MICROWAVE RADIATION IS CLASSIFIED BY THE WORLD HEALTH ORGANIZATION (WHO) AS A

CLASS 2B CARCINOGEN

PEOPLE WITH SMART METERS ON THEIR HOMES HAVE REPORTED A SUDDEN INCREASE IN:
SLEEP DISORDER, DIZZINESS, EAR RINGING, ANXIETY, HEADACHES, BRAIN FOG, HEART PALPITATIONS

*** MAY CAUSE CANCER LONG-TERM ***

i 8 REASONS TO OPT-OUT OF A “SMART” METER

1. **HEALTH & ENVIRONMENT** - Smart Meters emit thousands of bursts of possibly carcinogenic, RF microwave radiation into homes 24 hours a day. People are complaining of headaches, ringing in the ears, rashes, nausea, insomnia, chest pressure, heart palpitations, nose bleeds, brain fog, weakness, etc. Wildlife and plants may also be affected.
2. **ELECTROPOLLUTION** - Smart meters contribute significantly to the levels of “dirty electricity” in a home. They cause repeated spikes and surges of higher frequencies of electricity that run throughout every circuit of a home, contaminating every room with harmful electropollution.
3. **PRIVACY INVASION** – Without your consent, the computer inside the Smart Meter collects private energy behavior patterns that utility providers can sell to marketers.
4. **HACKING & SECURITY** – Vulnerabilities in wireless data transmission pose national security risks to our electric grid from hackers. With a smart meter, your home could potentially be remote-detonated and destroyed by fire.
5. **LOSS OF PROPERTY VALUE & SAFETY** – Numerous reports of electrical fires, power surges, arcing and sparking. Homes with older wiring may be more susceptible to problems. Smart Meters are not UL certified (no safety standards enforced.)
6. **HIGHER BILLS** – Smart Meters function as rationing devices that monitor usage 24/7 to charge varying rates during different times of the day. Due to escalating charges for peak time usage, bills can double, or worse.
7. **“SMART DEVICE” APPLIANCES** – Many new appliances come with mandated wireless RF transmitters that emit continuous 24/7 RF signals to the wireless Smart Meter. All current smart devices are biologically toxic and harmful to varying degrees.
8. **LACK OF CONTROL** – The utility owns and maintains 100% control over computer hardware and software upgrades inside Smart Meter. With Demand Response, a utility company can selectively turn on/off appliances or an entire household at their whim.

BEWARE OF 5G TOWERS TOO

Is 5G technology safe? Can radio frequencies be adjusted to be less harmful? Is 5G tech made in the USA safer than 5G tech made by Huawei in China. Is the definition of what “5G” means the same in every region? These are valid questions that deserve to be answered by the authorities implementing 5G. We need transparency. We need our health concerns to be acknowledged and addressed, not a race to manufacture and install the most powerful cellular technology possible, without regard for health and the environment.
