needle.

**3** Slip the stitch off the left needle, making two stitches on the right needle. Note that the bar of the new stitch lies on the left.

### **Lifted strand increase to the left (m1 or m1l)**

Making a stitch from the strand between stitches is a very neat way to increase.

From the front, insert the left needle under the strand between stitches. Make sure the strand lies on the needle in

the same direction as the other stitches, then knit into the back of it.

### **Double increase (m3)**

Also known as a wrapped increase, this is one of the simplest ways to make three stitches out of one.

Knit one stitch without slipping it off, take the yarn over the right needle from front to back, then knit the same stitch again. A small but decorative hole is left in the fabric.

### **Lifted strand increase to the right (m1r)**

This right-slanting increase balances the lifted strand increase to the left.

From the back, insert the left needle under the strand between the stitches. It will not lie in the same direction as the other stitches, so knit into the front of it.

## TWISTS

Twisting stitches is working two or three stitches out of sequence, but without using a cable needle. This is an easy way to create patterns where lines of stitches travel over the surface of the knitting.

### **Left twist (1/1 LT)**

This twist is worked on a right-side row. As the stitches change place, the first stitch lies on top and slants to the left, while the stitch behind is worked through the back of the loop.

**1** Knit into the back of the second stitch.

**2** Knit into the front of the first stitch.

**3** Slip both stitches off the left needle together.

### **Right twist (1/1 RT)**

In this right-side row twist, the second stitch lies on top and slants to the right, while the stitch behind is worked through the back of the loop.

**1** Knit into the front of the second stitch.

**2** Knit into the back of the first stitch.

**3** Slip both stitches off the left needle together.

# Gauge

A knitter's best friend, but also, arguably, the part of a project that knitters like the least—gauge. Mention gauge swatches (or gauge squares) to most knitters and wait for the groans! But, while they may seem like an annoyance that only serves to keep you away from your precious knitting project, they can save a lot of disappointment.

Gauge is simply the size (length x width) of a knitting stitch knitted on a specific size of needle using a specified technique. Because stitches form the basis of a knitted fabric, it stands to reason that if your stitches are larger or smaller than the ones knitted by the designer (usually if you knit more loosely or tighter), you may not produce a piece of knitting the same size as the one the designer knitted. If you doubt that this is the case, ask three of your knitting friends to each make a square using the same needles, rows, and stitches and compare the finished sizes. They will almost certainly be different.

But does this matter? Small differences over a small square may not seem significant, but if your stitches are just an eighth bigger than the designer's, for every 100 stitches the designer casts on, your work will measure the equivalent of 12 stitches larger. On a shawl with 400 stitches, that's the equivalent of an extra 50 stitches without your having cast on a single extra stitch. Equally, if your square is smaller than the designer's, your garment will be correspondingly smaller—and the greater the difference, the smaller the garment will be.

So, on balance, as much as a gauge swatch seems like an obstacle designed to prevent you from getting stuck into your project, knitting one is a worthwhile exercise.

## NON-MATCHING GAUGE

There are occasions when it is not possible to match both the number of rows and the number of stitches simultaneously. With one set of needles your rows are correct but you have too few stitches. However, when you go up a needle size, the stitch numbers are correct, but there are too few rows.

Because we all knit differently, it is quite common to find that you can't exactly match the gauge stated in a given pattern. If, having tried a couple of needle sizes, you find that you can't match both stitches and rows, it is generally advisable to ensure that the number of stitches is correct, even if this means that the number of rows is different from the pattern. Where the number of rows is different from the stated gauge, you may need to work either fewer or more rows to achieve the correct dimensions. If the pattern gives measurements—for example, “knit until the work measures X in/cm”—the number of rows isn't usually important, although you may not end in the same place on the pattern repeat. Where the pattern requires a specific number of rows, calculate what the length will be based on the stated gauge. Compare this to the length if you used your own gauge and aim to work more/fewer rows to match the original length. If it is a close measurement over a small length this may not be necessary, but over a long length, adjustments will be needed. Aim to adjust length in areas where there is no shaping, if at all possible. If adjusting rows in an area

where stitches will be picked up, you may need to adjust the number of stitches being picked up accordingly.

## TIPS

- If you are working with textured yarns it can be difficult to measure stitches and rows accurately. To remedy this, use a piece of smooth, contrasting thread and add it during knitting by inserting a lifeline after four or five rows. Lay a second piece of thread between the fourth and fifth stitches to mark out the edge and again after the number of stitches stated to be the correct gauge in the pattern. Run these threads up the sides of the work like a running stitch by taking them to the back after two rows and bringing them forward after a further two rows, and so on.

Once the stated number of rows has been knitted, add a further lifeline. Use these lines to measure your work.

- Label swatches and keep them for future reference in a folder or box. They may come in handy if you knit the project or use the same yarn again.
- Swatches can be made into projects such as coasters, mats, or small purses. They can also be sewn together to create a blanket—a wonderful history of your knitting projects.
- If a pattern is to be knitted in the round, make sure you knit your gauge swatch in the round, since gauge is often different when comparing circular to flat knitting.
- Use the same needles as you did for your correct swatch and remember to adjust any smaller or larger needles for ribs or bands correspondingly.

## MEASURING GAUGE

Knit your swatch exactly according to the pattern, keeping in mind that you may be asked to work in a pattern stitch or in a simple stockinette stitch. Knit the swatch 10 or so stitches larger and work an extra 10 rows more than the stated gauge. This allows you to measure in the center of the swatch, which is more accurate since edge stitches are rarely the same size as the main body of the garment and can distort your calculations.

**1** Bind off, wash, and block your swatch. Ideally, leave it overnight to allow the stitches to settle. Measuring in the center of the swatch, mark a line vertically, straight up one column of stitches, with a large-headed pin. Use a ruler to measure the stated width, usually 4in (10cm). Measure across the center of

the swatch to avoid distortions. Mark this measurement with a second pin. Count the stitches between the two pins. Include any half, quarter, or partial stitches.

**2** Starting several rows into the swatch and in the center of the width, place a pin horizontally, straight along a row of stitches. Measure the stated length in a straight vertical line and mark this point with a second pin. Count the rows between the two pins including any partial rows. If your finished measurements match the pattern, you can start knitting with the needles you have been using. If the square is too small, repeat the process using needles a size larger. If the square is too large, try again with smaller needles.

---

**NOTE**

This information is a guide only and does not take into account any unique features of your pattern, such as pattern stitch, required drape, etc. You will still need to check your own gauge and compare it to the gauge stated in the pattern. The ball-band information is, however, a useful indicator, particularly if substituting a different yarn for the one in your pattern.

# How to Read a Chart

Charts are a way of depicting pattern information in a graphic form. They are often used to depict the more complex parts of a design, for example, a Fair Isle or lace design. Many knitters and designers find them helpful because it is possible to see the pattern structure at a glance.

Charts may be written using symbols or by using different colors to represent different stitches or colors. Symbols are more commonly used for lace, cables, and other stitch patterns, whereas colored charts are generally restricted to Fair Isle and other colorwork designs. Charts are read from the bottom to the top following the direction of the knitting. Each square represents a stitch and each horizontal line of squares a row of knitting.

## SYMBOL-BASED CHART

The symbols represent an instruction and, where possible, are designed to resemble the appearance of the knitting. Before you start knitting, familiarize yourself with the symbols and techniques of the chart you are going to work from, making a note of them for quick reference if desired.

## COLOR-BASED CHART

Color charts are read in the same way as symbol-based charts, with each square representing a stitch of knitting. As most colorwork uses stockinette stitch, sometimes stitch symbols are replaced with colored squares, each color representing a different yarn color.

### KEY

Each chart is accompanied by a key; always read the key before you begin because there is no standard set of symbols and designers and publishers follow different conventions when producing charted patterns. Take particular care to note any symbols that have a double

use. For example, a blank white square will often be used to depict a knit stitch on a RS row and a purl stitch on a WS row. In other words, this would produce a series of stockinette stitches. Purl stitches worked on a RS row may then have a separate symbol (often •), so don't worry if you see what are apparently two instructions for a single stitch type. A key might look something like this:

On RS, knit, on WS, purl

On RS, purl, on WS, knit

On RS, k1tbl, on WS, p1tbl

# ANATOMY OF A CHART

## Squares and spans

Each square of a chart represents one stitch of knitting.

Combinations of stitches, such as cables or decreases, may span over a number of squares. This means that these stitches are worked as a unit. The chart above would read as follows:

- **Row 1 (RS):** P3, knit to last 3 sts, p3.
- **Row 2:** Knit.
- **Rows 3 & 4:** Repeat Rows 1 & 2.
- **Row 5:** Repeat Row 1.
- **Row 6:** K3, purl to last 3 sts, k3.
- **Row 7:** P3, \*2/2 LC, 2/2 RC; rep from \* to last 3 sts, p3.
- **Row 8:** Repeat Row 6.
- **Row 9:** P3, \*1/1 LC, 1/1 RC; rep from \* to last 3 sts, p3.

These 9 rows form the pattern.

## Pattern repeats and multiples

Where a pattern is repeated several times across a row, the designer will often chart the pattern section just once (the pattern repeat).

Any odd stitches at the beginning or end of the row are shown at either side of the pattern repeat and the section to be repeated is bordered with a bold line or clearly demarcated in another way.

This chart, for example, would read:

- **Row 1 (RS):** [P2, k8] to last 2 sts, p2.
- **Row 2:** K2, [p8, k2] to end.
- **Row 3:** [P2, 2/2 RC, 2/2 LC] to last 2 sts, p2.
- **Row 4:** Repeat Row 2.

These 4 rows form the pattern.

When calculating how many stitches to cast on, this will be the number of stitches in the repeat (the multiple), plus any additional stitches. So a chart that asks for a multiple of 10 sts + 2 (as above) will have 12 sts for one repeat, 22 for two repeats, 32 for three repeats, and so on. The additional sts are only added once. For patterns with “no stitch” in the first row, use the stitch multiple and any additional stitches, ignoring any “no stitches.”

## No stitch

To make charts easier to produce, where a stitch is decreased—and so does not exist for the remainder of the section—a black or grayed-out square is often used to depict “no stitch.”

In this example using blackberry stitch, the chart is read straight across, ignoring the grayed-out squares. Note that the number of stitches cast on is 4; the grayed-out stitches are ignored. So the equivalent written pattern would read:

- **Row 1 (RS):** Purl.
- **Row 2:** [Inc1to3, p3tog] to end.
- **Row 3:** Purl.
- **Row 4:** [P3tog, inc1to3] to end.

These 4 rows form the pattern.

## MULTIPLE CHARTS

It is rare for a chart to show an entire garment due to the size of chart this would require. Therefore, where there are several areas of pattern in a piece, there will be several small charts. You will be instructed on which chart to follow at the appropriate part in the text.

## SUPPLEMENTARY CHARTS

Where a motif (a bell or leaf, for example) is added part way through a chart, this may be shown separately to save space. In this case, where a row has a number it will correspond to the row number in the supplementary chart.

### Sizing

A chart may have additional boxed-out or demarcated sections to depict the different instructions for different sizes. Follow the correct section for your size. Here, if you were making the small size of the left front (knitted flat as a separate piece), you would work the first three rows as follows:

- **Row 1 (RS):** \*P1, k1, p1, k2; rep from \* to end.
- **Row 2:** \*P2, k1, p1, k1; rep from \* to end.
- **Row 3:** Repeat Row 1.

The medium size would read:

- **Row 1 (RS):** \*P1, k1, p1, k2; rep from \* to last 3 sts, p1, k1, p1.
- **Row 2:** K1, p1, k1, \*p2, k1, p1, k1; rep from \* to end.
- **Row 3:** Repeat Row 1.

And the large size would read:

- **Row 1 (RS):** \*P1, k1, p1, k2; rep from \* to last st, p1.
- **Row 2:** K1, \*p2, k1, p1, k1; rep from \* to end.

- **Row 3:** Repeat Row 1.

## Row numbering

To save printing space and to make patterns easier to visualize, designs where alternate rows are all identical may not be shown on the chart. This will be clear from the row numbering (usually printed vertically up the side of the chart) where only every other row will be numbered. Alternatively, the key may have instructions to treat every alternate row as, for example, a purl row.

## TIPS

- **Photocopy (and enlarge if necessary) your charts** and use a sticky note to mark the row that you are on.
- **Mark off rows as you complete them with a highlighter pen.** If you reuse the chart, use a different color highlighter. A highlighter can also be used to mark out your size, if appropriate.
- **Don't be tempted to cross out completed lines**—just in case you make a mistake.
- **Photocopy the key** and keep it next to you for easy reference.
- **Copy the color chart** and attach a small piece of the relevant yarn color next to each color on the chart for easy reference.

## **KNITTING DIRECTION—FLAT VS CIRCULAR KNITTING**

Charts are used for both flat and circular knitting. The key difference in following these charts is in the direction of knitting and the order in which to read the chart.

### **Flat knitting**

Where a pattern starts on a right-side row, the rows are normally worked starting at the bottom right corner and read from right to left for the first row. The next row then starts at the left and is read from left to right. However, if a pattern starts with a wrong-side row, the first row will be worked from left to right.

When converting a chart for knitting in the round, it may be necessary to adjust the additional stitches that are worked once at the beginning and end of rows to ensure that any repeats are correctly aligned. Using the guide below, try out the chart on a circular knitted swatch, adjusting as required to get a good pattern match. This will be indicated by the row numbers at the sides of the chart.

## Flat knitting

## Flat knitting—wrong side

## Circular knitting

With projects knitted in the round, all rows (rounds) are read in the same direction, usually starting at the bottom right corner and reading from right to left. This may seem confusing, but if you visualize your knitting as you hold it, a flat piece is knitted from the right-hand edge to the left, swapped back into the left hand, and then knitted from the left edge to the right. By contrast, with a circular knit you are always knitting in the same direction, usually from right to left, and the work never swaps hands.

It will be two or three strands wide, depending on how many times you have wound the yarn around your finger. Thanks also to Jools Yeo and Sophie Scott for their help with the pinning of swatches.

Thanks to my husband, Pete, for holding the fort and not minding the mess while I was busy knitting, researching, and charting. Thanks also to Quarto for commissioning me to write what has been a most enjoyable book and, last but by no means least, to Lily and the team at Quarto who have been such a pleasure to work with.
