If you have been drawn in by the ENTHRALLING HOBBY OF KNITTING, you've chosen just the right book! Using only a few basic stitches, a multitude of fascinating stitch patterns has been compiled for you, waiting to be turned into FABULOUS KNITTING PROJECTS by your creativity and imagination.

This collection contains 500 STITCH PATTERNS, providing wonderful pattern suggestions for simple knitting projects as well as challenging and sophisticated ideas for master knitters.

The book is divided into 13 CHAPTERS—11 stitch pattern chapters, 1 chapter of KNITTING BASICS (also refer here for stitch abbreviations and symbol explanations), and a final chapter providing you with INSPIRATION for designing your own projects, using the stitch patterns from this book.

To classify the different stitch pattern types and make ORIENTATION WITHIN THE BOOK easier, every stitch pattern chapter is presented in its own color scheme.

Well-known classics and traditional stitch patterns are supplemented by many newly created stitch patterns. Feel inspired by this INDISPENSABLE REFERENCE WORK to plan your upcoming projects and create your very own knitting design.

RIGHT EDGE

Only RS rows are shown; in WS rows, knit the knits, and purl the purls. In RS rows, knit the selv sts, and in WS rows, slip the selv sts knitwise. Repeat Rows 1–16 heightwise.

Combining: Knit up the border separately, and sew it on later, or omit the selv sts at the left edge of the piece, and combine the border at the side with another stitch pattern (pictured: Moss stitch). Alternatively, when the desired length has been reached, BO the sts in a RS row, leaving the last stitch on the right needle. Along the long left edge, pick up the required number of stitches, and continue using the picked-up stitches.

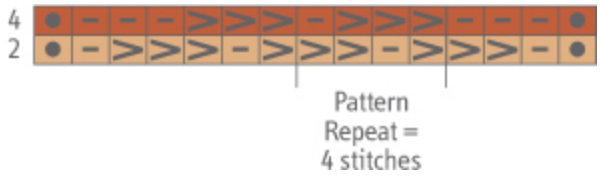
PATTERNS USING SPECIAL TECHNIQUES

481 STAR PATTERN

[multiple of 4 + 1 st + 2 selv sts]

Only WS rows are shown; in RS rows, knit all sts. Begin with the sts before the pattern repeat, rep the marked pattern repeat (4 sts wide) widthwise continuously, and end with the sts after the pattern repeat. Repeat Rows 1–4 heightwise.



Stitch Key

= 1 selvedge stitch in color A

= 1 selvedge stitch in color B

= Purl 1 stitch in color A

= Purl 1 stitch in color B

= Purl 3 stitches together in color A, but leave the stitch on the left needle, make 1 yarn over in color A, and purl the 3 stitches on the left needle together once more in color A

= Purl 3 stitches together in color B, but leave the stitch on the left needle, make 1 yarn over in color B, purl the 3 stitches on the left needle together once more in color B

482 CHEVRON PATTERN

[multiple of 14 + 1 st + 2 selv sts]

Cast on the stitches using the cable cast-on method, and knit 2 rows. Then continue from chart. Only RS rows are shown; in WS rows, purl all sts. Begin with the sts before the pattern repeat, rep the marked pattern repeat (14 sts wide) widthwise continuously, and end with the sts after the pattern repeat. Repeat Rows 1 and 2 heightwise, changing colors after every 6 rows.

For the ragged finishing border, in Row 6 (= WS) after the last color change, knit all sts, repeat Row 1 once more, and work another WS row in knit. Then bind off the stitches according to the chart, using the elastic bind-off method.

Stitch Key

= 1 selvedge stitch

= Knit 1 stitch

= Knit 2 stitches together

= Knit 2 stitches together left-leaning with passing over (skp): slip 1 stitch knitwise, knit the next stitch, and pass the slipped stitch over

= Increase 1 stitch twisted from the bar between stitches

= Centered double decrease, knitting 3 stitches together with center stitch on top (cdd): slip 2 stitches together knitwise, knit 1 stitch, and pass the slipped stitches over

= Bind off 1 stitch using elastic bind-off method

= First, bind off 1 stitch using elastic bind-off method, then pull the working yarn through the stitch a second time, creating a chain as in crochet. This creates a point at the edge.

= Knit 2 stitches together, then bind off using elastic bind-off method

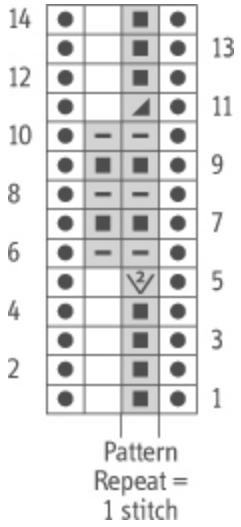
= Knit 2 stitches together left-leaning with passing over (skp), then bind off using elastic bind-off method

= Knit 3 stitches together with center stitch on top (cdd), then bind off using elastic bind-off method

= No stitch, for better overview only

483 GATHERED PATTERN [multiple of 1 + 2 selv sts]

Shown are both RS and WS rows. Begin with the selv st before the pattern repeat, rep the marked pattern repeat (1 st wide) widthwise continuously, and end with the selv st after the pattern repeat. Work Rows 1–14 once, then repeat Rows 5–14 heightwise continuously.



Stitch Key

● = 1 selvedge stitch

■ = Knit 1 stitch

– = Purl 1 stitch

◢ = Knit 2 stitches together

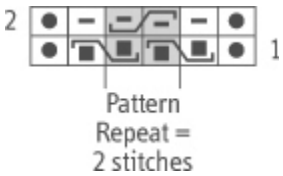
V = Make 2 stitches from 1 (kfb): first, knit 1 stitch, but leave it on the left needle, then knit the same stitch again through the back loop

□ = No stitch, for better overview only

484 PLAITED BASKETWEAVE STITCH

[multiple of 2 + 2 selv sts]

Shown are both RS and WS rows. Begin with the sts before the pattern repeat, rep the marked pattern repeat (2 sts wide) widthwise continuously, and end with the sts after the pattern repeat. Repeat Rows 1 and 2 heightwise.



Stitch Key

= 1 selvedge stitch

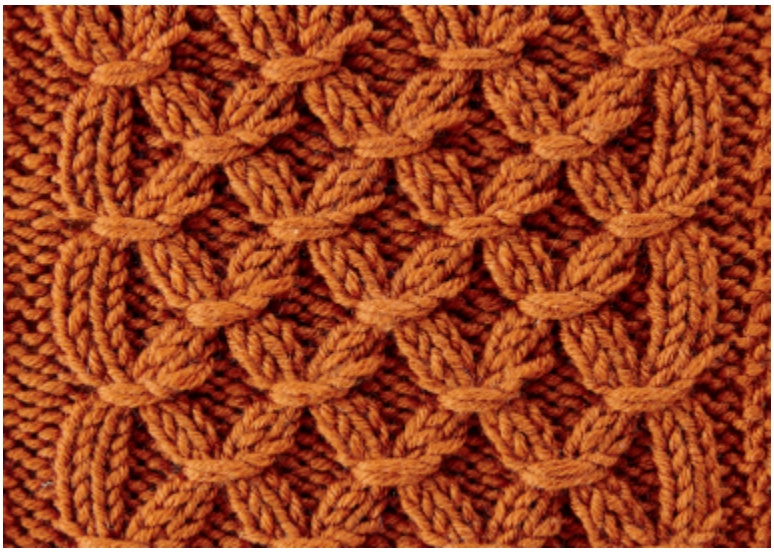
= Purl 1 stitch

= Lead the right needle behind the first stitch on the left needle, bypassing it, and knit the second stitch, but leave it on the left needle, then knit the first stitch on the left needle the regular way. Now release both stitches from the left needle.

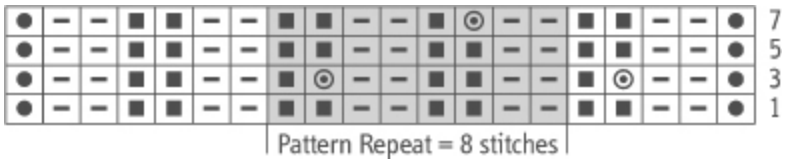
= Lead the right needle in front of the first stitch on the left needle, bypassing it, and purl the second stitch, but leave it on the left needle, then purl the first stitch on the left needle the regular way. Now release both stitches from the left needle.

485 SMALL LAZY LINKS STITCH

[multiple of 8 + 2 sts + 2 selv sts]



Only RS rows are shown; in WS rows, knit the knits, and purl the purls. Begin with the sts before the pattern repeat, rep the marked pattern repeat (8 sts wide) widthwise continuously, and end with the sts after the pattern repeat. Repeat Rows 1–8 heightwise.



Stitch Key

● = 1 selvedge stitch

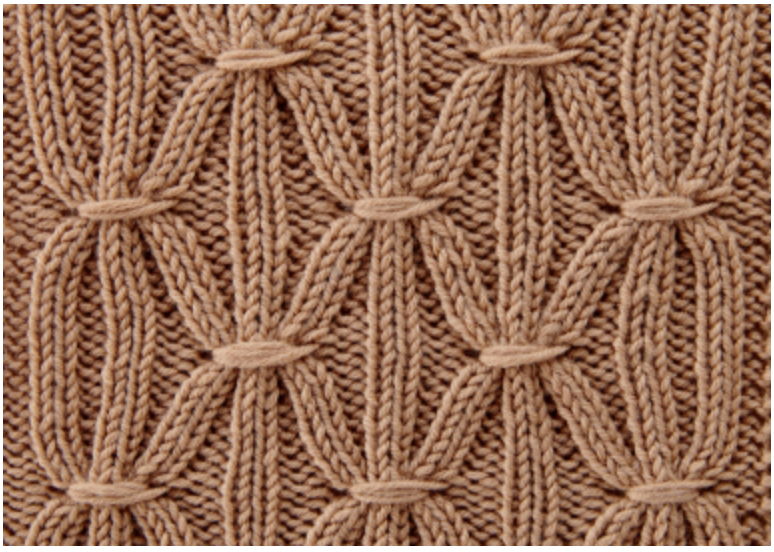
■ = Knit 1 stitch

– = Purl 1 stitch

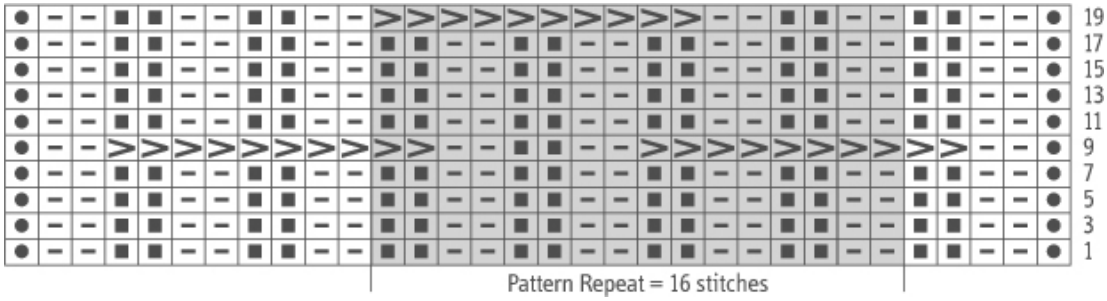
⊙ = Bring the working yarn to the back of the work, and insert the right needle between the 6th and 7th stitch on the left needle. Pull the working yarn through as a long loop between the stitches, and place it on the left needle before the first stitch. Then knit the long loop and the following stitch together.

486 LARGE LAZY LINKS STITCH

[multiple of 16 + 14 sts + 2 selv sts]



Only RS rows are shown; in WS rows, knit the knits, and purl the purls. Begin with the sts before the pattern repeat, rep the marked pattern repeat (16 sts wide) widthwise continuously, and end with the sts after the pattern repeat. Repeat Rows 1–20 heightwise.



Stitch Key

● = 1 selvedge stitch

■ = Knit 1 stitch

– = Purl 1 stitch

cdd = knit 3 stitches together with center stitch on top: slip 2 stitches together knitwise, knit the next stitch, and pass the slipped stitches over
CO = cast on
k2tog = knit 2 stitches together
k3tog = knit 3 stitches together
kfb = make 2 stitches from 1: first, knit 1 stitch, but leave it on the left needle, then knit the same stitch again through the back loop
kfbf = work a total of 3 stitches into 1 stitch: knit 1 stitch, but leave it on the left needle. Now, knit the stitch through the back loop, still leaving it on

the left needle, then knit it through the front leg, and let it slip off the left needle
rep = repeat
RS = right side (row)
selv st(s) = selvedge stitch(es)
sk2p = knit 3 stitches together left-leaning with passing over: slip 1 stitch knitwise, knit 2 stitches together, and pass the slipped stitch over
skp = knit 2 stitches together left-leaning with passing over: slip 1 stitch knitwise, knit the next stitch, and pass the slipped stitch over
ssk = knit 2 stitches together left-leaning: slip 2 stitches individually knitwise, return them to the left needle, then knit them through the back loop
ssp = purl 2 stitches together left-leaning: slip 2 stitches individually knitwise, return them to the left needle, then purl them together through the back loop
sssk = knit 3 stitches together left-leaning: slip 3 stitches individually knitwise, return them to the left needle, then knit them through the back loop
st(s) = stitch(es)
WS = wrong side (row)
yo = yarn over

SYMBOLS

↔ stitch pattern is adjustable width wise

↕ stitch pattern is adjustable heightwise

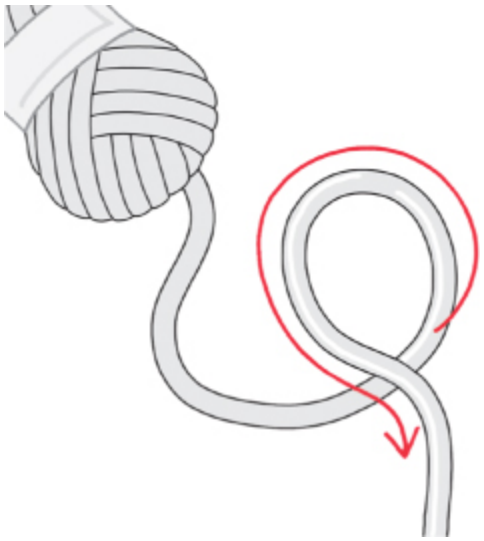
◌ requires circular knitting needles

➥ stitch pattern is reversible

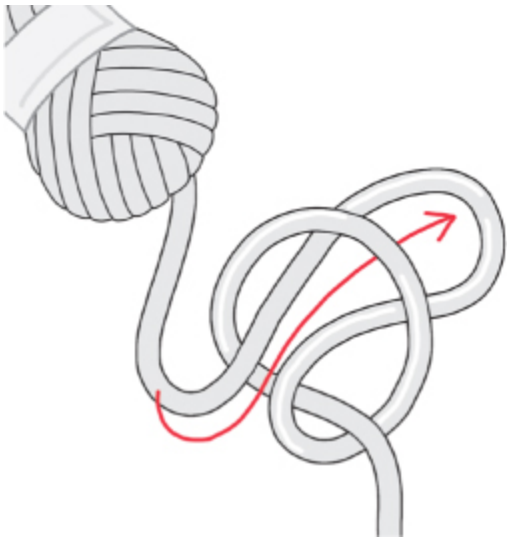
[] Numbers in square brackets listed at the beginning of each stitch pattern indicate the total stitch count to cast on for the stitch pattern. The total stitch count will be a multiple of the first number plus the listed number of additional stitches and selvedge stitches. Example: “[multiple of 16 +

3 sts + 2 selv sts]" means that the total stitch count to be cast on will be the sum of: a number which is a multiple of 16, plus 3 stitches, plus 2 selvedge stitches.

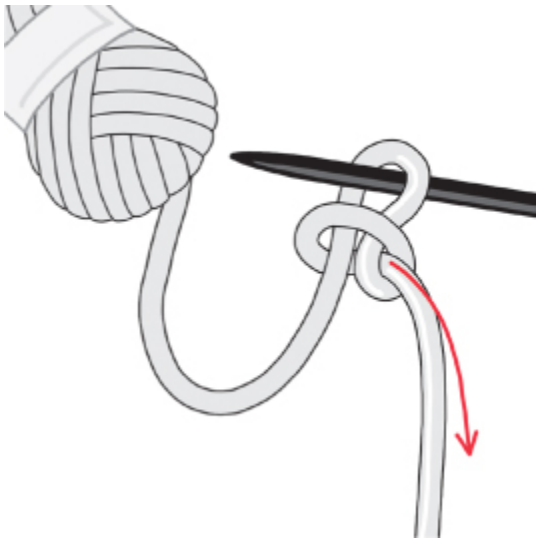
BEGINNING SLIPKNOT



1 Arrange the working yarn in a loop.



2 Pull the end of the yarn that is connected to the ball (= working yarn), as a loop through the initial loop.

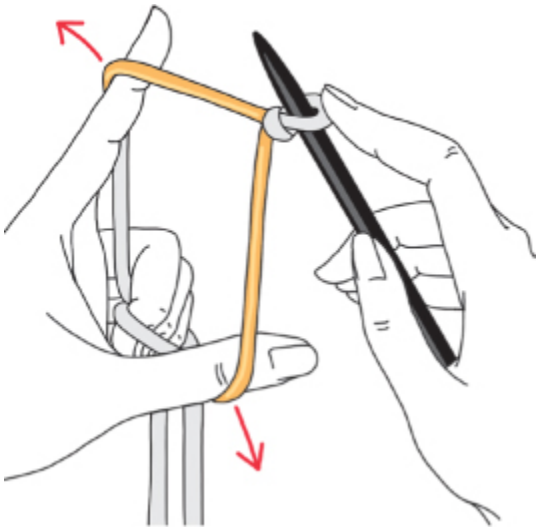


3 Place the resulting loop onto a knitting needle, and tighten on the needle.

CASTING ON STITCHES

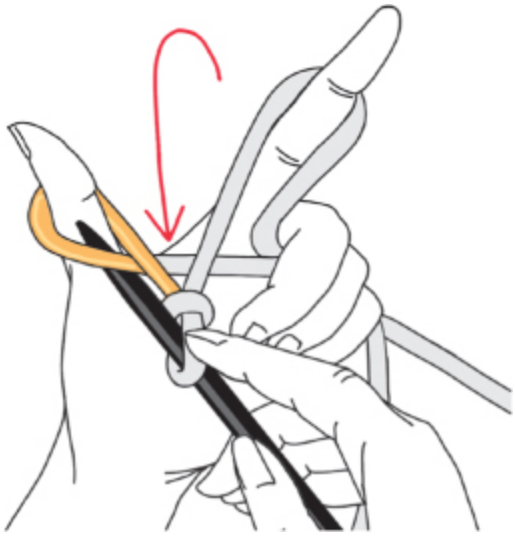
LONG-TAIL CAST-ON

The long-tail cast-on is one of the most common cast-on methods. It produces a sturdy but still elastic cast-on edge.

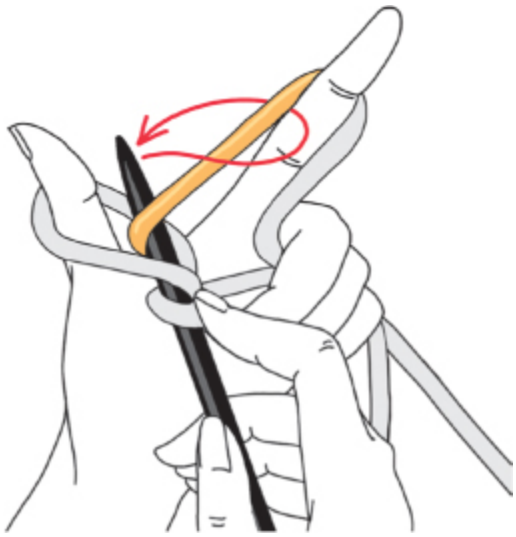


1 Leave a beginning tail at least 3 times as long as the intended width of the cast-on row. Make a beginning slip-knot, and tighten it on the needle. Using

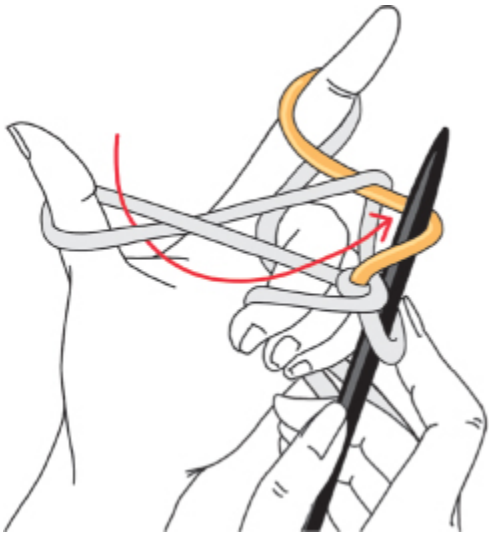
thumb and index finger of your left hand, reach between the two strands of yarn, then lead the working yarn connected to the skein over your index finger, and the unattached yarn end over the thumb. Hold the two strands of yarn to your palm with the remaining three fingers.



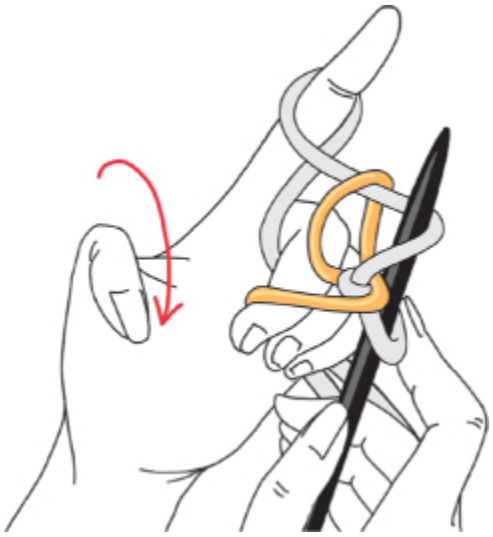
2 Make a downward motion with the needle, so that a loop forms around the thumb. Insert the needle into this thumb loop from below.



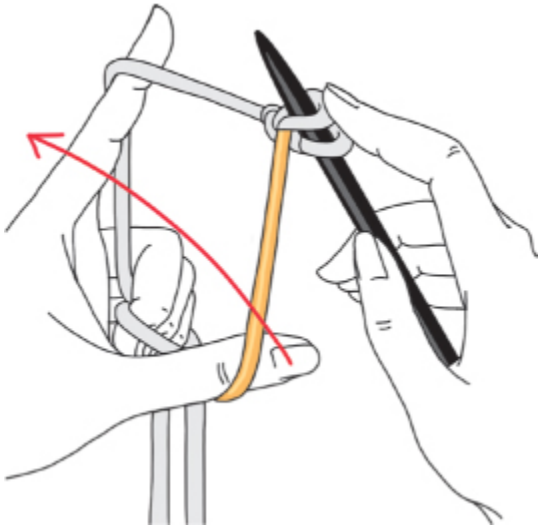
3 Lead the needle tip in the direction of the arrow around the working yarn…



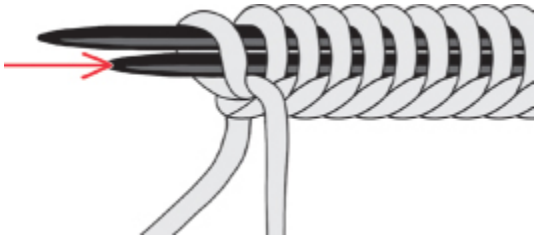
4 … and pull the working yarn through the thumb loop.



5 Pull your thumb out of the loop, and gently tug at the yarn to tighten the loop on the needle—not too tight and not too loose.



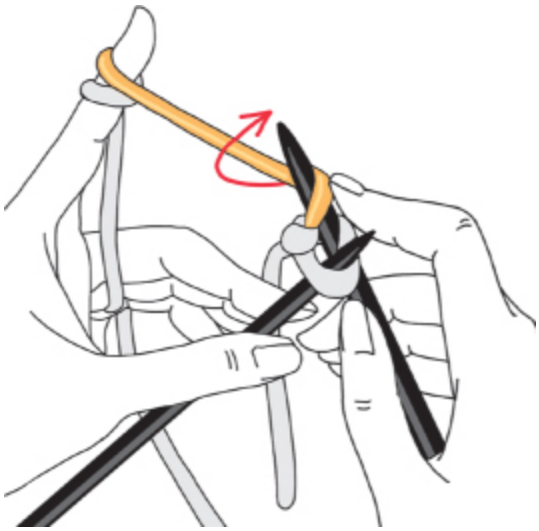
6 Lift the thumb to return to the initial position, and repeat steps 2–6 to cast on more stitches.



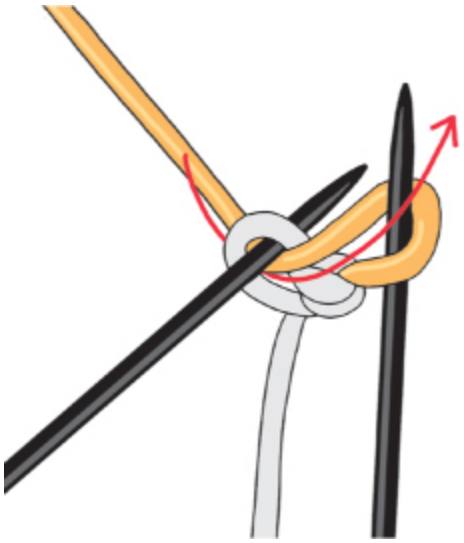
TIP: For a not-too-tight and especially even cast-on edge, the stitches can also be cast onto two needles held together. Remove the second needle after all stitches have been cast on.

CABLE CAST-ON

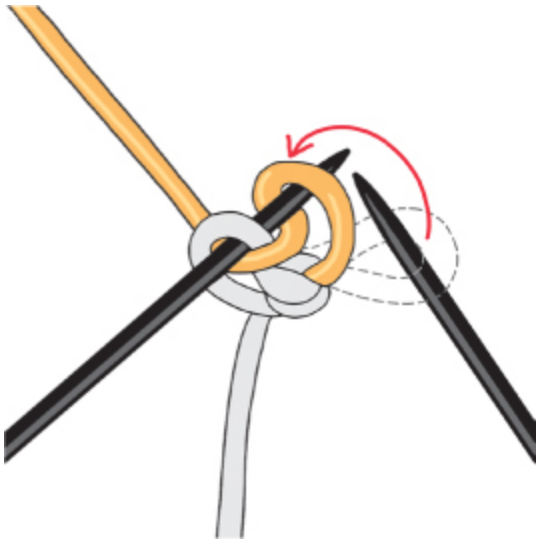
The cable cast-on method produces an especially stretchy cast-on edge that is suitable for all patterns with a curved or zigzagging edge.



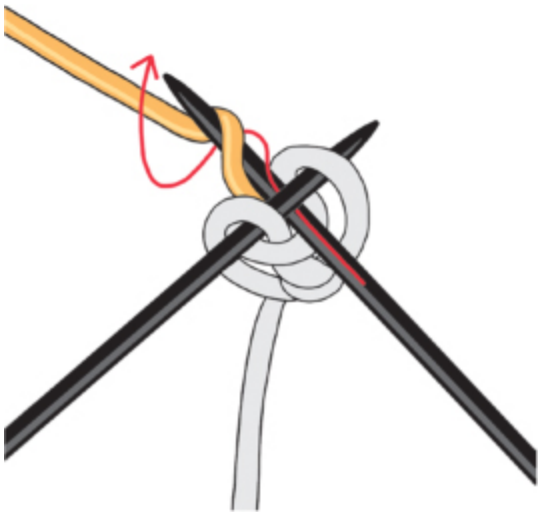
1 Make a beginning slipknot, and tighten it on the needle. Leave the unattached yarn end short; it only needs to be long enough to be woven in later. The cast-on is worked with the working yarn coming from the ball. Hold the knitting needle bearing the beginning slipknot in your left hand, and wind the working yarn around the index finger. Insert the right needle from right to left through the loop, and lead the yarn around the needle in the direction of the arrow.



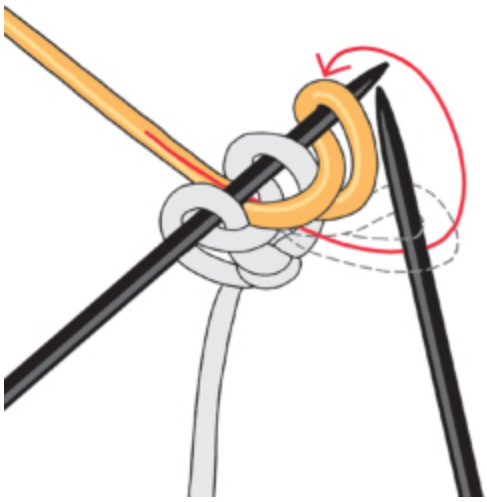
2 Pull the yarn through the loop…



3 … and move the newly formed stitch from the right to the left needle.



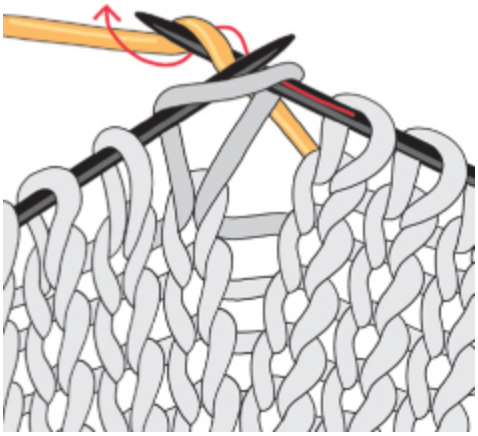
4 For the third stitch, insert the right needle between the first and second stitch on the left needle, and lead the yarn around the needle in the direction of the arrow.



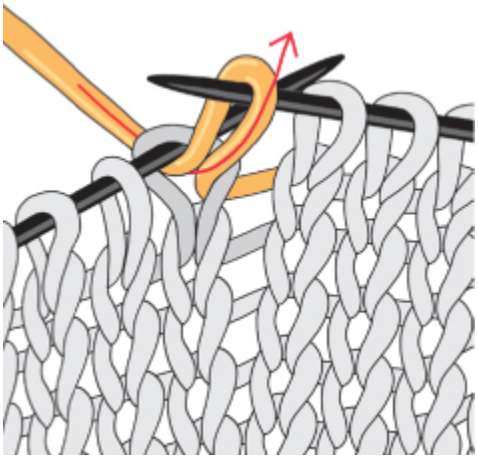
5 Pull the working yarn through between the two needles, and move the newly formed stitch from the right to the left needle. To cast on additional stitches, repeat steps 4 and 5, always inserting the needle between the two newest cast-on stitches.

WORKING STITCHES

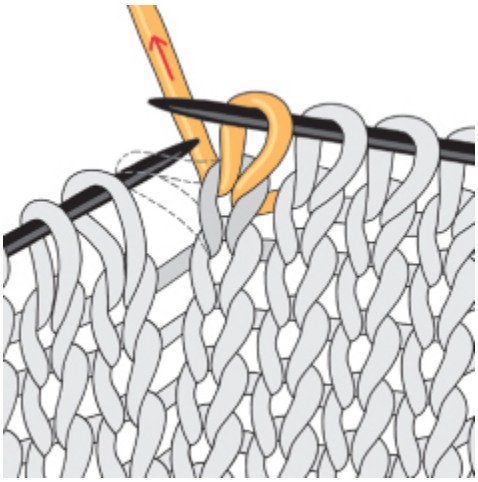
KNIT STITCHES



1 Insert the tip of the right needle from the left and the front to the back and the right into the stitch. Move the needle around the working yarn in the direction of the arrow…

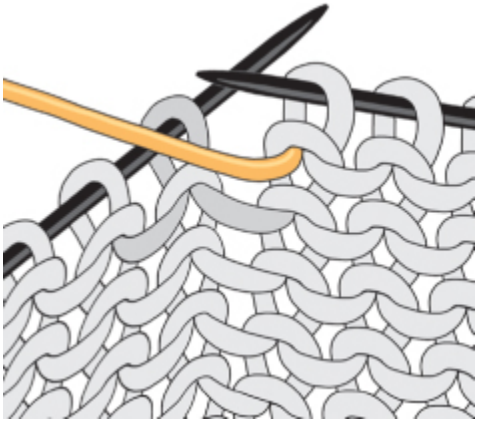


2 … and pull the working yarn through the stitch.

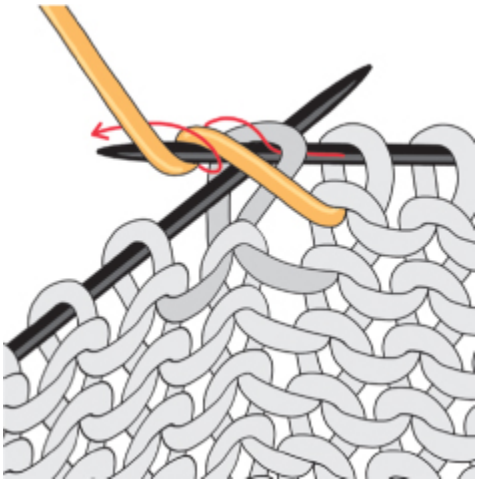


3 Let the stitch slip off the left needle, and gently tighten it on the right needle.

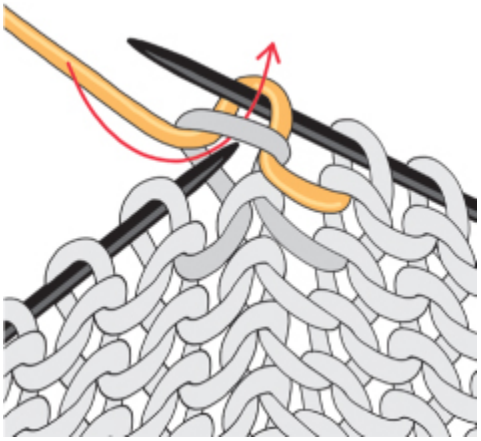
PURL STITCHES



1 Move the working yarn to the front of the work, and place it in front of the needle and the next stitch.

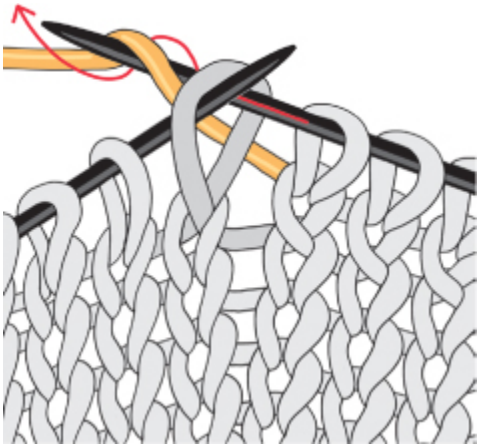


2 Insert the right needle from right to left into the stitch, staying behind the working yarn. Move the needle in the direction of the arrow around the working yarn…

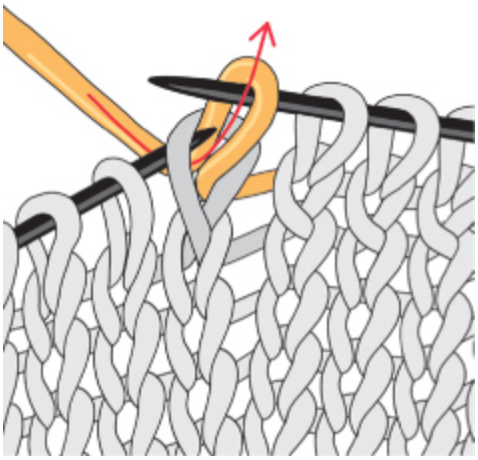


3 & pull the working yarn through the stitch, and let the stitch slip off the left needle.

KNITTING THROUGH THE BACK LOOP

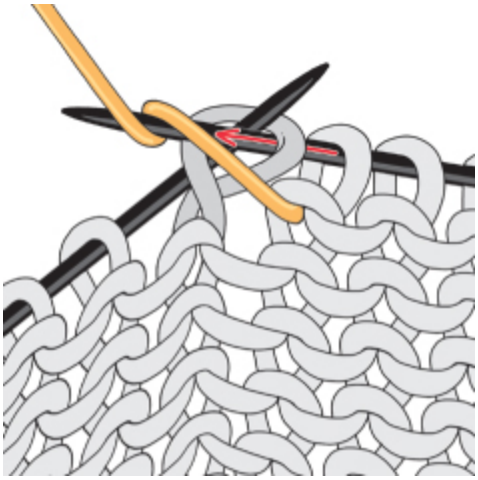


1 Insert the right needle from right to left into the stitch, with working yarn in back of needle.

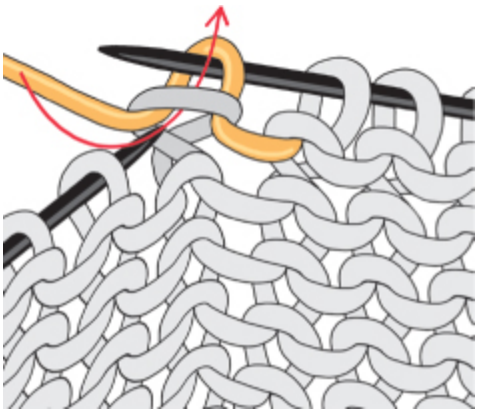


2 Grasp the working yarn as described for the knit stitch, and pull it through the stitch. Let the old stitch slip off the left needle.

PURLING THROUGH THE BACK LOOP



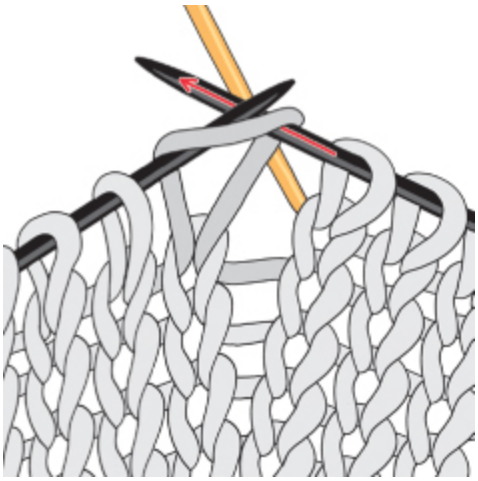
1 Move the working yarn to the front of the work, and insert the right needle in back of work from left to right under the back leg of the stitch.



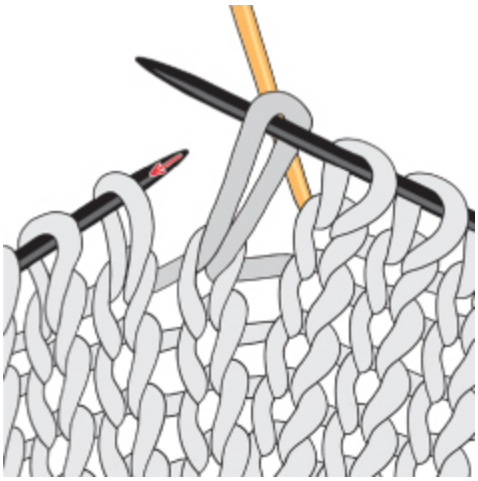
2 Grasp the working yarn as described for the purl stitch, and pull it through the stitch. Let the old stitch slip off the left needle.

SLIPPING STITCHES

KNITWISE (AS IF TO KNIT), WITH WORKING YARN IN BACK OF WORK

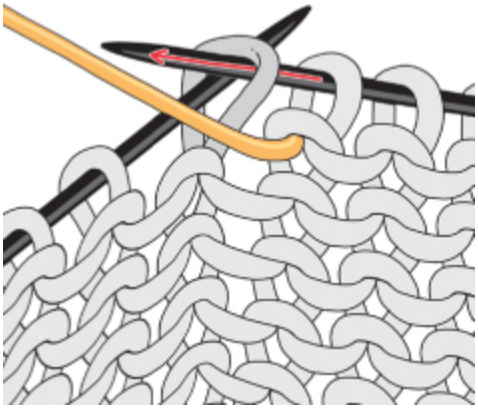


1 Insert the needle into the stitch as if to knit. The working yarn is located in back of work.

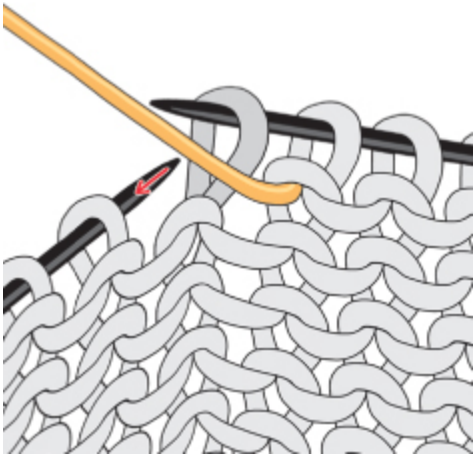


2 Do not pull the working yarn through, but move the stitch from the left to the right needle without working it.

PURLWISE (AS IF TO PURL), WITH WORKING YARN IN FRONT OF WORK

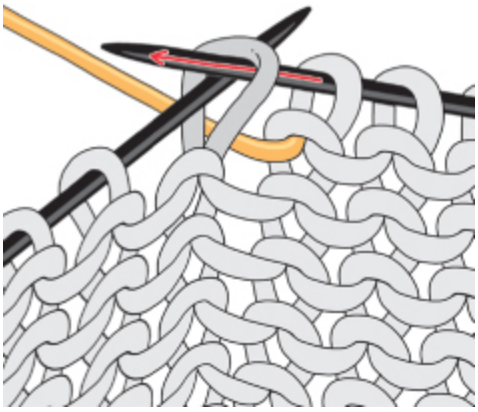


1 Insert the needle into the stitch as if to purl. The working yarn is located in front of work.

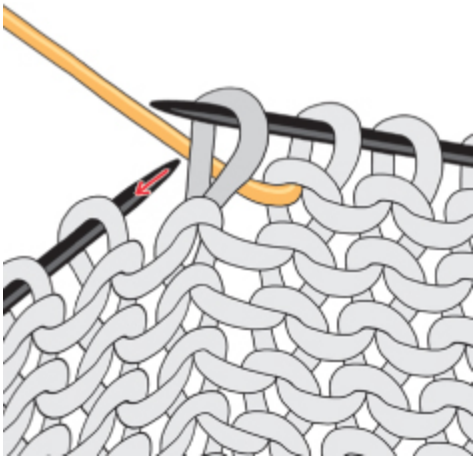


2 Do not pull the working yarn through, but move the stitch from the left to the right needle without working it.

AS IF TO PURL (PURLWISE), WITH WORKING YARN IN BACK OF WORK



1 Insert the needle into the stitch as if to purl. The working yarn is located in back of work.

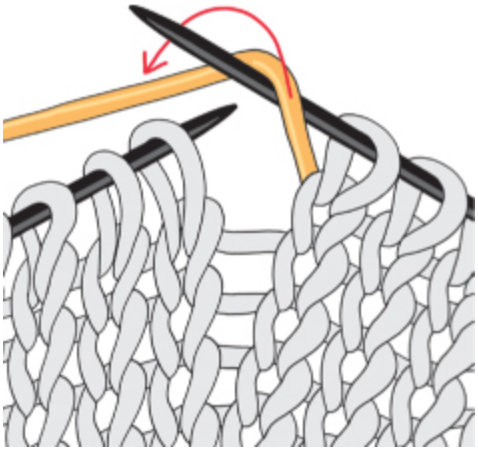


2 Do not pull the working yarn through, but move the stitch from the left to the right needle unworked.

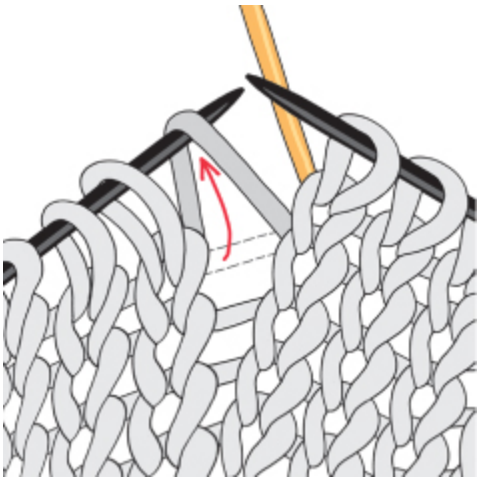
INCREASING STITCHES

INCREASING THROUGH YARN OVERS

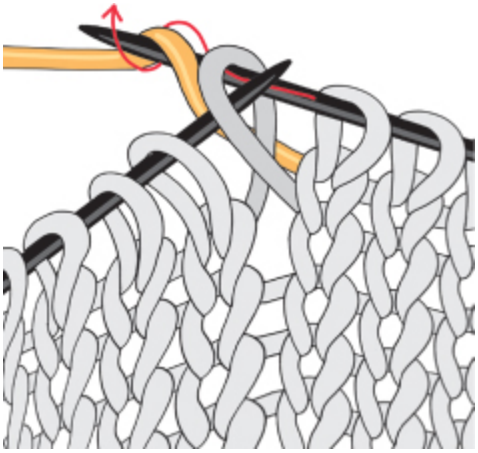
Place the working yarn in front of work as if to purl, then lead it over the right needle to the back.



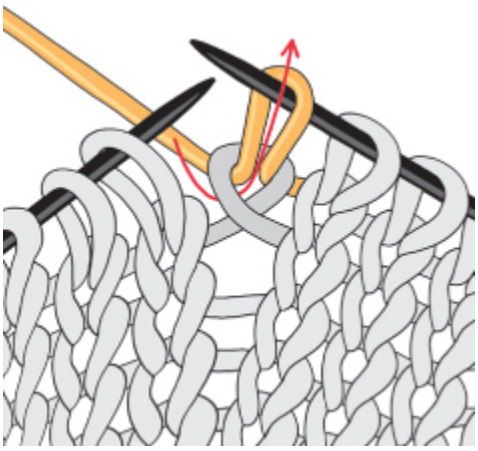
INCREASING KNITWISE TWISTED FROM THE BAR BETWEEN STITCHES



1 Insert the left needle from front to back under the bar between stitches, and lift it onto the needle.



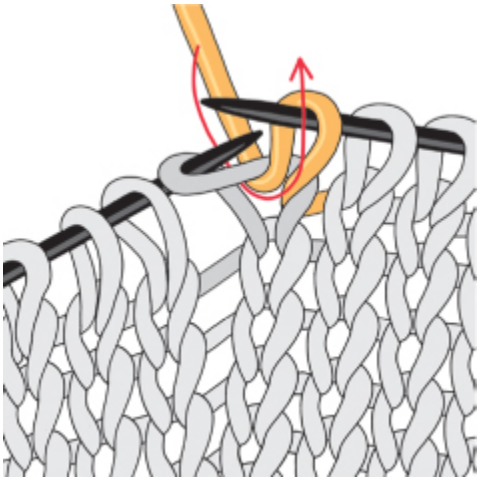
2 Insert the right needle from right to left into the loop created by the bar between stitches, grasp the working yarn…



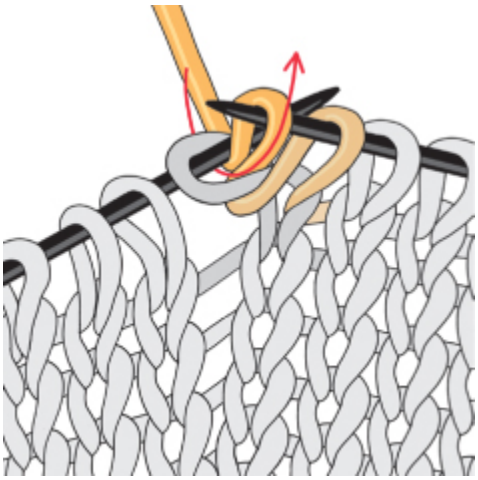
3 … and pull it through the loop. Let the stitch slip off the left needle.

MAKING MULTIPLE STICHES FROM ONE

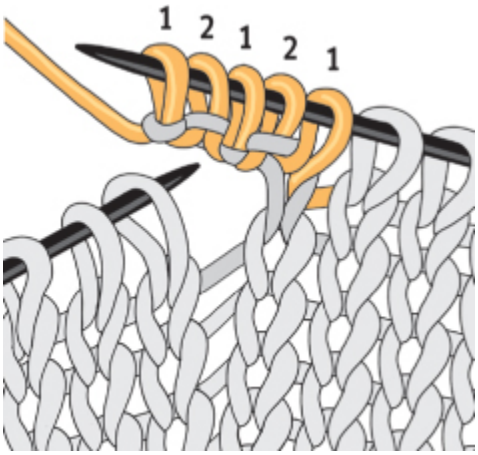
ALTERNATING KNITTING THROUGH THE FRONT AND BACK LEG OF THE STITCH (KFB)



1 Insert the needle into the next stitch from left to right as if to knit, grasp the working yarn, pull it through, and place this loop onto the right needle. Leave the old stitch on the left needle.

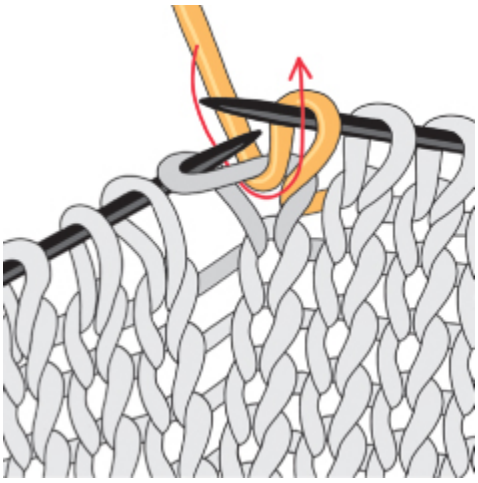


2 Now, insert the needle from right to left through the back loop as if to knit into the same stitch once more, grasp the working yarn, pull it through, and place this loop onto the right needle. Still leave the old stitch on the left needle.

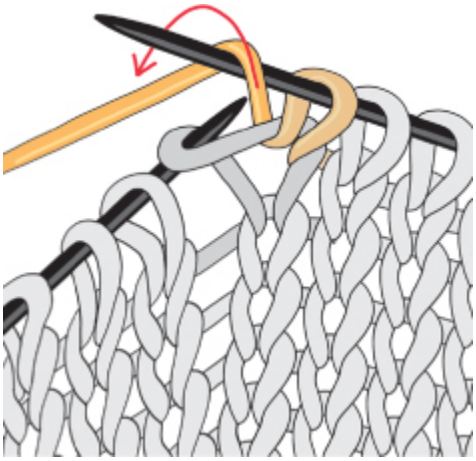


3 Repeat, alternating steps 1 and 2, until the required number of stitches has been created, then let the old stitch slip off the left needle.

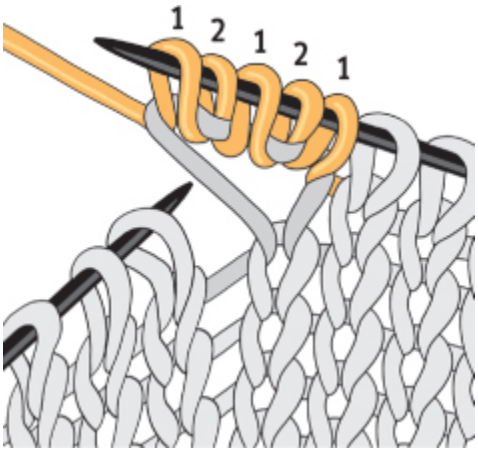
ALTERNATING KNITWISE INCREASES WITH YARN OVERS



1 Insert the needle into the next stitch from left to right as if to knit, grasp the working yarn, pull it through, and place this loop onto the right needle. Leave the old stitch on the left needle.

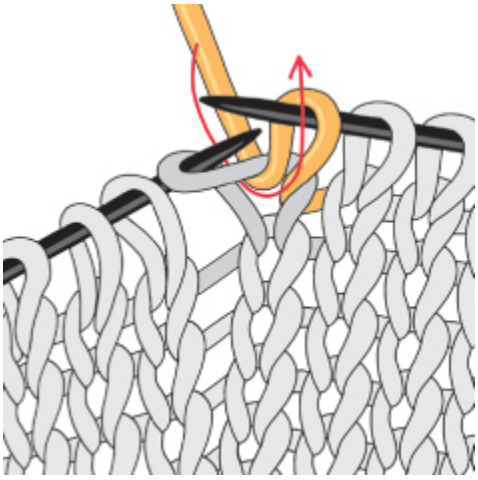


2 Move the working yarn to the front of the work, then place it over the right needle to the back as done for a yarn over. Still leave the old stitch on the left needle.

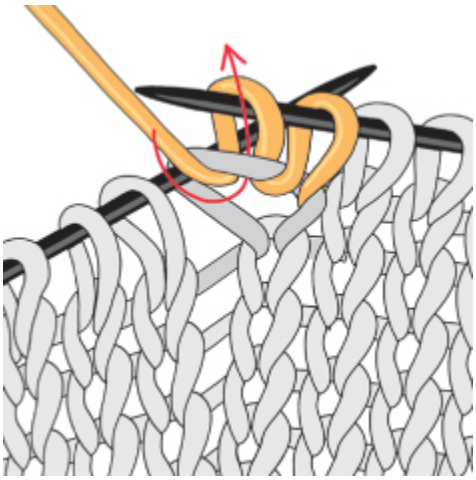


3 Repeat, alternating steps 1 and 2, until the required number of stitches has been created, ending with step 1, then let the old stitch slip off the left needle.

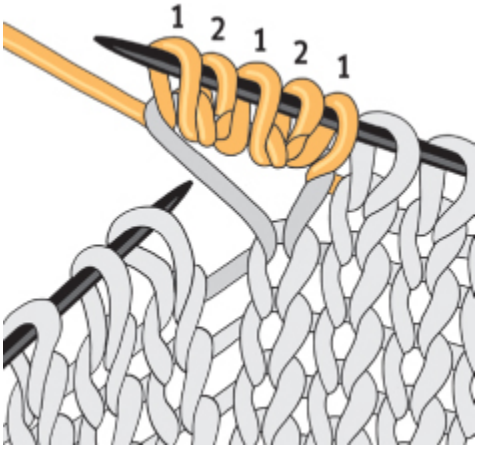
ALTERNATING KNITWISE AND PURLWISE INCREASES



1 Insert the needle into the next stitch from left to right as if to knit, grasp the working yarn, pull it through, and place this loop onto the right needle. Leave the old stitch on the left needle.



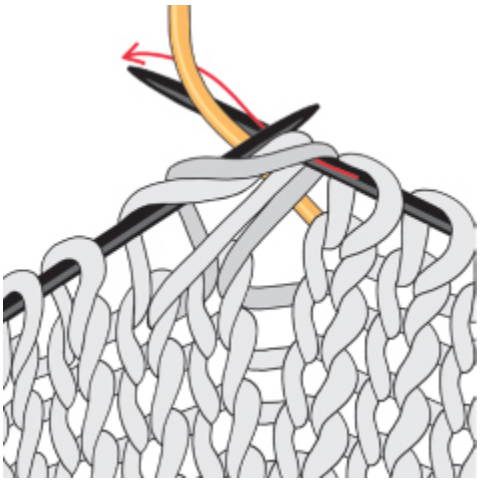
2 Now, insert the right needle from right to left into this stitch as if to purl, grasp the working yarn, pull it through, and place this loop onto the right needle. Still leave the old stitch on the left needle.



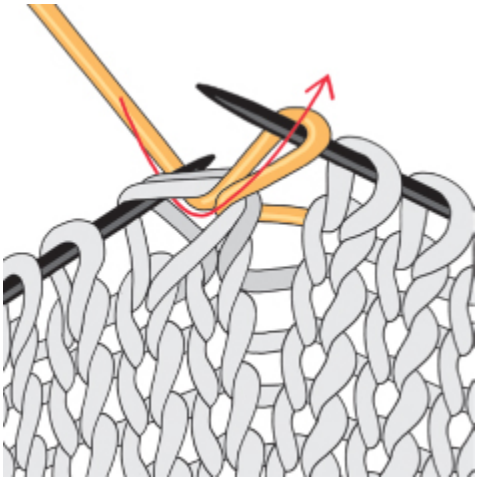
3 Repeat, alternating steps 1 and 2, until the required number of stitches has been created, then let the old stitch slip off the left needle.

DECREASING STITCHES

KNITTING TWO STITCHES TOGETHER RIGHT-LEANING (K2TOG)

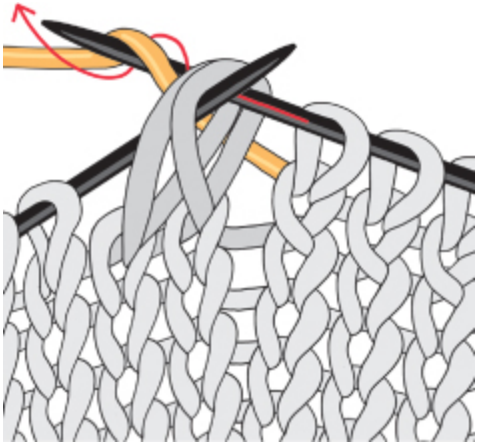


1 Insert the right needle as if to knit into the two following stitches together, grasp the working yarn…

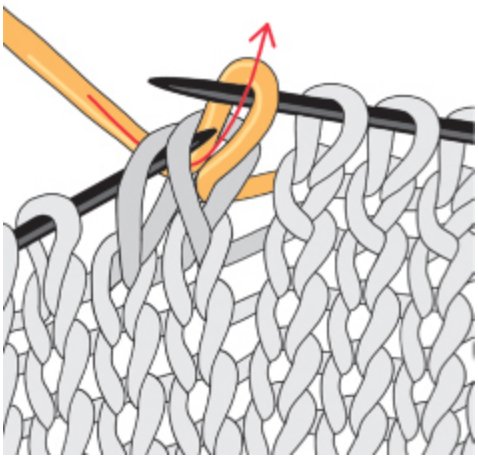


2 … and knit both stitches together as one.

KNITTING TWO STITCHES TOGETHER LEFT-LEANING

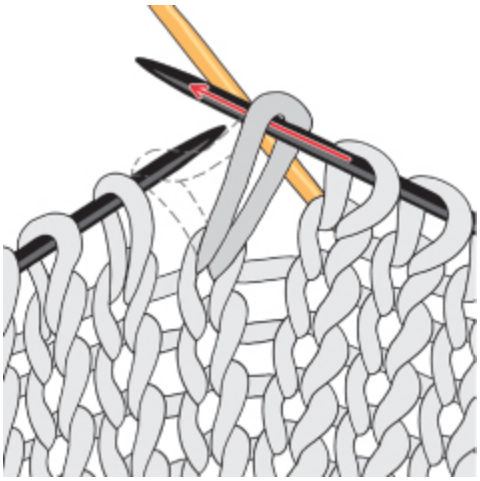


1 Insert the right needle as if to knit through the back loops into the two following stitches together, grasp the working yarn…

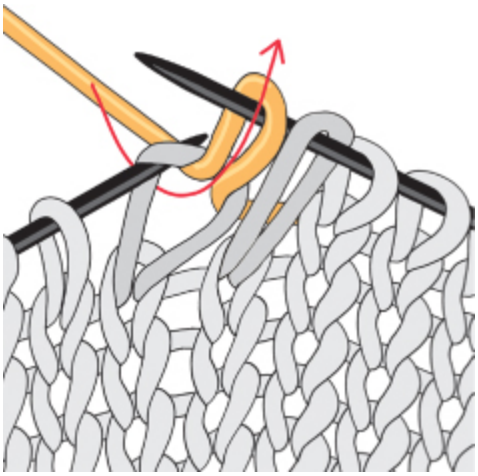


2 & and knit both stitches together as one through the back loop.

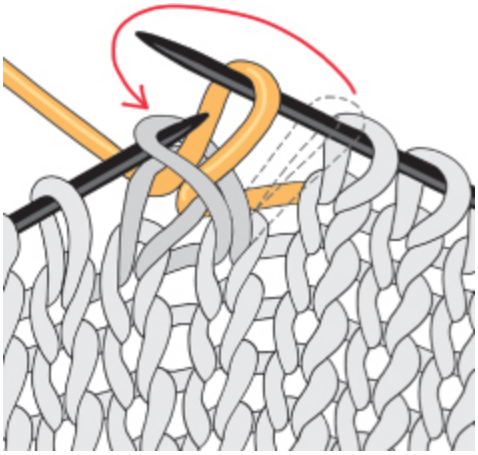
KNITTING TWO STITCHES TOGETHER LEFT-LEANING WITH PASSING OVER (SKP)



1 Slip one stitch as if to knit.



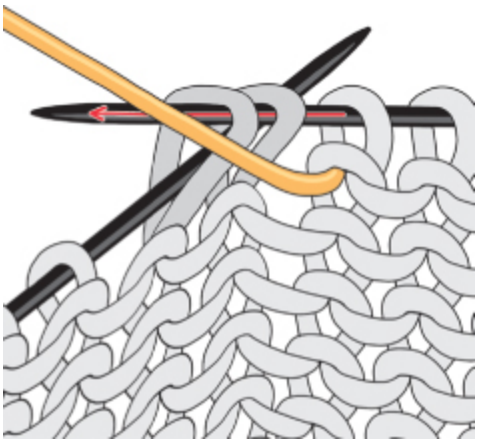
2 Knit the next stitch…



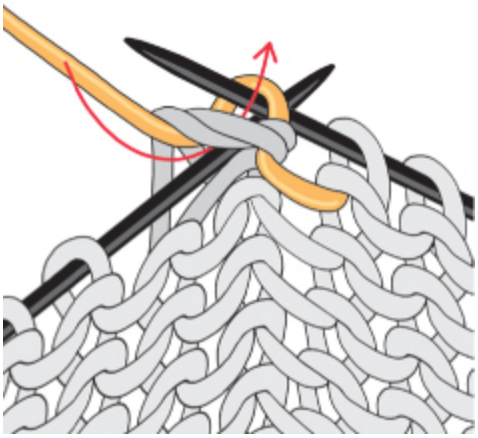
3 … and, using the left needle, pass the slipped stitch over the previously knitted stitch and the right needle. Let the old stitch slip off the left needle.

PLEASE NOTE: Alternatively, you can slip the two stitches one after another as if to knit, return both together to the left needle, then knit them together through the back loop (ssk).

PURLING TWO STITCHES TOGETHER (WILL BE RIGHT-LEANING ON THE RIGHT SIDE OF THE FABRIC)

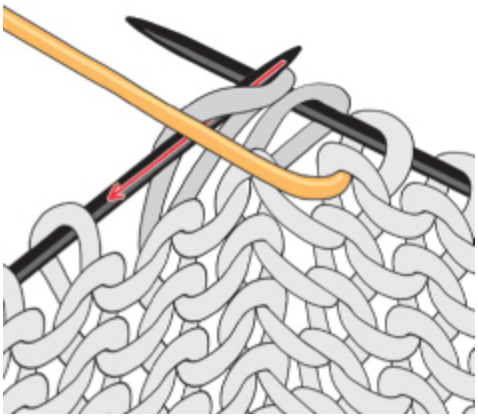


1 Move the working yarn to the front of the work. Insert the right needle into the following two stitches together as if to purl…

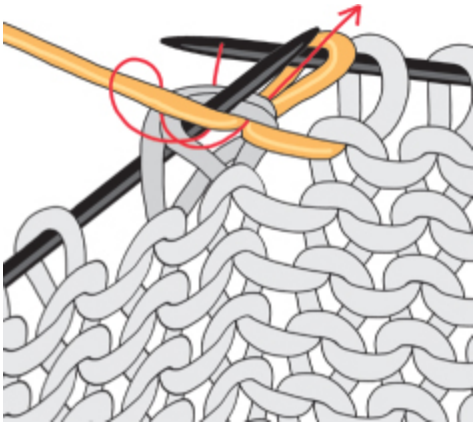


2 … grasp the working yarn, and purl both stitches together as one.

PURLING TWO STITCHES TOGETHER (WILL BE LEFT-LEANING ON THE RIGHT SIDE OF THE FABRIC)

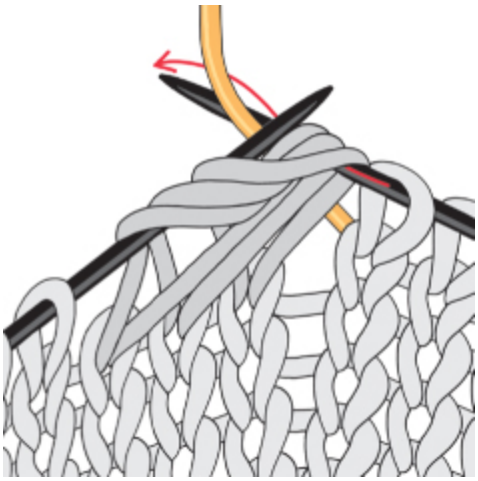


1 Move the working yarn to the front of the work. Slip two stitches one after another as if to knit…

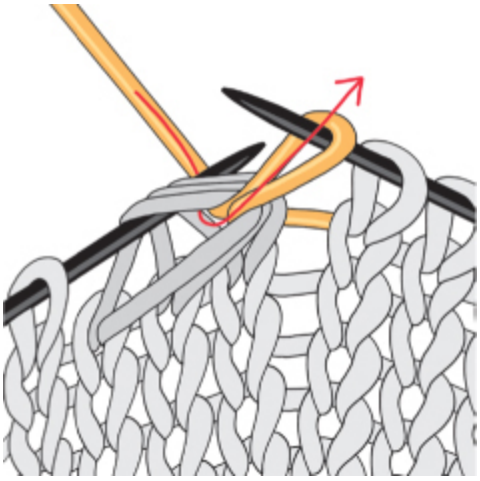


2 … return them to the left needle, and purl both stitches together through the back loop.

KNITTING THREE STITCHES TOGETHER RIGHT-LEANING (K3TOG)

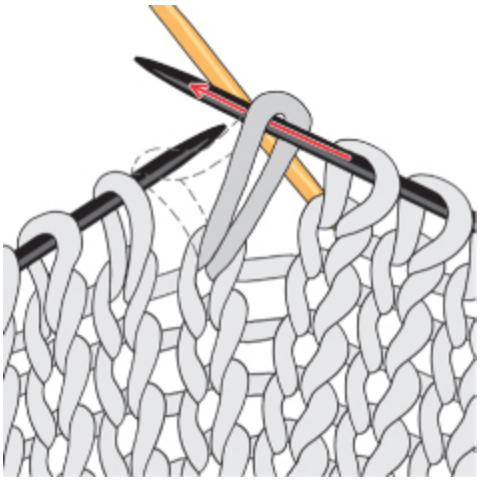


1 Insert the right needle as if to knit into the three following stitches together, grasp the working yarn…

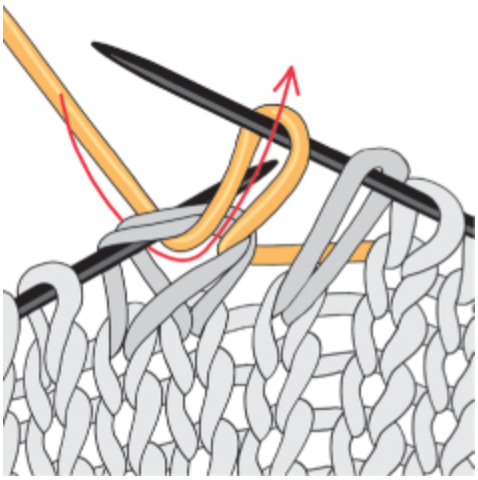


2 … and knit all three stitches together as one.

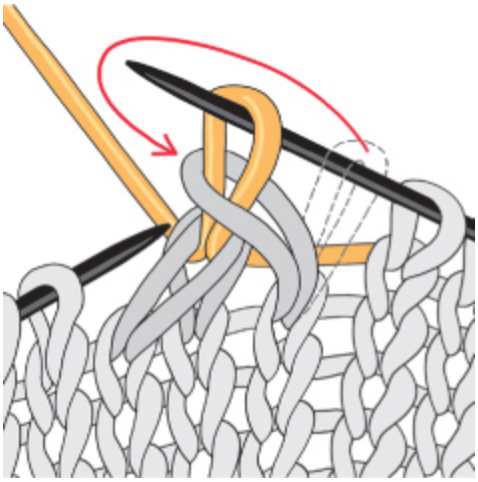
KNITTING THREE STITCHES TOGETHER LEFT-LEANING WITH PASSING OVER (SK2P)



1 Slip one stitch as if to knit.

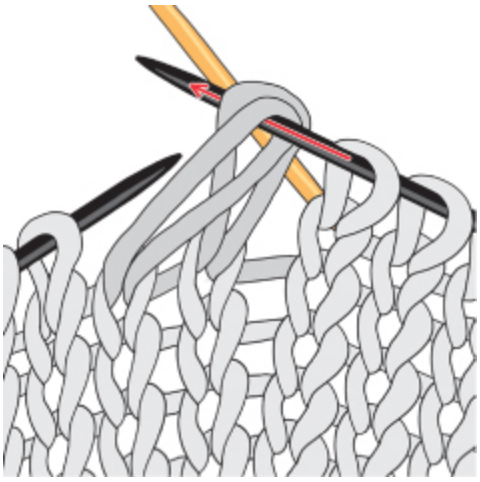


2 Knit the next two stitches together…

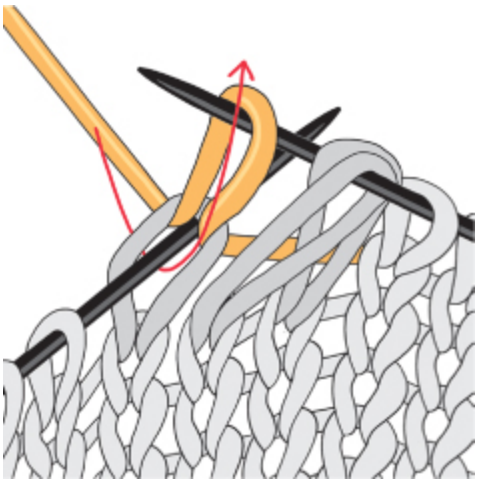


3 & and, using the left needle, pass the slipped stitch over the two previously knit stitches and the right needle. Let the old stitch slip off the left needle.

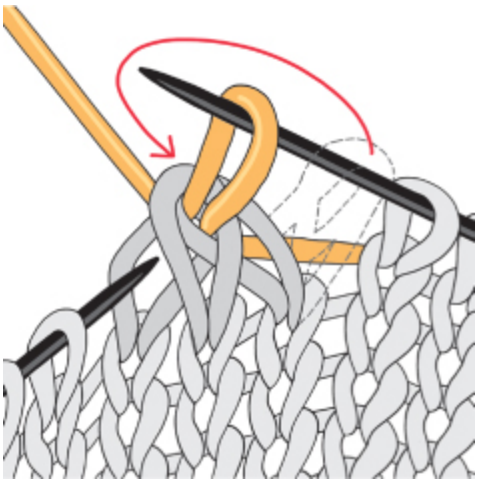
KNITTING THREE STITCHES TOGETHER WITH CENTER STITCH ON TOP (CENTERED DOUBLE DECREASE; CDD)



1 Slip two stitches together as if to knit.



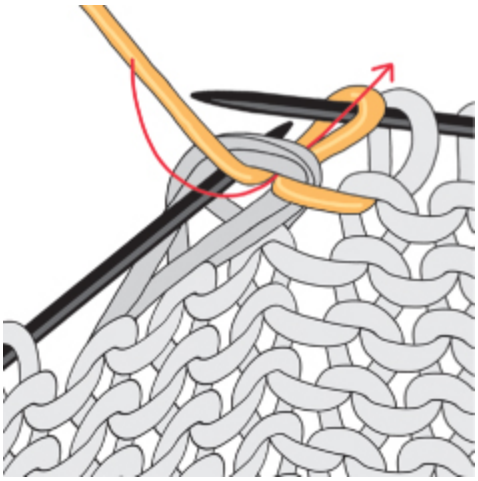
2 Knit the next stitch…



3 & and, using the left needle, pass the two slipped stitches over the previously knitted stitch and the right needle. Let the old stitch slip off the left needle.

PURLING THREE STITCHES TOGETHER

1 Move the working yarn to the front of the work. Insert the right needle into the following three stitches together as if to purl…

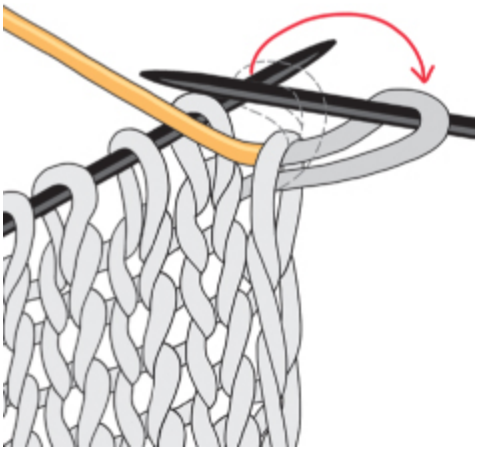


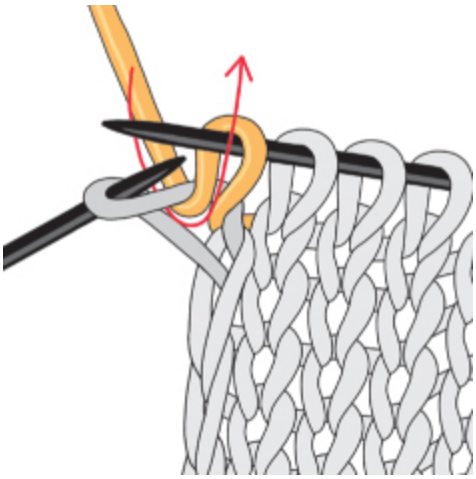
2 … grasp the working yarn, and purl all three stitches together.

SELVEDGE STITCHES

CHAIN SELVEDGE

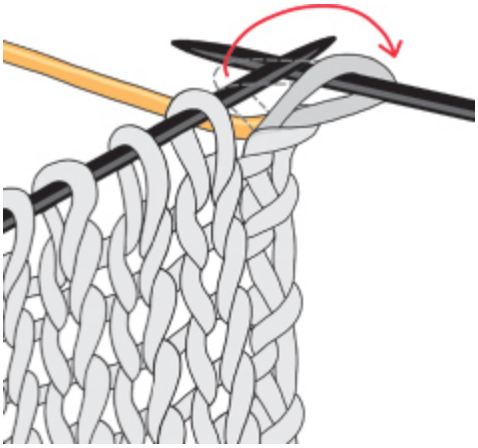
In both right-side and wrong-side rows, always slip the first stitch purlwise with yarn in front of work, and knit the last stitch.

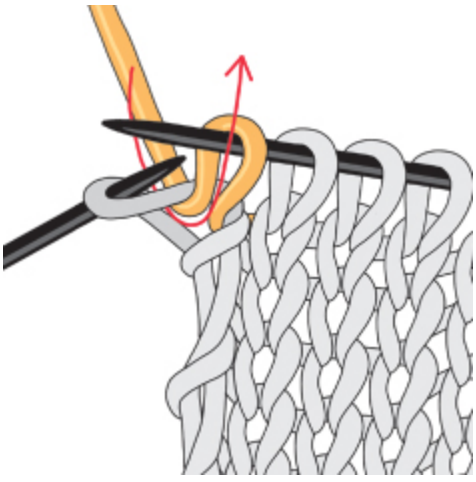




KNOTTED SELVEDGE

In both right-side and wrong-side rows, always slip the first stitch knitwise with yarn in back of work, and knit the last stitch.

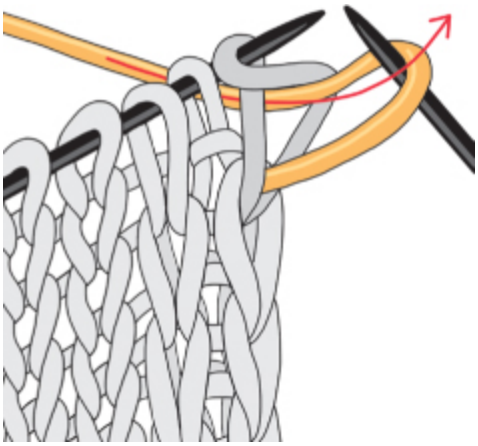


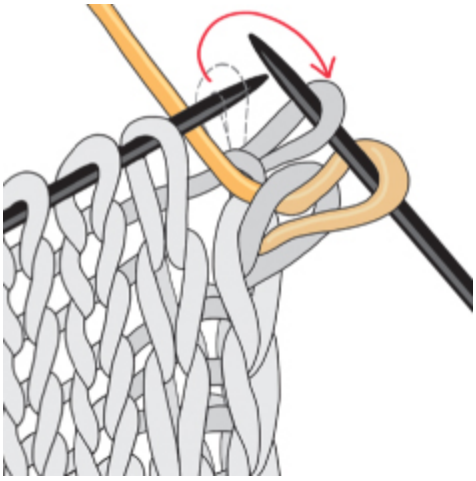


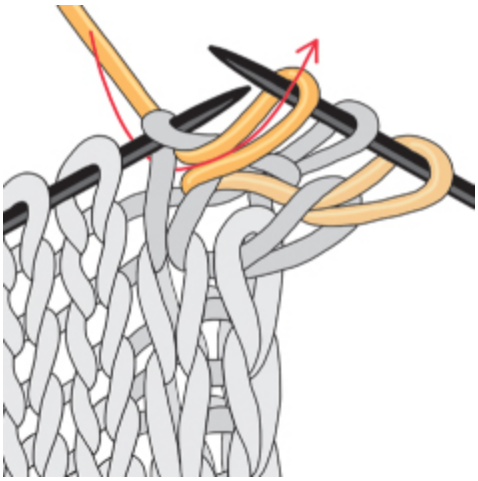
BRIOCHE SELVEDGE

Used for pieces worked in back-and-forth rows in Brioche patterns.

In both right-side and wrong-side rows, always work the first and last three stitches of the row as follows: knit the knit stitches, and slip the purl stitches purlwise, with working yarn in front of work, without working them.

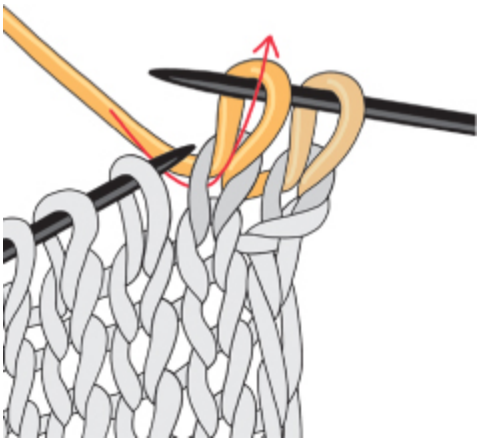




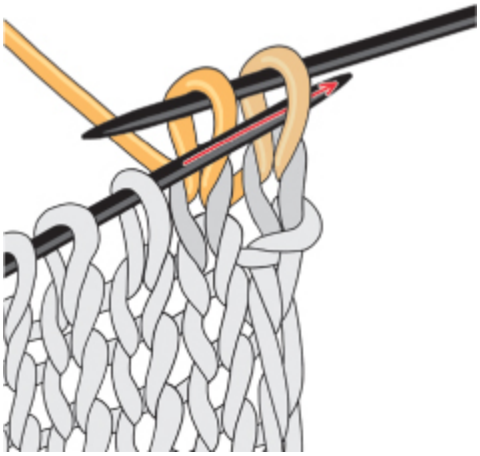


BINDING OFF

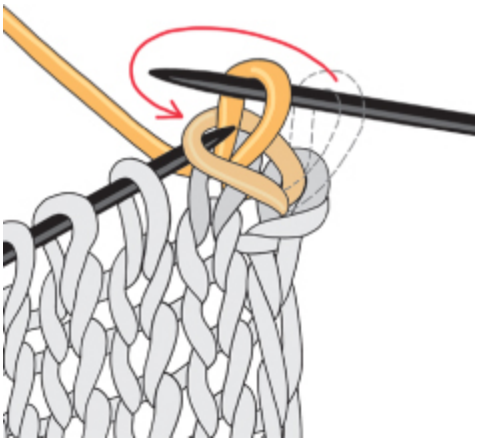
BINDING OFF KNITWISE



1 Knit two stitches.



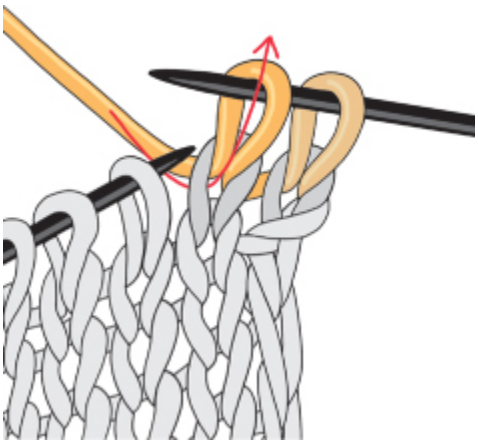
2 Insert the left needle from left to right into the first one of the two stitches…



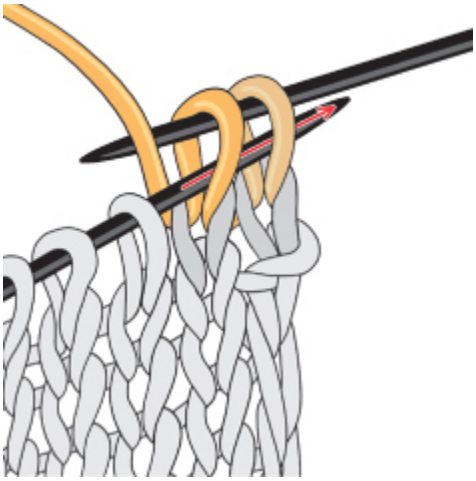
3 … pass this stitch over the second stitch and the right needle, then let it slip off the left needle. Knit the next stitch, and repeat steps 2 and 3.

ELASTIC BIND-OFF

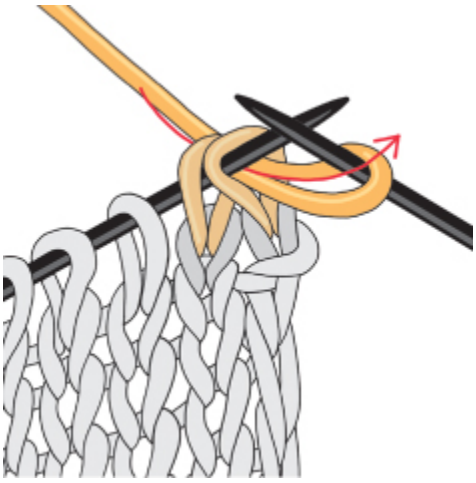
This method produces an especially stretchy edge for all stitch patterns with curved or zigzagging bind-off edges.



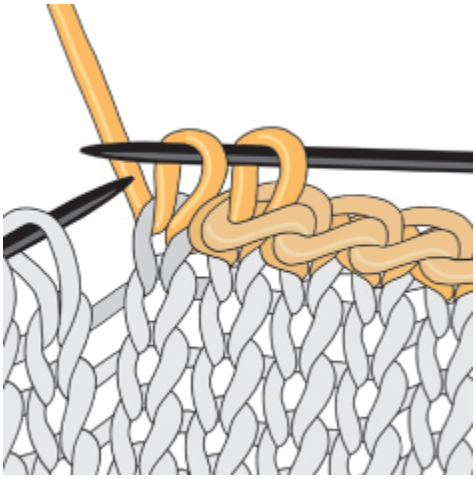
1 Knit two stitches.



2 Insert the left needle from left to right into the two stitches on the right needle together. Lead the working yarn over the right needle…



3 … pull it through both stitches at once, and let the stitches slip off the left needle.



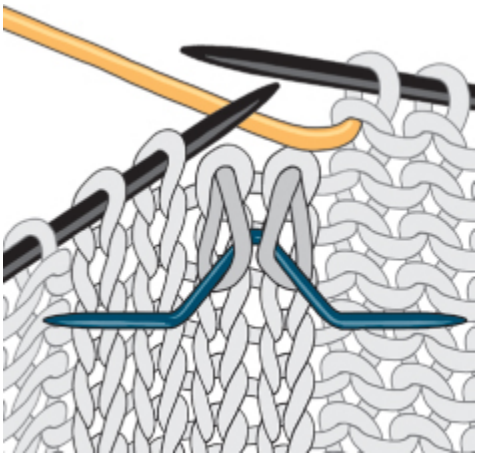
4 Knit the next stitch, and repeat steps 2 and 3.

CABLE PATTERNS

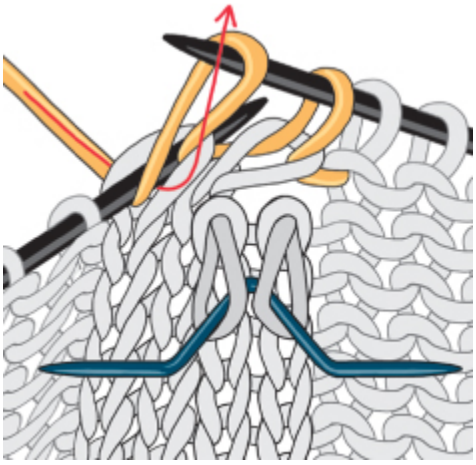
For less experienced knitters, it is recommended to first practice cabling with a cable needle before trying out cabling without one.

CABLING STITCHES TO THE LEFT

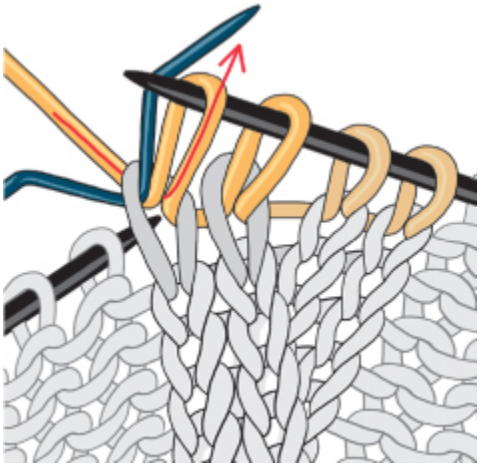
WITH ONE CABLE NEEDLE



1 Place the required number of stitches (in pictured example, two stitches) onto a cable needle as if to purl, and hold the cable needle in front of work.

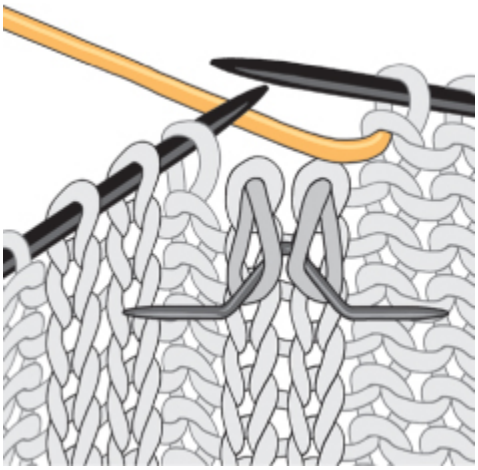


2 Work the remaining cable stitches (in pictured example, two stitches) in the stitch pattern listed for the cable.

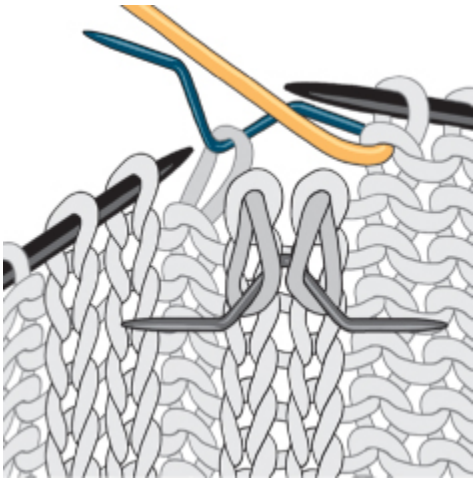


3 Then work the stitches from the cable needle in the stitch pattern listed for the cable.

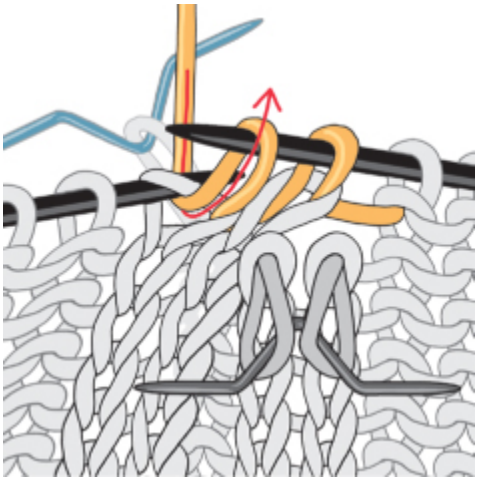
WITH TWO CABLE NEEDLES



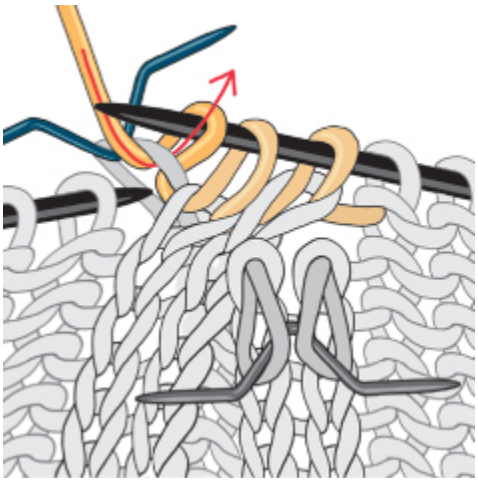
1 Place the required number of stitches for the first group of stitches (in pictured example, two stitches) onto the first cable needle as if to purl, and hold the cable needle in front of work.



2 Now, place the second group of stitches (in pictured example, one stitch) onto the second cable needle as if to purl, and hold the cable needle behind work.



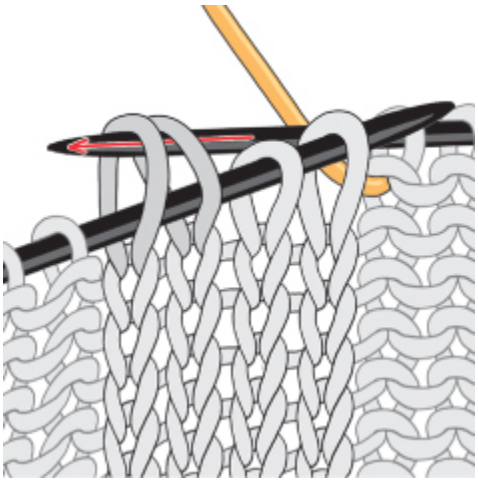
3 Work the remaining stitches of the third group of stitches in the stitch pattern listed for the cable.



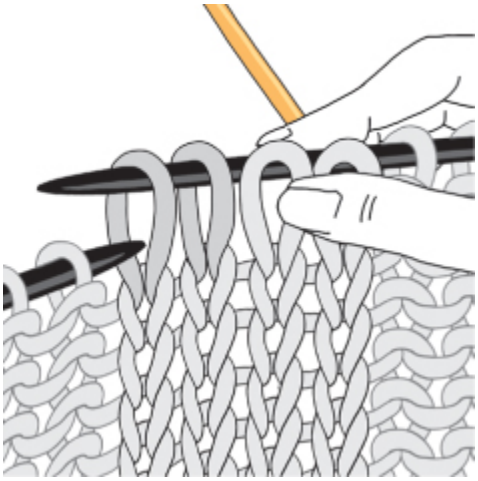
4 First, work the stitches from the second cable needle in the stitch pattern listed for the cable (in pictured example, purl)…

5 & then work the stitches from the first cable needle in the stitch pattern listed for the cable.

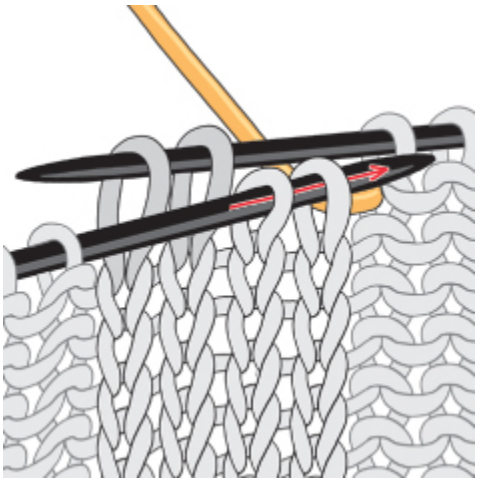
WITHOUT CABLE NEEDLE



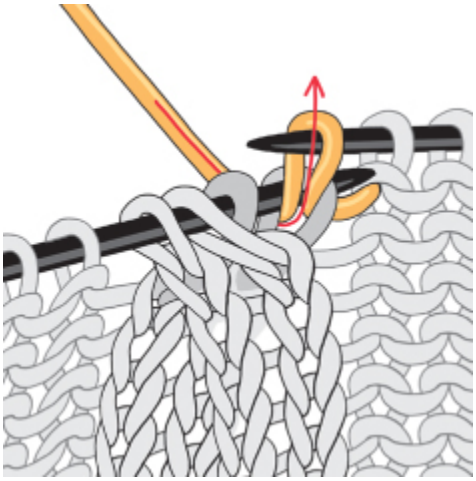
1 Insert the right needle behind the stated number of stitches (in pictured example, two stitches), bypassing them, into the stated number of following stitches (in pictured example, two stitches) on the left needle as if to purl. The working yarn is located behind the stitches.



2 Pull the left needle out of the stitches to be cabled. The stitches of the right needle stay on the needle, and the remaining stitches stay unsecured in front of the needle. Secure the live stitches by lightly pressing them with your thumb against the right needle.



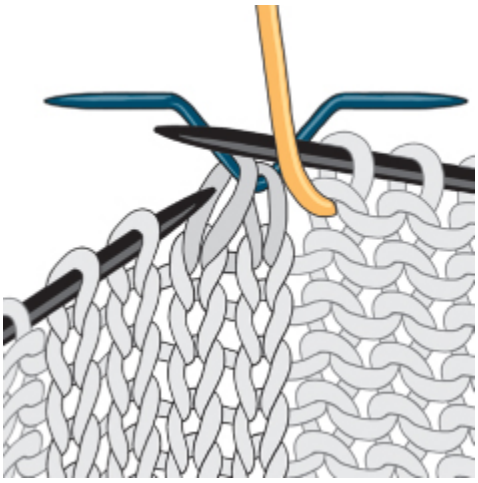
3 Insert the left needle into the open stitches in front of work from left to right to catch them.



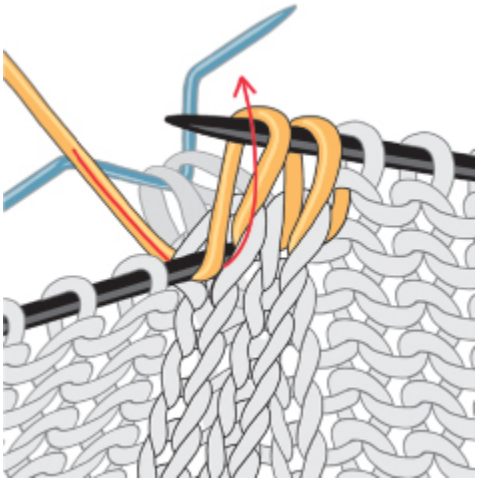
4 Return the stitches from the right needle to the left needle as if to knit, and work the cable stitches in the new order.

CABLING STITCHES TO THE RIGHT

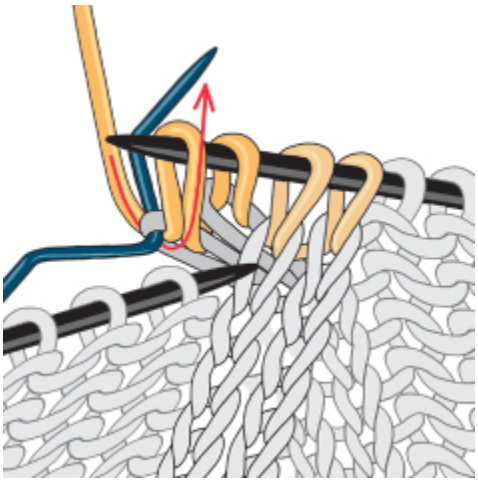
WITH ONE CABLE NEEDLE



1 Place the required number of stitches (in pictured example, two stitches) onto a cable needle as if to purl, and hold the cable needle behind work.

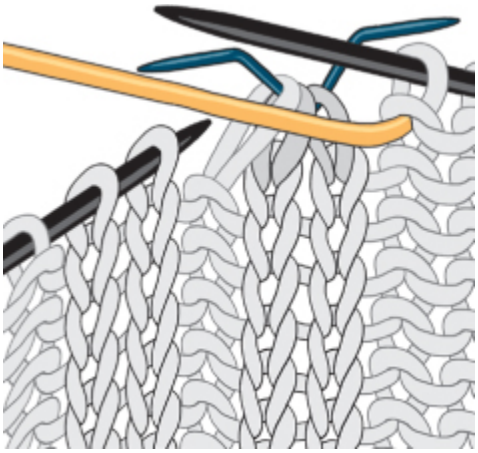


2 Work the remaining stitches (in pictured example, two stitches) in the stitch pattern listed for the cable.

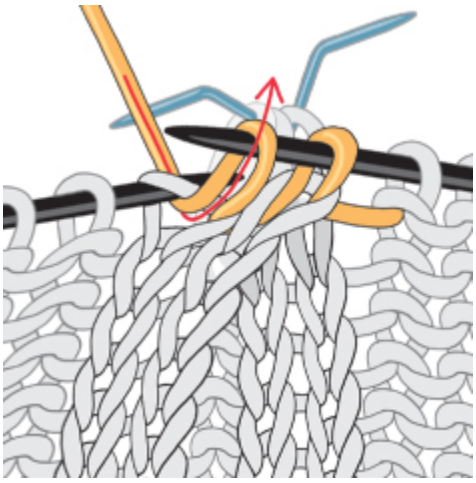


3 Then work the stitches from the cable needle in the stitch pattern listed for the cable.

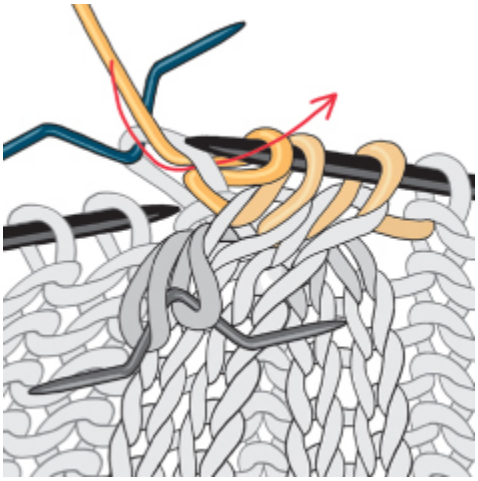
WITH TWO CABLE NEEDLES



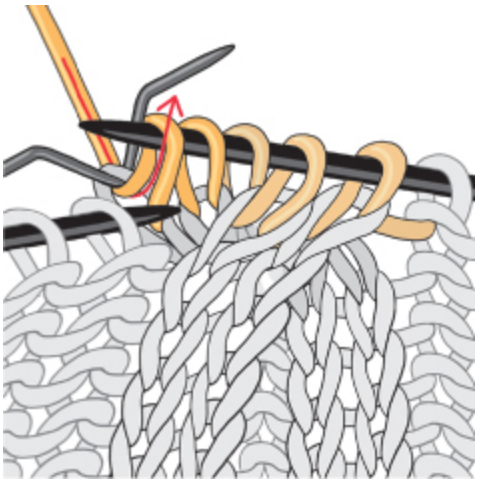
1 Place the required number of stitches (in pictured example, three stitches) first onto a cable needle as if to purl, and hold the cable needle behind work.



2 Work the remaining stitches in the stitch pattern listed for the cable.

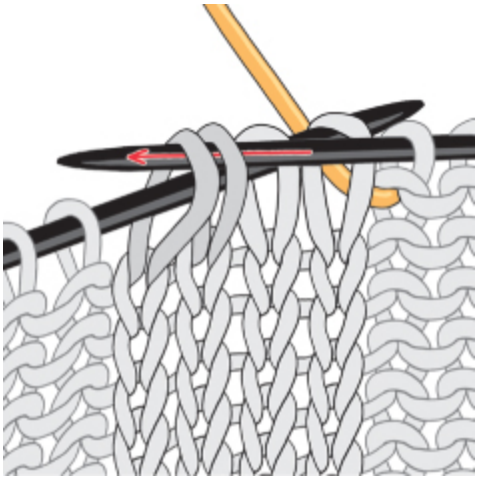


3 Then take up a second cable needle, and slip the required number of stitches (in pictured example, two stitches) from the first cable needle to the second as if to purl, and hold in front of work. Work the remaining stitches from the first cable needle in the listed pattern (in pictured example, purl one stitch)…

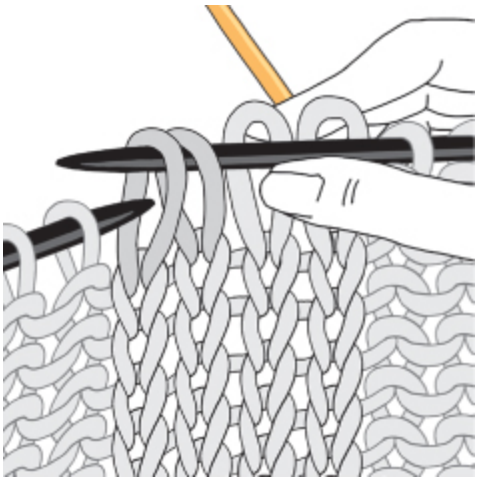


4 … then work the stitches from the second cable needle in the stitch pattern listed for the cable.

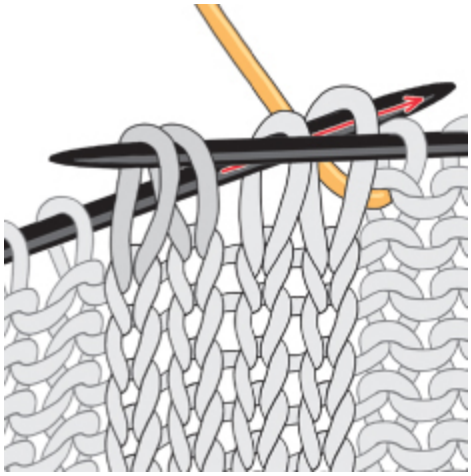
WITHOUT CABLE NEEDLE



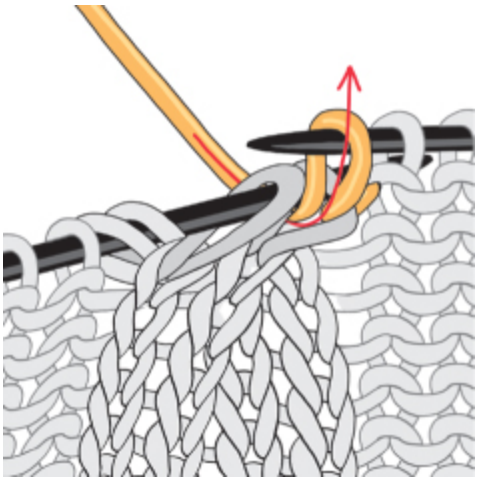
1 Insert the right needle in front of the listed number of stitches (in pictured example, two stitches), bypassing them, into the stated number of following stitches (in pictured example, two stitches) on the left needle as if to purl. The working yarn is located behind the stitches.



2 Pull the left needle out of the stitches to be cabled. The stitches of the right needle stay on the needle, and the remaining stitches stay unsecured behind the needle. Secure the live stitches by lightly pressing them with your thumb against the right needle.



3 Insert the left needle into the open stitches behind work from left to right to catch them.

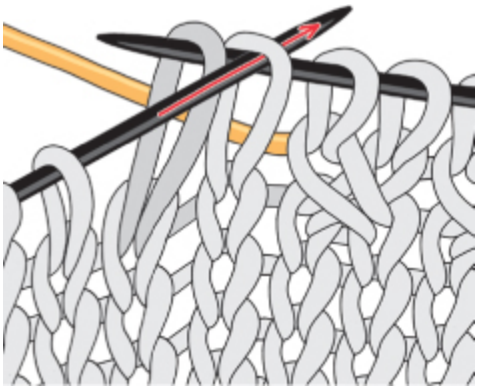


4 Return the stitches from the right needle to the left needle as if to knit, and work the cable stitches in the new order.

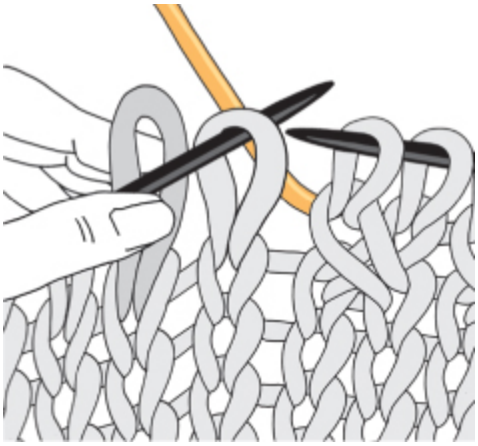
CROSSED STITCHES

Crossed stitches are stitches, either knitted or knitted through the back loop, that are arranged into decorative patterns by crossing them with each other, or pulling them across other stitches. For less experienced knitters, it is recommended to first practice using a cable needle before trying out crossing stitches without one (see “cabling stitches”).

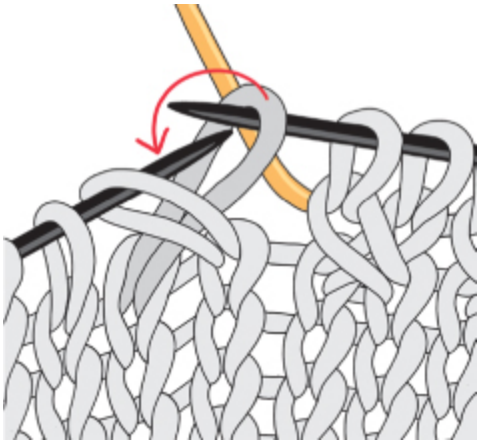
CROSSING TWO STITCHES TO THE LEFT



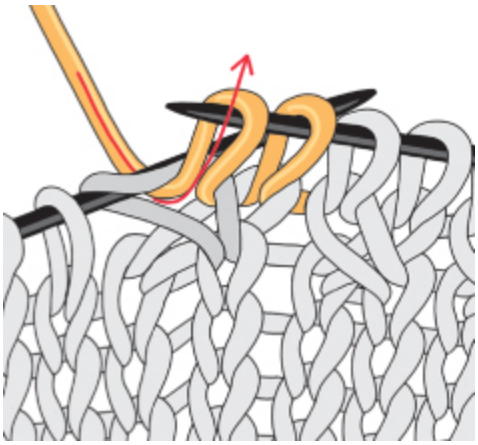
1 Slip both stitches to be crossed onto the right needle as if to purl, with yarn in back of work. Insert the left needle in front of the first stitch (counted from the tip of the needle), bypassing it, into the second stitch on the right needle as if to knit.



2 Pull the right needle out of both stitches. The second stitch remains on the left needle, and the first stitch stays unsecured behind the needle. Secure the live stitch by lightly pressing it with your thumb against the left needle.

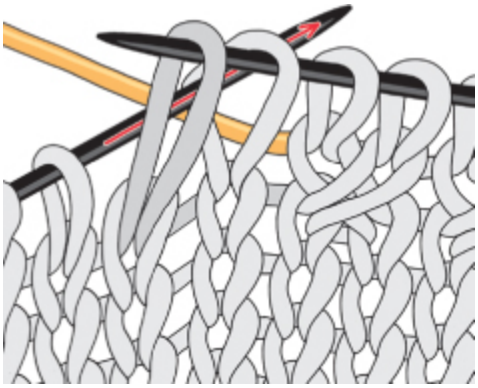


3 Insert the right needle into the live stitch behind work to catch it, and place it onto the left needle as if to purl.

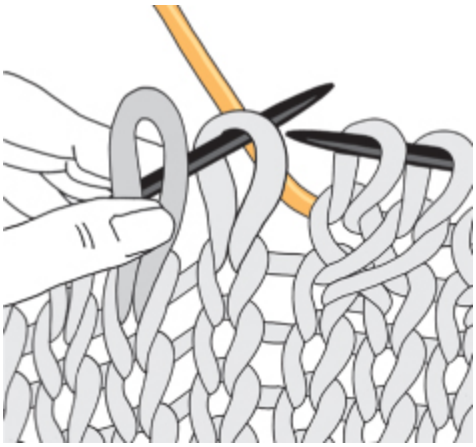


4 Work both stitches individually according to the instructions, either knitting them or knitting them through the back loop.

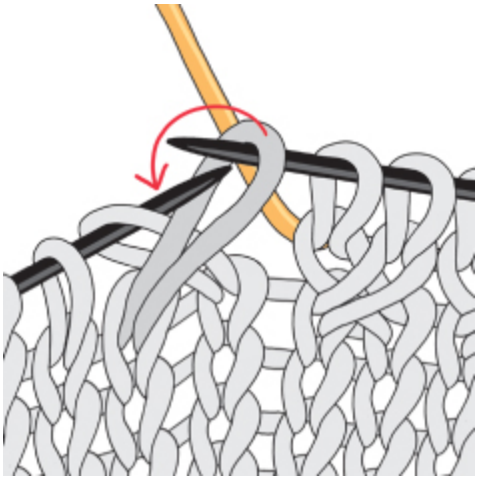
CROSSING TWO STITCHES TO THE RIGHT



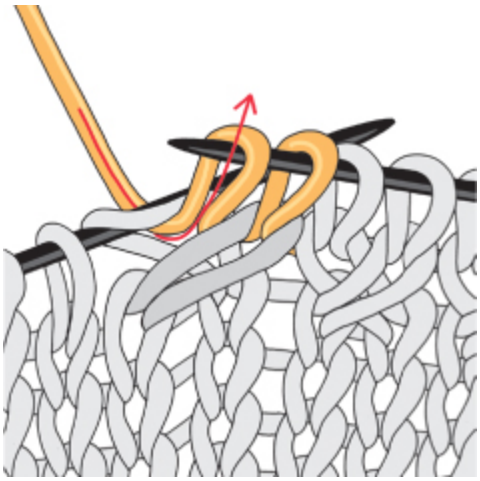
1 Slip both stitches to be crossed onto the right needle as if to purl, with yarn in back of work. Insert the left needle behind the first stitch (counted from the tip of the needle), bypassing it, into the second stitch on the right needle as if to knit.



2 Pull the right needle out of both stitches. The second stitch remains on the left needle, and the first stitch stays unsecured in front of the needle. Secure the live stitch by lightly pressing it with your thumb against the left needle.



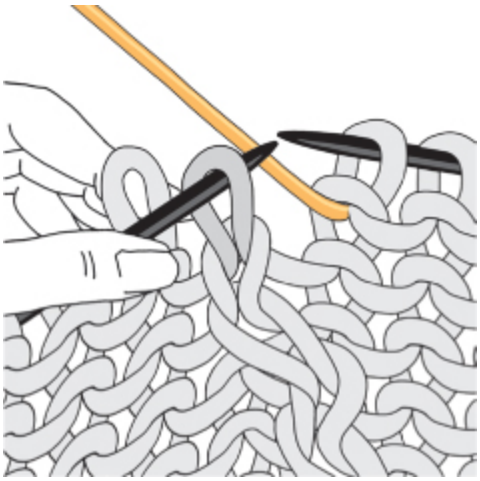
3 Insert the right needle into the open stitch in front of work to catch it, and place it onto the left needle as if to purl.



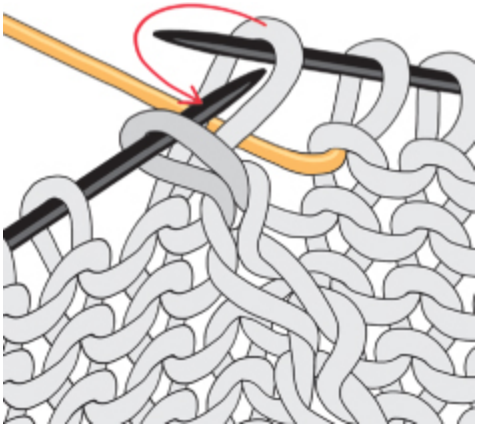
4 Work both stitches individually according to the instructions, either knitting them or knitting them through the back loop.

STITCH TRAVELING TO THE LEFT

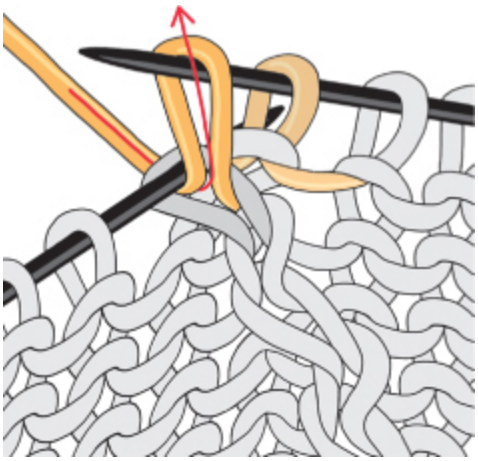
1 Place the traveling stitch and the following purl stitch onto the right needle as if to purl, with yarn in back of work. Insert the left needle in front of the purl stitch (= first stitch as counted from the tip of the needle), bypassing it, into the traveling stitch (= second stitch) on the right needle as if to knit.



2 Pull the right needle out of both stitches. The traveling stitch remains on the left needle, and the purl stitch stays unsecured behind the needle. Secure the live stitch by lightly pressing it with your finger against the left needle.

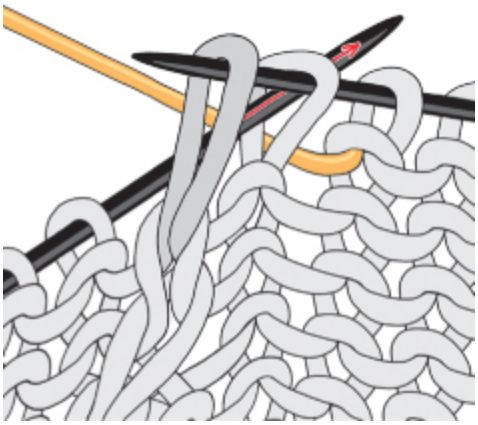


3 Insert the right needle into the live stitch behind work to catch it, and place it onto the left needle as if to purl.

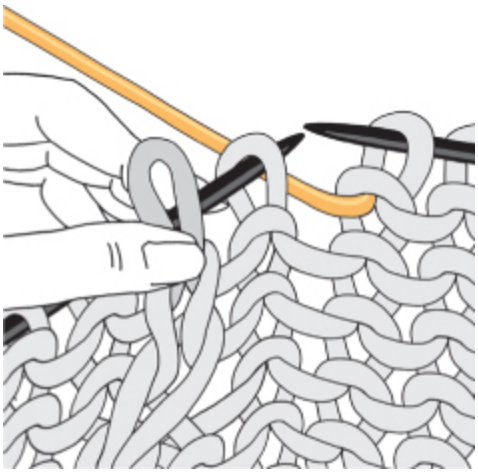


Purl the purl stitch, and work the traveling stitch according to the instructions, either knitting it or knitting it through the back loop.

STITCH TRAVELING TO THE RIGHT

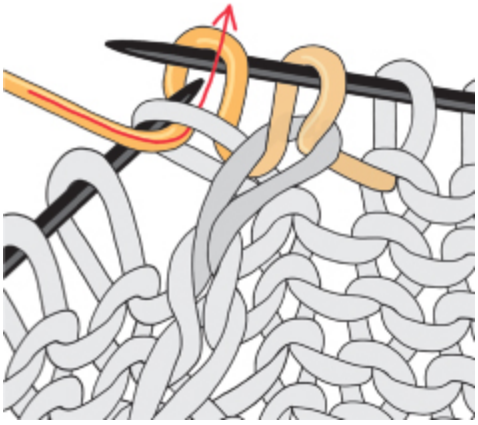


1 Slip the purl stitch and the following traveling stitch as if to purl with yarn in back of work onto the right needle. Insert the left needle behind the traveling stitch (= first stitch as counted from the tip of the needle), bypassing it, then into the purl stitch (= second stitch) on the right needle as if to knit.



2 Pull the right needle out of both stitches. The purl stitch remains on the left needle, and the traveling stitch stays unsecured in front of the needle. Secure the live stitch by lightly pressing it with your thumb against the left needle.

3 Insert the right needle into the open stitch in front of work to catch it, then place it onto the left needle as if to purl.

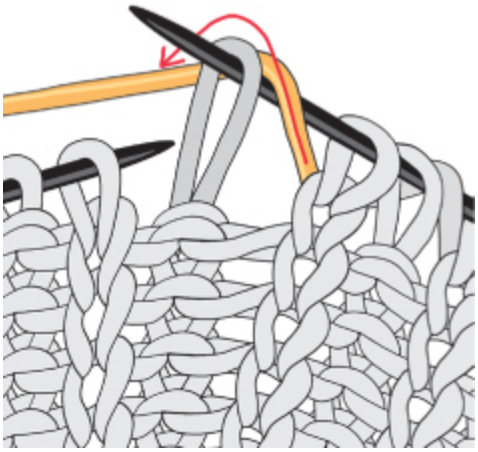


4 Work the traveling stitch according to the pattern, either knitting it or knitting it through the back loop, and purl the purl stitch.

BRIOCHE STITCHES

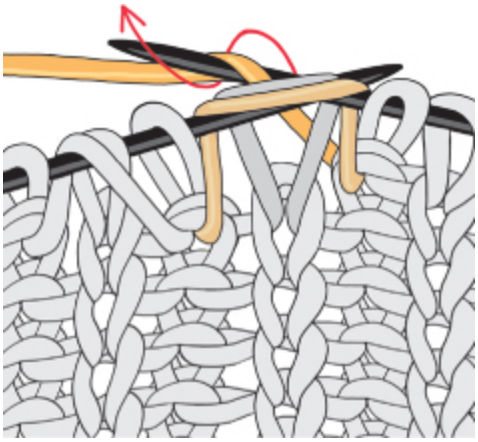
SLIPPING A STITCH PURLWISE TOGETHER WITH ITS ACCOMPANYING YARN OVER

1 Move the working yarn to the front of the work. Behind the working yarn, insert the needle into the following stitch as if to purl, and place the working yarn from front to back over the stitch like a yarn over.

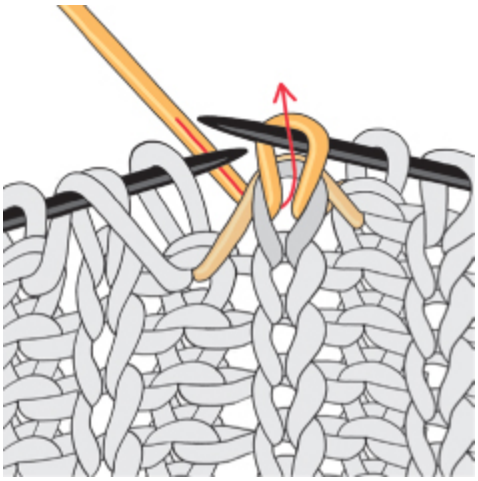


2 Slip the stitch together with the yarn over onto the right needle without working it.

KNITTING A STITCH TOGETHER WITH THE FOLLOWING YARN OVER

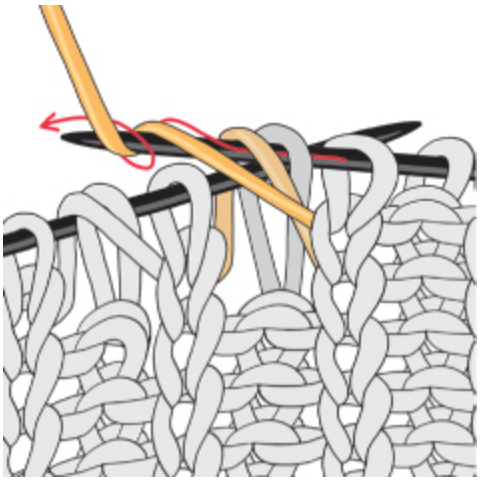


1 Insert the right needle into the following stitch and the yarn over across it together as if to knit, grasp the working yarn…

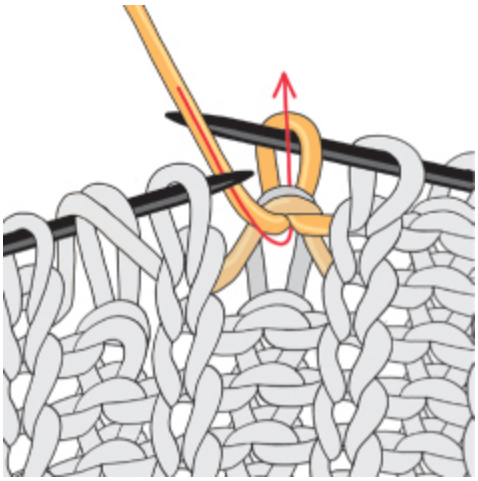


2 … and knit the stitch and the yarn over together.

PURLING A STITCH TOGETHER WITH THE FOLLOWING YARN OVER



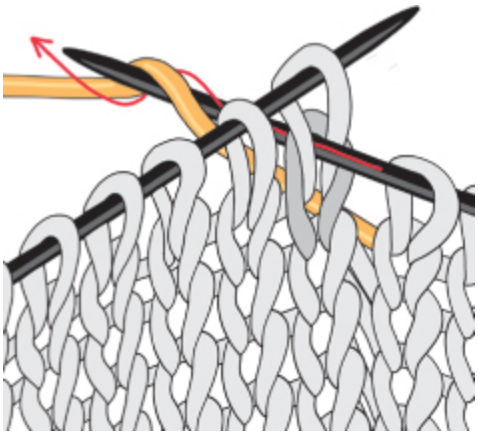
1 Move the working yarn to the front of the work. Insert the right needle into the following stitch and the yarn over across it together as if to purl…



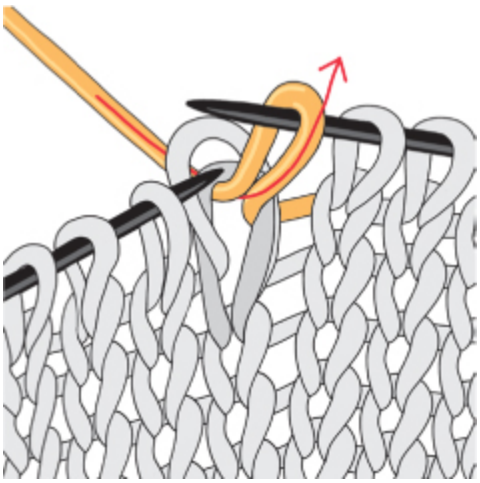
2 … and pull the working yarn through, purling the stitch and the yarn over together.

MULTI-ROW PATTERNS (KNITTED SPIKE STITCHES)

ONE ROW BELOW



1 Insert the right needle into the stitch one row below as if to knit…

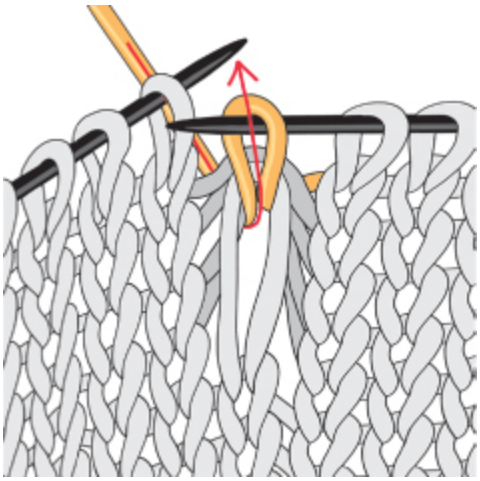


2 … pull the working yarn through the stitch, and let the stitch slip off the left needle. This undoes the stitch above it. Treating the undone stitch as you would a yarn over, knit it together with the stitch.

SEVERAL ROWS BELOW

In the same way, insert the needle into stitches several rows below, and undo the column of stitches above it.

1 Alternatively, undo the column of stitches down to the desired stitch, then insert the right needle into it as if to knit to catch it.



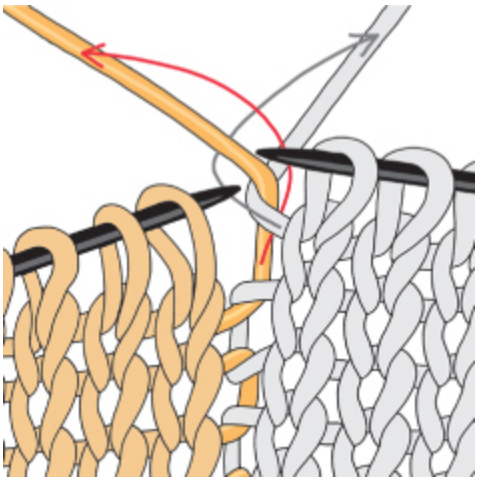
2 After this, insert the right needle under the bars of undone stitches, place the working yarn around the needle, and knit 1 stitch, catching all bars in the process.

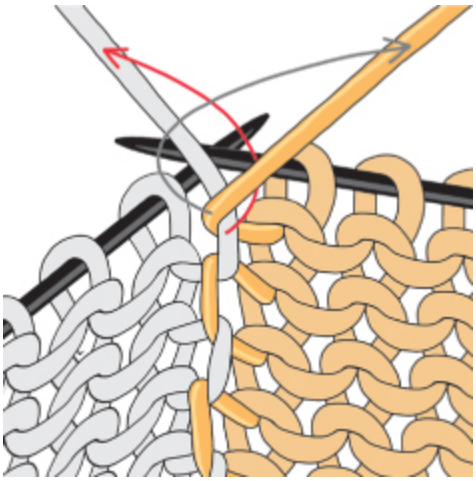
SPECIAL COLORWORK TECHNIQUES

INTARSIA

For larger areas or motifs in one color, each section is worked from a separate ball of yarn to avoid very long strands of yarn carried behind work. When changing colors, the strands of yarn are crossed with each other.

Work in back-and-forth rows up to the color change spot, and cross the two strands of yarn counterclockwise around each other.



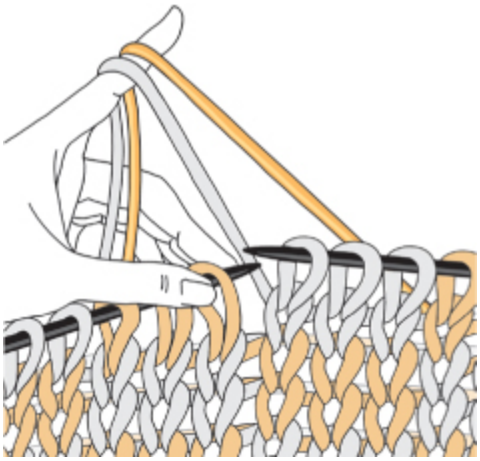


STRANDED COLORWORK

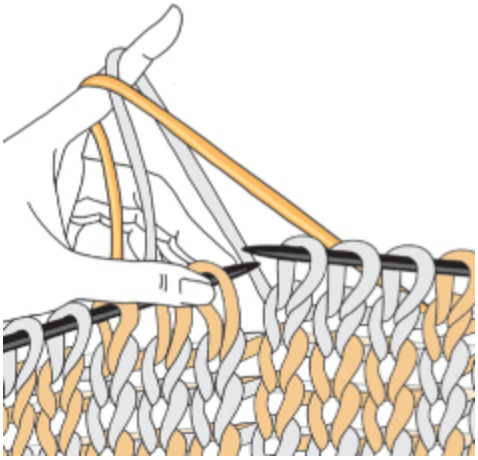
In the stranded colorwork technique, in every row or round, two or more colors are used. One or more strands in unused colors are carried loosely in back of work, called floats.

There are different ways of holding the strands:

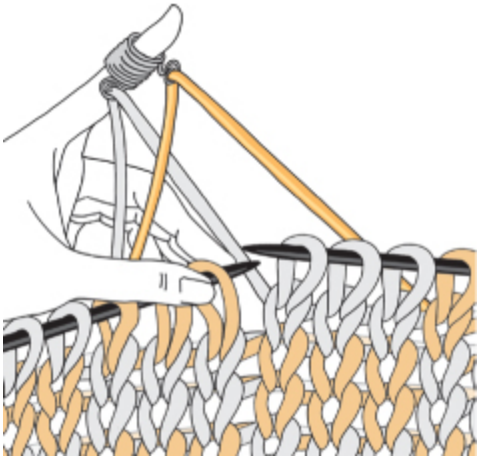
1 Only the current working yarn rests on the index finger; the other strands hang down loosely in back of work, and the active color always changes. This method is suitable for beginners.



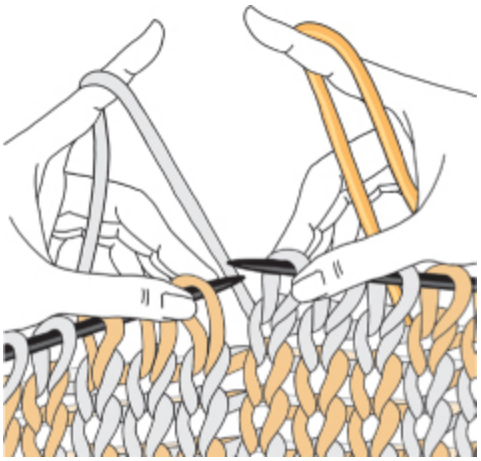
2 Two parallel strands of yarn go over the index finger in the same direction.



3 Two strands of yarn are crossed over the index finger: one strand runs from back to front, the second one from front to back over the index finger.



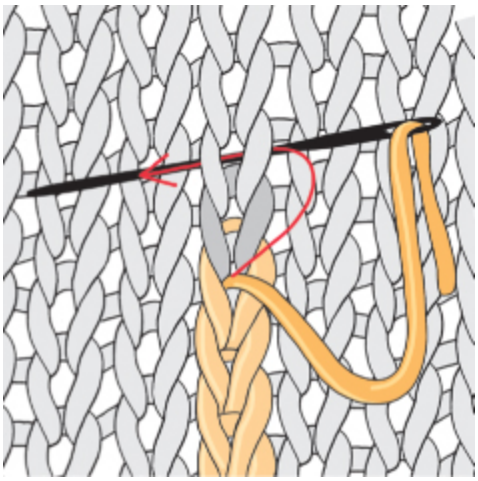
4 A yarn guide (Fair-Isle ring) worn on the index finger, available in specialty stores in versions for 2 to 4 colors, holds the strands of yarn. This prevents unintentional twisting of the strands.



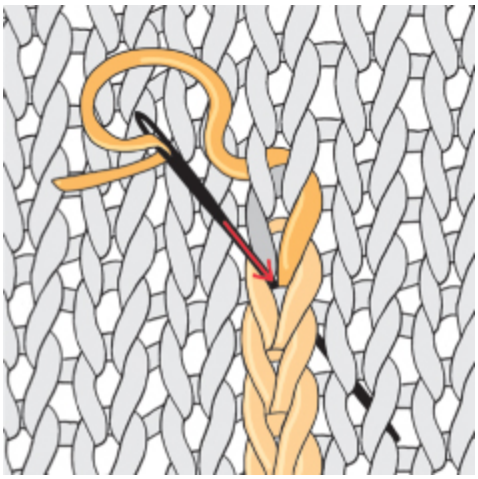
5 The yarns are held using two hands, each color over one index finger. This method requires practice.

PLEASE NOTE: The floats should be as even as possible and held neither too tightly nor too loosely. For longer spans needing to be bridged, the unused color should be twisted once with the active color halfway through the float to avoid annoying loops on the wrong side of the work. When working in back-and-forth rows, strands should always be crossed at the end of the row before turning. Working in the round will produce especially neat and even stitches.

EMBROIDERING IN DUPLICATE STITCH



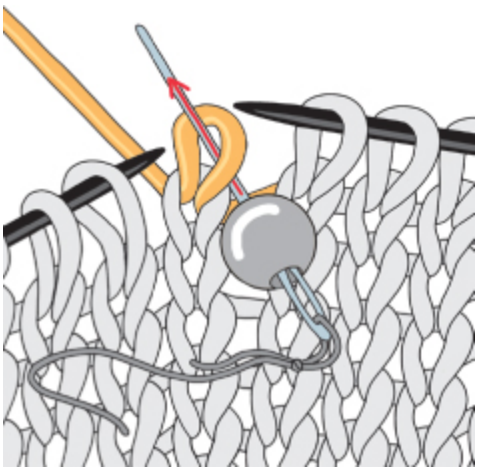
1 First, insert a tapestry needle from the wrong side of the work through the stitch below the stitch to be embroidered, and pull the yarn through to the right side of the work. Now, go back through to the wrong side to the right and above the stitch to be embroidered, lead the yarn in back of work 1 stitch to the left, and come out again on the right side of work.



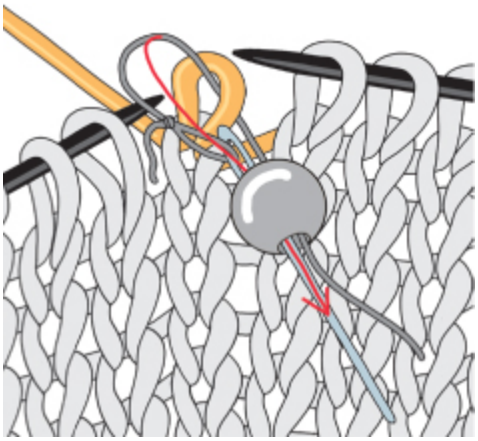
2 Move the needle down to the base of the stitch, go through to the wrong side of the work again, and pull the yarn through to the wrong side of the work.

INCORPORATING BEADS

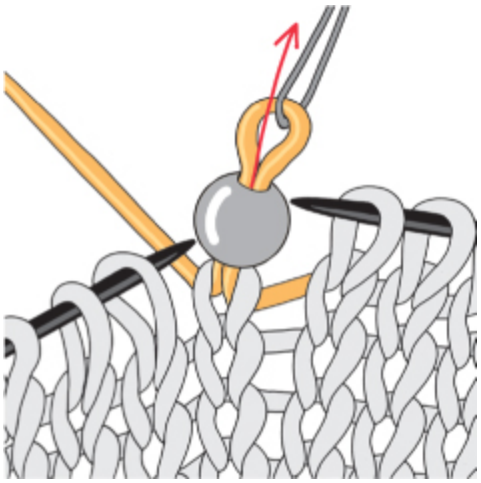
Thread a piece of sewing thread into a beading needle or thin sewing needle, and secure with a knot a short way below the eye. First, knit the stitch to which the bead will be added, then return it to the left needle.



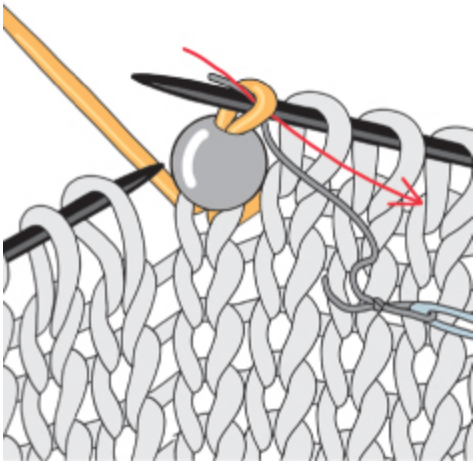
1 Now, thread a bead onto the needle, then use the beading needle to lift the stitch from the knitting needle.



2 Pull the needle through the stitch, then lead it back through the threaded bead.



3 Now, pull the stitch through the bead with the help of the thread loop, placing the bead on the stitch.



4 Place the stitch onto the right needle with the help of the thread loop, then remove the thread.

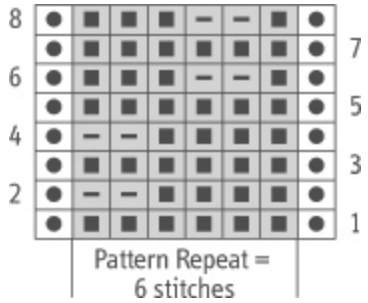
READING KNITTING CHARTS

For ease of reading, knitting patterns are presented in the form of special illustrations, called charts. These charts show which stitches need to be next to and atop each other. Every box in the chart stands for one action.

If only right-side rows (= rows with an odd row number placed at the right of the chart) are worked in pattern, wrong-side rows will not be shown in

the chart; how to work them will be stated in the written instructions.

Knitting charts are read in the direction the row is worked, from right to left and from bottom to top. If wrong-side rows (= rows with an even row number placed at the left of the chart) are depicted, too, they will be read in the opposite direction, from left to right.



The symbols in the chart are explained in a Stitch Key.

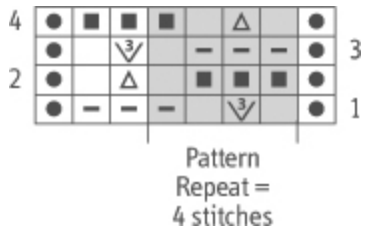
= 1 selvedge stitch

= Knit 1 stitch

= Purl 1 stitch

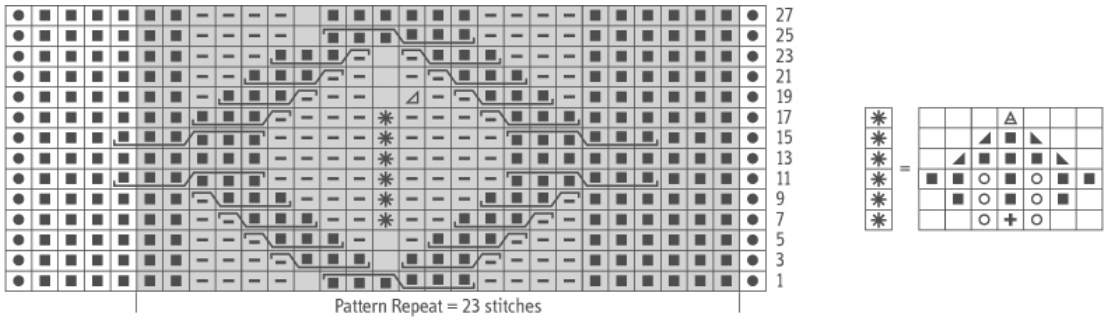
The framed pattern repeat has to be worked as often as stated in the instructions. Stitch markers to divide individual pattern repeats make orientation within the pattern much easier.

In some stitch patterns, the stitch count changes within the row. Here, either the chart will become accordingly wider or narrower at the edges or, within the chart, boxes without symbols, which require no action, are inserted as placeholders for better orientation.



With some of the patterns (such as leaf and flower patterns), additional charts have been included. For these, at the marked spots, change from the

main chart to the additional chart, and after having worked the stitches of the additional chart, resume working from the main chart.



Knitting charts for Intarsia or stranded colorwork patterns are presented with boxes of differently colored backgrounds. They are read the same way as charts for textured patterns, working stockinette stitch and changing colors as shown in the chart. Each box represents a stitch in the indicated color. When working in back-and-forth rows with turning, these stitches are to be knit in right-side rows and purled in wrong-side rows. As with other knitting charts, right-side rows are worked from right to left, and wrong-side rows in the opposite direction from left to right. When working in the round, all stitches in all rounds are always knitted, and the chart is always read from right to left.

FROM PATTERN TO FINISHED OBJECT

PLANNING YOUR PROJECT

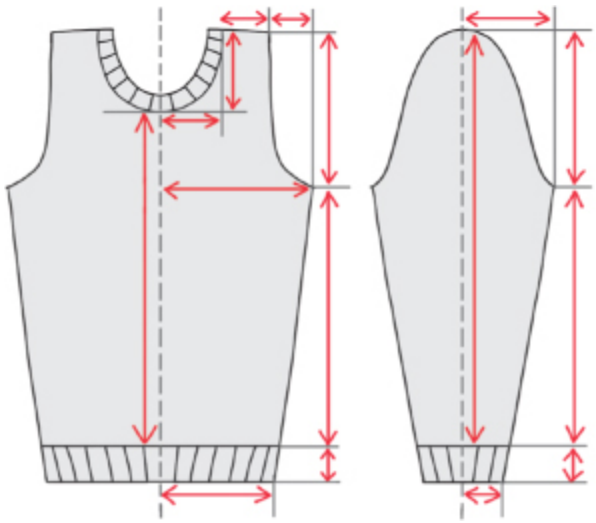
Every project starts with planning. What type of item do you want to knit? A fashionable accessory, such as a scarf, hat, arm- or legwarmers, or a bag? Those always come in handy. A trendy pullover, a snuggly cardigan, or a comfy poncho for the new season? Or should it be something decorative for your home? A pretty pillowcase, a soft blanket, a lampshade, or a flowerpot cozy?

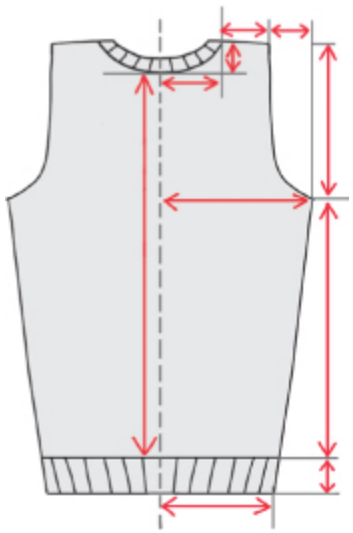
DRAWING A GARMENT PATTERN

Once you have decided what item to knit, it’s time to think about how to approach making it. Existing garment patterns or finished articles of clothing or accessories can be used as a starting point. Do you intend to knit

the garment seamlessly in one piece, or will it be in multiple pieces and seamed? First, draw a rough shape of the garment. If it consists of multiple parts, an outline of each piece to be knitted will need to be drawn. For a pullover, for instance, you will need one piece for the front, one for the back, and one sleeve. (Identical parts, such as sleeves, need to be drawn only once.) Cuffs, if applicable, should be drawn together with the piece to which they are attached. For parts to be knitted onto existing pieces, such as facings or a collar, make a note, or draw a schematic.

Now, measurements have to be filled in the schematic. For rectangular pieces, such as scarves, length and width are sufficient. A pullover or a cardigan, however, in addition to length and width for each piece, will need armhole and neckline depth as well as shoulder, neckline, and armhole width.





These measurements can be taken from an existing well-fitting garment but should be checked against the actual body measurements and corrected if needed. Is there enough ease to allow for movement? Do neckline circumference and head circumference match? For pillowcases and lampshades or cozies for flowerpots, the stretch factor has to be considered and the item knit up slightly smaller for a snug fit.

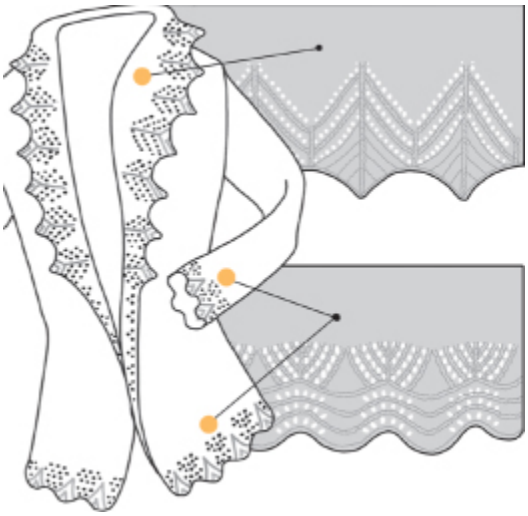
CHOOSING A STITCH PATTERN

After you have decided on the type of item and its shape, it's now time to think about the stitch pattern. Do you intend to knit the whole item in one pattern, or do you want to combine several of them?

Classic designs often combine an all-over pattern with a different border at the beginning and the end. On account of their inherent stretchiness, ribbing or cable patterns are ideally suited for cuffs, neckline, and button bands. Since cable patterns pull in noticeably, it helps to first cast on fewer stitches, increasing the remainder, evenly distributed, during the first row worked in pattern. This approach yields a straight cast-on row without pulling in. The same is true for binding off cable patterns. Here, in the last pattern row, a few stitches need to be decreased before binding off all stitches during the bind-off row.

Edgings and borders (see pages 212 and following) are ideally suited as decorative finishings. Some of them, such as droplet arcs edging, vine

border, feather-and-fan border, or chevron lace edging, make good beginning borders for accessories such as scarves, arm- or legwarmers, ponchos and lampshades, or decorative edges for front, back, and sleeves of pullovers and cardigans.



Edgings and borders worked in one piece with the main part are used as finishing for side edges on scarves, shawls, and open-front cardigans. Other edgings and borders, such as lace edgings, chevron-lace finishing, or the flower motif border, create a decorative finishing for the ends of scarves, shawls, or collars.

Individual decorative edgings can be combined heightwise as desired with garter stitch fabric, repeated multiple times, or paired with each other. Sequences of different edgings are another option.

Individual pattern strips can be combined widthwise as well. Examples for these can be found in chapters Aran and Alpine patterns (see pages 70 and following) as well as in lace-and-cable patterns (see pages 86 and following). For these patterns, the different width of individual pattern columns needs to be taken into account and, if needed, filled in to the desired width with knit or purl stitches.

PICKING A SUITABLE YARN

Stitch patterns can have completely different looks depending on the type of yarn used. For instance, the same lace pattern, worked using the same needle size, will look entirely different if worked in a delicate mohair yarn or a thicker merino wool or cotton yarn. Fluffy or textured yarns will often swallow a stitch patten. Smooth yarns, however, improve the stitch definition. This also applies to solid-colored versus multi-color yarns. The way the yarn is plied plays a role too. Yarns plied more tightly will produce a better stitch definition.

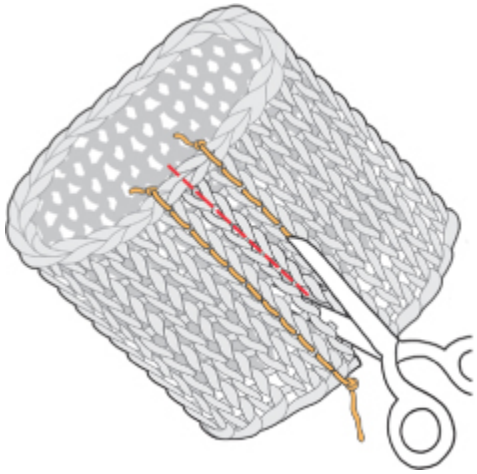
When deciding on a yarn, the purpose of the future item must be factored in. Coarse sock yarn, for instance, is not suitable next to delicate baby or toddler skin, while it is the right choice for hard-wearing and durable socks. A coat knit in pure silk would lose its shape very quickly. Knit in fluffy mohair, however, the same coat is bound to serve and delight for a long time. For airy summer garments, linen and cotton yarns are best, while for warm winter things, wool yarns or wool blends are a better choice. Care instructions for the fiber come into play too. Garments that will be subjected to frequent washings should be worked in easy-care yarns.

MAKING AND EVALUATING A GAUGE SWATCH

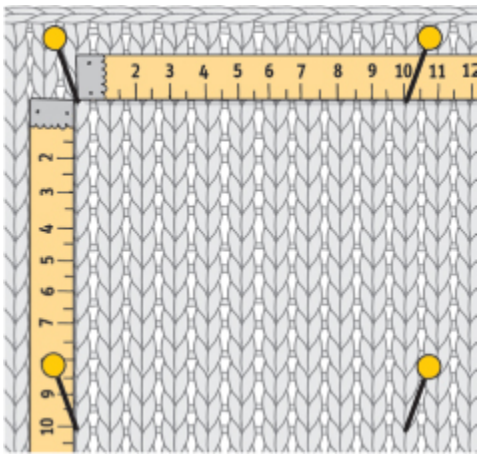
After the stitch pattern has been picked, the next important step is making a gauge swatch. Should you feel tempted to skip it and want to start knitting right away, don’t give in to this urge. For a perfect result, a carefully prepared and blocked gauge swatch is simply indispensable. It is the only way to avoid disappointment in an ill-fitting garment later.

To prepare the gauge swatch, using the actual project yarn with a matching needle size, knit a square of about 6 × 6 in (15 × 15 cm) in the desired stitch pattern or patterns. The yarn wrapper will give an approximate idea about needle size and the required number of stitches to cast on. If the stitch count on the ball band is given for a 4 × 4 in (10 × 10 cm) square, increase the stitch count by half for your larger intended swatch size. For cable and ribbing patterns, a few stitches more need to be cast on, since fabric in these patterns will pull in noticeably. If needed, adjust the needle size until the fabric turns out to your liking.

For stranded colorwork patterns, too, the gauge swatch should be worked in the actual pattern, not just in stockinette in one color, since stranded colorwork patterns with multiple colors will turn out differently than a piece worked in plain stockinette in just one color. For projects to be knit in the round, the gauge swatch should be worked in the round, too, since the gauge for rows with all knit stitches will be different from that for knit and purl rows. To measure a gauge swatch knit in the round, either work the swatch two times as wide as needed and pat it flat to measure or secure the stitches with two parallel columns of stitches, as shown, and then cut open the swatch lengthwise between the seams.



After having bound off, either moisten the gauge swatch or wash it briefly, and then block it carefully (see page 305). A stockinette stitch gauge swatch worked in pure wool or cotton may instead be gently blocked with a steam iron from the wrong side of the fabric while covered with a moist cloth. After the gauge swatch has been thoroughly dried, remove it from the blocking surface, and measure it only after it has been detached, since it might further shrink after having been lifted. Using a tape measure or ruler, mark a square of 4 × 4 in (10 × 10 cm) in the middle of the swatch with tailor pins; then count the stitches and rows within the marked area, and write down the numbers.



Alternatively, place a knitting gauge ruler on top of the swatch, and count the stitches and rows within the framed area.

CALCULATING STITCH COUNTS

For further calculations, a pocket calculator is very useful. First, count the number of stitches over a width of 4 in (10 cm), and then divide it by 4. This gives you the stitch count for a width of 1 in (2.5 cm). Now, multiply this stitch count by the desired width of the piece to be knitted in inches (cm). This yields the stitch count to be cast on for the desired width. For knitting in back-and-forth rows with turning, add two extra stitches as selvedge stitches. Write the calculated number of stitches into the schematic or garment pattern, and then repeat the calculations for the width of each part of the piece.

EXAMPLE: 15 stitches widthwise were counted in 4 in (10 cm). Dividing 15 stitches by 4 in (10 cm) results in a stitch count of 3.75 stitches for every 1 in (1.5 stitches for every 1 cm) widthwise. For the desired width of 16 in (40 cm), multiply the stitch count of 3.75 by 16 in (1.5 by 40 cm). This results in 60 stitches being needed for your example with a width of 16 in (40 cm).

CALCULATING THE ROW COUNT

The number of rows is calculated the same way. Count the number of rows needed for a height of 4 in (10 cm), and divide it by 4. This is the row count

for a height of 1 in (2.5 cm). Now, multiply this row count with the desired height of the knitted piece. This yields the number of rows needed for the desired height. Write the calculated number of rows into the schematic or pattern, and repeat the calculations for the heights of all respective parts of the piece.

EXAMPLE: A gauge swatch of 4 in (10 cm) contains 20 rows heightwise. Dividing 20 rows by 4 in (10 cm) gives a row count of 5 rows for every 1 in (2 rows for every 1 cm) heightwise. For a desired height of 16 in (40 cm), the row count of 5 needs to be multiplied by 16 in (2 rows by 40 cm). This results in 80 rows being needed for this example with a height of 16 in (40 cm).

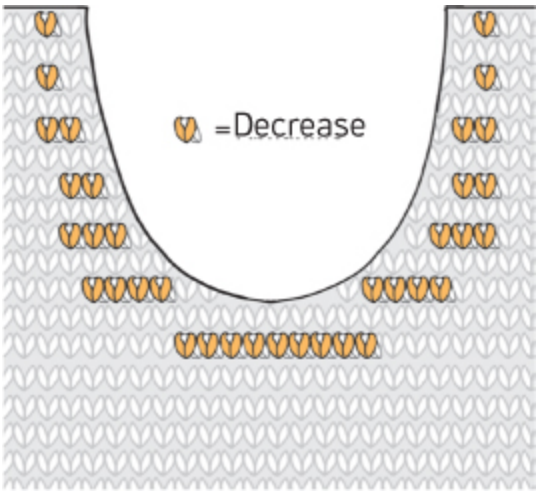
CALCULATING INCREASES AND DECREASES

For pieces that are not straight rectangles, increases and decreases have to be additionally calculated. If all stitches will be increased or decreased within the same row, the number of stitches to be increased or decreased is calculated over the width only, using the method described above. If increases or decreases are to be distributed over a certain height, the number of rows has to be factored in as well. For this step, first determine the number of stitches for the width to be increased or decreased. Then, based on the height over which these stitches are to be increased or decreased, calculate the number of rows as described above. Finally, divide the number of rows by the number of stitches.

EXAMPLE: 10 stitches are to be increased over 80 rows. 80 divided by 10 yields 8. In this example, accordingly, in every 8th row, 1 stitch will be added a total of 10 times.

If dividing produces decimal places instead of a whole number, first, the number of remaining rows has to be determined. To do this, the number before the decimal point needs to be multiplied by the number of stitches. Subtracting the result from the total number of rows gives the number of remaining rows. These will now be distributed as evenly as possible over the appropriate height.

EXAMPLE: 10 stitches are to be increased over a height of 86 rows. 86 divided by 10 yields 8.6. 8 multiplied by 10 yields 80. 86 rows minus 80 rows yields 6 remaining rows. In this example, 1 stitch will be increased first in every 8th row 4 times total, then in every 9th row 6 times total.
For an especially even distribution, 1 stitch can be increased in every 8th row twice, then in every 9th row 3 times; then repeat the whole sequence once.
When increases and decreases occur not over a straight slant, they have to be distributed differently, following the shape in the schematic. For armholes and necklines with a curved shape, first more stitches have to be decreased over fewer rows, and then the remaining stitches over more rows to create a curved line.



When stitch patterns with different gauges are combined, stitches need to be increased or decreased depending on the respective gauge.

ESTIMATING THE TOTAL YARN AMOUNT NEEDED

Based on the total yardage listed on the yarn label and the gauge swatch, the approximate total yardage for the desired project can be estimated.
To do this, first work a gauge swatch of at least 50 or, better yet, 100 stitches, in the actual stitch pattern and with the needle size that will later be used for the project. Mark beginning and end of this section on the yarn in the swatch; then unravel the stitches, and measure the length of yarn

between the two marked spots. This will be the length of yarn needed to work 50 or 100 stitches. Dividing this length by 50 or 100, respectively, yields the length of yarn needed for 1 stitch. Now, calculate the total stitch count for the piece on the basis of the schematic by multiplying the number of rows by the number of stitches per row. Then multiply the total stitch count by the length of yarn required for 1 stitch. This yields the total yard-age needed for the whole project. Finally, this now needs to be divided by the yardage per skein to determine the total number of skeins required for the project.

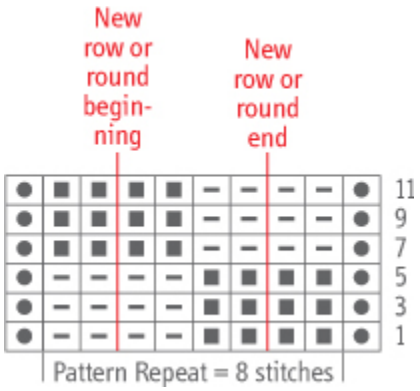
EXAMPLE: 100 stitches used up 1.6 yd (1.5 m) of yarn. 1.6 yd divided by 100 stitches yields 0.016 yd per stitch (1.5 m divided by 100 stitches yields 0.015 m per stitch). For a small scarf with 40 stitches per row and a length of 350 rows, you would need 350 times 40; thus, the whole scarf would have 14,000 stitches in all. The yarn amount needed is calculated as follows: 14,000 times 0.016 yd = 224 yds (14,000 times 0.015 m = 210 m) of yarn. With a yard-age of 93 yd (85 m) per skein, you would need 224 yd divided by 93 yd (210 m divided by 85 m), amounting to about 2.5 skeins.
A little buffer should always be added to this calculated amount since cast-on and bind-off rows use up more yarn than regular rows; the beginning and ending tail also need to be accounted for, and a small reserve for knots in the skein (if any) should be factored in as well. Additional yarn might be needed for seaming and, if applicable, for finishing elements added afterward, such as button bands, ties, fringe, etc.

ADJUSTING THE PATTERN REPEAT TO THE STITCH COUNT

If the calculated number of stitches does not match the stitch count of the selected stitch pattern, adjustments have to be made. First check, on the basis of the stitch count of the selected stitch pattern, how many stitches are left over or would be additionally needed for another full repeat of the pattern repeat (always stated in this book). For small differences, the calculated number of stitches can be increased or reduced or, depending on

the pattern, 1–2 extra stitches in knit or purl can be added at the edges. In case of larger discrepancies, the beginning of the row or round needs to be shifted to within the pattern repeat. To keep the symmetry of the pattern, count off half the number of extra stitches from the end of the pattern repeat, and mark this spot as the new beginning of the row or round. The end of the row or round also needs to be moved accordingly. Continue working the pattern repeat until all stitches—or, when working in back-and-forth rows, all stitches except For the selvedge stitch—have been worked, and mark this spot as the new end of the row or round.

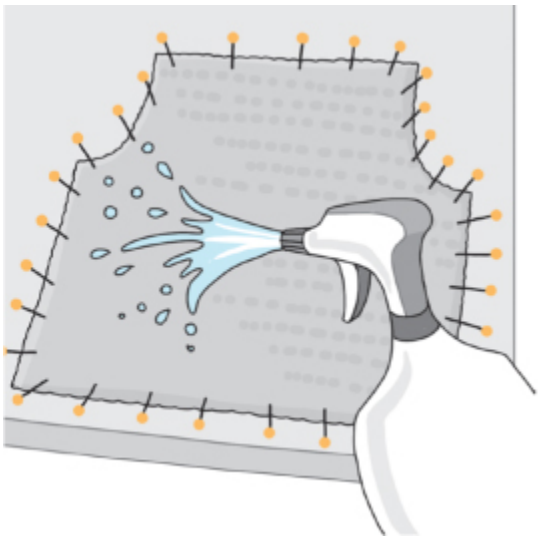
EXAMPLE: Discrepancy of 4 extra stitches



BLOCKING KNITTED PIECES

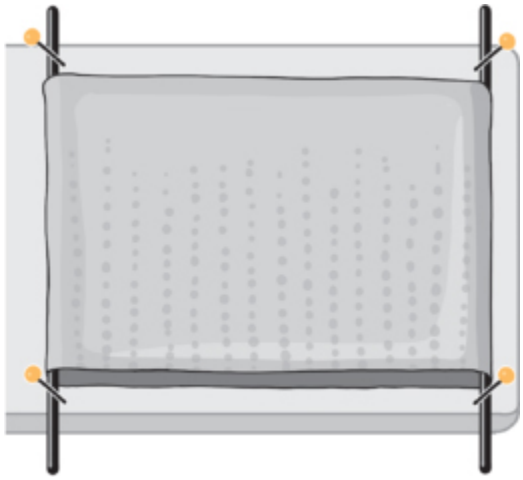
After knitting and before seaming, all parts should be wet blocked. Blocking creates an even and neat stitch definition. Side edges won't roll as much and will be easier to seam.

Either moisten the knitted pieces or wash them briefly, roll them up in a towel, and gently press out excess water. Then, using rust-proof tailor pins, pin them out on a suitable flat surface according to the measurements in the schematic. Alternatively, the pieces can first be pinned while still dry and then moistened with a spray bottle or covered with a wet cloth.



Good choices for surfaces are special blocking mats, soft ironing mats, or a styrofoam board covered with fabric. Larger pieces can be blocked on the carpet as well. Ribbing should not be stretched too much, so it will retain its elasticity.

Pieces worked in the round can be blocked especially easily with the help of two metal or fiberglass rods or wooden dowels. For this, first insert the rods into and through the knitted tube, then pull them apart, and pin them in place with tailor or blocking pins.



Pieces from pure wool or cotton worked in stockinette stitch or stranded colorwork and Intarsia patterns can also be gently blocked with a steam iron from the wrong side of the fabric while covered with a moist cloth.

Let all pieces dry thoroughly, and then sew them together. For garments featuring button bands, facings, or a collar, these will be either knitted onto the main piece directly after seaming by picking up the required number of stitches from the edge or first knitted separately and sewn on later.
